ABOUT RTX

With more than 180,000 global employees, we push the limits of technology and science to redefine how we connect and protect our world. With industry-leading capabilities, we advance aviation, engineer integrated defense systems for operational success and develop next-generation technology solutions and manufacturing to help global customers address their most critical challenges. The company is headquartered in Arlington, Virginia.

To learn more, visit www.rtx.com.

¹ Adjusted net sales and adjusted earnings per share are non-GAAP financial measures. For the corresponding measures calculated in accordance with generally accepted accounting principles (GAAP) and a reconciliation of the differences between the non-GAAP and GAAP measures, please refer to pages 7 and 8 in this Annual Report.

² Amounts include company- and customer-funded research and development.

Dear Shareowners,

Our mission remains unwavering: to connect and protect the world.

We deliver technology solutions that ensure safe air travel for millions of passengers each day and support the U.S. and its allies in defending freedom. Demand for our products remains strong. The evolving threat landscape intensifies the urgent need for modernized, integrated defense capabilities. At the same time, passenger air traffic continues to grow, signaling increasing travel demand in the years ahead. We have what it takes to meet this moment head-on with an exceptional, performance-driven team delivering for our customers and creating value for our shareowners.

Executing on our commitments

This past year, we made significant strides executing for our customers by employing our Customer Oriented Results and Excellence (CORE) operating system. Pratt & Whitney boosted maintenance, repair and overhaul (MRO) output on the PW1100G Geared Turbofan (GTF) engine by 26% to support the growing GTF fleet. Collins Aerospace increased production at its factories supporting the airframers' ramp-up in commercial original equipment manufacturer (OEM) rates. And Raytheon increased output by 20% across a number of critical programs to support munitions replenishment, including Guidance Enhanced Missile (GEM-T) for the Patriot air and missile defense system, the AMRAAM missile, which is the premier air-to-air combat-proven effector, and the Coyote unmanned aircraft system (UAS) to support counter-UAS capabilities.

Our focus on execution delivered strong financial performance last year, with adjusted net sales* of \$88.6 billion and adjusted earnings per share* of \$6.29. Our \$268 billion backlog reflects the trust our customers put in RTX in both commercial and defense sectors. Additionally, we generated \$10.6 billion in cash flow from operating activities, which resulted in \$7.9 billion in free cash flow* for the year.

Investing in our growth

We invested over \$10 billion last year in capital expenditures and company- and customer-funded research and development to advance our ability to deliver on our commitments. This includes investing in manufacturing and expansion projects like in Tucson, Arizona, where we're creating additional production capacity for munitions and sensors, and in Asheville, North Carolina, where we're standing up an advanced casting foundry

to support turbine airfoils essential for both commercial and defense engines.

We also continue to invest in our digital footprint to enable more informed decisions, reduce costs and improve output. For instance, across RTX, digitally connected factories represent over 50% of annual manufacturing hours, and in 2026, we're connecting even more equipment and expanding coverage across our footprint.

Innovating for today and tomorrow

We're enhancing existing products for our customers, while also developing capabilities for new platforms. Our team achieved some remarkable milestones last year, including certification of Pratt & Whitney's GTF Advantage engine, which delivers more takeoff thrust, better fuel efficiency and increased time on wing. Many of its advancements in durability and fuel efficiency are also being offered as upgrades to existing GTF engines. We advanced Collins' next-generation braking system for A321XLR aircraft, which will extend brake life by 50%. And we designed, developed and tested Raytheon's ground-launched StormBreaker demonstrator in just 50 days, accelerating the development of capabilities needed to satisfy new missions.

Leveraging our unique scale

In all of this, we consistently leverage RTX's unique breadth and scale to unlock value. Our expertise across commercial aerospace and defense technology positions us to meet customer needs faster and at lower cost. For instance, the communication and navigation systems we supply for commercial aircraft share a common architecture with those used by our defense customers, enabling scale and affordability.

It is ultimately our global team of 180,000 employees that drives RTX forward. They embody our values — safety, trust, respect, accountability, collaboration and innovation. They keep our customers at the forefront of everything we do. They help make the world safer and more connected. Thank you to each of them for their continued dedication and commitment to our mission.

Christopher T. Calio

Chairman, Chief Executive Officer

* See pages 7 and 8 for additional information regarding non-GAAP financial measures.

2025 business highlights

RTX’s three businesses drive best-in-class performance by leveraging our breadth and scale to execute on our customer commitments and innovate for future growth.

COLLINS AEROSPACE

A leader in integrated and intelligent solutions for the global aerospace and defense industries.

- Secured more than \$4 billion in combined long-term agreements to provide new MRO services and long-term contracts to supply spare parts for several airlines, including United Airlines, Japan Airlines and Qatar Airways.
- Awarded a \$438 million contract by the Federal Aviation Administration (FAA) to support the Radar System Replacement program, a cornerstone of the agency’s effort to modernize the U.S. National Airspace System. The program is a key part of the Department of Transportation’s Brand New Air Traffic Control System.
- Received a follow-on contract with the potential for up to \$904 million over five years to continue development of the U.S. Navy’s Cooperative Engagement Capability (CEC), a system that integrates sensors across surface, land and air platforms to enable Integrated Fire Controls. RTX has been the sole provider of the CEC since 1985.

\$30.2B

Adjusted net sales*

\$4.9B

Adjusted operating profit*

PRATT & WHITNEY

A world leader in the design, manufacture and service of aircraft engines and auxiliary power units.

- Secured more than 1,500 GTF engine orders and commitments from customers. Pratt & Whitney's GTF Advantage engine achieved U.S. FAA and European Union Aviation Safety Agency (EASA) type certification, paving the way for entry into service in 2026. In 2025, more than 2,500 aircraft across more than 90 operators were powered by GTF engines.
- Received \$5.3 billion in F135 engine orders, including \$2.9 billion for F135 production contracts and \$2.4 billion for F135 sustainment contracts. The F135 engine powers all three variants of the F-35 Lightning II.
- Pratt & Whitney Canada delivered 2,318 engines, expanding the installed base to more than 71,000 engines worldwide.

RAYTHEON

A leading provider of defense solutions to help the U.S. government, its allies and its partners defend national sovereignty and ensure security.

- Awarded a \$1.1 billion contract from the U.S. Navy to produce AIM-9X Block II missiles — the largest contract awarded for the program — which will increase production to 2,500 missiles per year.
- Received a U.S. Army contract valued at \$1.5 billion to deliver nine Lower Tier Air and Missile Defense Sensor (LTAMDS) radars to the U.S. Army and Poland, which is the first international LTAMDS customer. This next-generation air and missile defense radar provides dramatically more performance against a range of threats, from manned and unmanned aircraft to cruise missiles, ballistic missiles and hypersonics.
- Awarded a \$3.5 billion contract for the AMRAAM missile, the largest contract in program history. This contract involves foreign military sales to several countries, including Japan, Canada, Germany, Ukraine and the United Kingdom.

RTX is rising to meet demand

Investing in technology to support performance and accelerated delivery for our customers.

Growing commercial markets, combined with evolving threats, continue to drive demand for our products and solutions. Our defense and commercial customers want new technology solutions and in larger quantities, faster than ever before.

We're helping our customers achieve their goals by investing in three focused areas: speed, innovation and capacity expansion.

Using our insights to move faster

Real-time, end-to-end visibility across our global operations drives efficiency and speed. Using advanced data analytics and artificial intelligence (AI), we have built a digital backbone across the enterprise. It connects 17,000 pieces of equipment into our network and 40 factories into a single, unified platform, covering more than half our manufacturing hours. These investments allow us to combine machine performance data from sensors on our equipment with real-time data on parts movement from our shop floors.

These initiatives are paying off at manufacturing sites, where we use AI and real-time data about performance, tracking and planning to improve our response to emerging production challenges.

Enhancing products and ensuring safety

Our proprietary data advantage, often paired with AI applications, is also transforming our products, both in how we design them and in how they operate.

For example, we drew on 40 million hours of flight data across the existing GTF engine fleet to develop upgrades to our combustor design, coatings and double-walled castings.

Our commercial avionics business, meanwhile, has used AI tools to accelerate its software certification process. For safety-critical software, this involves executing a massive number of tests and analyzing the results against a set of

Using advanced data analytics and AI, we have built a digital backbone across the enterprise. It connects 17,000 pieces of equipment into our network and 40 factories into a single, unified platform.

complex requirements to ensure that the software functions correctly, consistently and as specified.

Collins Aerospace's Collaborative Mission Autonomy software delivers a modular, scalable and mission-ready AI-powered solution that integrates seamlessly across platforms and domains. This software is accelerating decision-making, enabling manned-unmanned teaming and enhancing mission effectiveness.

AI also enables defense systems to perform even better in highly contested environments. For example, Raytheon's RAIVEN electro-optical and infrared sensing system uses AI to enhance accurate, persistent and accelerated target observation across the battlefield.

Increasing capacity and operations to support growth

As our deployment of AI and data analytics accelerates production, focus on capacity expansion positions us for

the future demands for our products and solutions. These investments include the Redstone Missile Integration Facility in Huntsville, Alabama, which will increase site capacity by 50% and support the growing demand for our naval programs. We also broke ground in 2025 on a \$53 million, 23,000-square-foot expansion of Raytheon's LTAMDS production facility in Andover, Massachusetts.

We continue to invest heavily in our CORE operating system, which empowers our employees to improve our processes and deliver high-quality outcomes. Last year, for example, we implemented CORE to drive significant increased output on a number of high-demand munitions programs, including Coyote, along with the GEM-T and AMRAAM missiles.

All these efforts ultimately come down to one thing: delivering for our customers, today and tomorrow. Our products and capabilities are vital to connecting people, cultures and economies and maintaining security around the world. We will continue to invest in ensuring our customers — in both commercial and defense — achieve mission success.

Cautionary note concerning factors that may affect future results

This 2025 Annual Report to Shareowners contains statements which, to the extent they are not statements of historical or present fact, constitute “forward-looking statements” under the securities laws. These forward-looking statements are intended to provide management’s current expectations or plans for our future operating and financial performance, based on assumptions currently believed to be valid, and are not statements of historical fact. Forward-looking statements can be identified by the use of words such as “believe,” “expect,” “expectations,” “plans,” “strategy,” “prospects,” “estimate,” “project,” “target,” “commit,” “commitment,” “anticipate,” “will,” “should,” “see,” “guidance,” “outlook,” “goals,” “objectives,” “confident,” “on track,” “seek,” “aspire” and other words of similar meaning. All forward-looking statements involve a wide range of risks, uncertainties, assumptions and other factors that may cause actual results to differ materially from those expressed or implied in the

forward-looking statements. Such risks, uncertainties and other factors are described under the captions “Cautionary Note Concerning Factors That May Affect Future Results” and “Risk Factors” beginning on pages 11 and 13, respectively, in the Annual Report on Form 10-K within this report, and other important factors disclosed previously and from time to time in our other filings with the Securities and Exchange Commission (SEC). Given these factors, as well as other variables that may affect our operating results, you should not rely on forward-looking statements, assume that past financial performance will be a reliable indicator of future performance, or use historical trends to anticipate results or trends in future periods. We expressly disclaim any obligation or intention to provide updates to the forward-looking statements and the estimates, except as required by law.

Use and definitions of non-GAAP financial measures

RTX Corporation (“RTX” or “the Company”) reports its financial results in accordance with accounting principles generally accepted in the United States (“GAAP”). We supplement the reporting of our financial information determined under GAAP with certain non-GAAP financial information. The non-GAAP information presented provides investors with additional useful information but should not be considered in isolation or as substitutes for the related GAAP measures. We believe that these non-GAAP measures provide investors with additional insight into the Company’s ongoing business performance. Other companies may

define non-GAAP measures differently, which limits the usefulness of these measures for comparisons with such other companies. We encourage investors to review our financial statements and publicly filed reports in their entirety and not to rely on any single financial measure. A reconciliation of the non-GAAP measures to the corresponding amounts prepared in accordance with GAAP appears in the tables following on page 8. The tables on page 8 provide additional information as to the items and amounts that have been excluded from the adjusted measures. Below are our non-GAAP financial measures:

Non-GAAP measure	Definition
Adjusted net sales / Adjusted sales	Represents consolidated net sales (a GAAP measure), excluding net significant and/or non-recurring items ¹ (hereinafter referred to as “net significant and/or non-recurring items”).
Organic sales	Organic sales represents the change in consolidated net sales (a GAAP measure), excluding the impact of foreign currency translation, acquisitions and divestitures completed in the preceding twelve months and net significant and/or non-recurring items.
Adjusted operating profit (loss) and margin percentage (ROS)	Adjusted operating profit (loss) represents operating profit (loss) (a GAAP measure), excluding restructuring costs, acquisition accounting adjustments ² , and net significant and/or non-recurring items. Adjusted operating profit margin percentage represents adjusted operating profit (loss) as a percentage of adjusted net sales.
Segment operating profit (loss) and margin percentage (ROS)	Segment operating profit (loss) represents operating profit (loss) (a GAAP measure) excluding Acquisition accounting adjustments ² , the FAS/CAS operating adjustment ³ , Corporate expenses and other unallocated items, and Eliminations and other. Segment operating profit margin percentage represents segment operating profit (loss) as a percentage of segment sales (net sales, excluding Eliminations and other).
Adjusted segment sales	Represents consolidated net sales (a GAAP measure) excluding eliminations and other and net significant and/or non-recurring items.
Adjusted segment operating profit (loss) and margin percentage (ROS)	Adjusted segment operating profit (loss) represents segment operating profit (loss) excluding restructuring costs, and net significant and/or non-recurring items. Adjusted segment operating profit margin percentage represents adjusted segment operating profit (loss) as a percentage of adjusted segment sales (adjusted net sales excluding Eliminations and other).
Adjusted net income	Adjusted net income represents net income (a GAAP measure), excluding restructuring costs, acquisition accounting adjustments and net significant and/or non-recurring items.
Adjusted earnings per share (EPS)	Adjusted EPS represents diluted earnings per share (a GAAP measure), excluding restructuring costs, acquisition accounting adjustments and net significant and/or non-recurring items.
Free cash flow	Free cash flow represents cash flow from operating activities (a GAAP measure) less capital expenditures. Management believes free cash flow is a useful measure of liquidity and an additional basis for assessing RTX’s ability to fund its activities, including the financing of acquisitions, debt service, repurchases of RTX’s common stock and distribution of earnings to shareowners.

1 Net significant and/or non-recurring items represent significant nonoperational items and/or significant operational items that may occur at irregular intervals.

2 Acquisition accounting adjustments include the amortization of acquired intangible assets related to acquisitions, the amortization of the property, plant and equipment fair value adjustment acquired through acquisitions, the amortization of customer contractual obligations related to loss making or below market contracts acquired, and goodwill impairment.

3 The FAS/CAS operating adjustment represents the difference between the service cost component of our pension and postretirement benefit (PRB) expense under the Financial Accounting Standards (FAS) requirements of GAAP and our pension and PRB expense under U.S. Government Cost Accounting Standards (CAS) primarily related to our Raytheon segment.

When we provide our expectation for adjusted net sales (also referred to as adjusted sales), organic sales, adjusted operating profit (loss) and margin percentage (ROS), adjusted segment operating profit (loss) and margin percentage (ROS), adjusted EPS, adjusted effective tax rate, and free cash flow, on a forward-looking basis, a reconciliation of the differences between the non-GAAP expectations and the corresponding GAAP measures, as described above, generally are not available without unreasonable effort due to potentially high variability, complexity, and low

visibility as to the items that would be excluded from the GAAP measure in the relevant future period, such as unusual gains and losses, the ultimate outcome of pending litigation, fluctuations in foreign currency exchange rates, the impact and timing of potential acquisitions and divestitures, and other structural changes or their probable significance. The variability of the excluded items may have a significant, and potentially unpredictable, impact on our future GAAP results.

Reconciliation of GAAP measures to corresponding non-GAAP measures

Reconciliation of net income and diluted earnings per share (GAAP) to adjusted net income and adjusted diluted earnings per share (non-GAAP)

PART I

ITEM 1. BUSINESS

General

RTX Corporation is an aerospace and defense company that provides advanced systems and services for commercial, military, and government customers worldwide. The terms “we,” “us,” “our,” the “Company”, and “RTX” mean RTX Corporation and its subsidiaries, unless the context indicates another meaning. We serve commercial and government customers in both the original equipment and aftermarket parts and services segments of the aerospace industry. Our defense business serves both domestic and international customers as a prime contractor or subcontractor on a broad portfolio of defense and related programs for military and government customers. RTX Corporation was incorporated in Delaware in 1934.

The following description of our business should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” within Item 7 of this Form 10-K, including the information contained therein under the heading “Business Overview.”

Business Segments

Our operations are classified into three principal business segments: Collins Aerospace (Collins), Pratt & Whitney, and Raytheon, with each segment comprised of groups of similar operations.

Collins Aerospace is a leading global provider of technologically advanced aerospace and defense products. Collins’ solutions include aftermarket services for civil and military aircraft manufacturers, commercial airlines, and regional, business, and general aviation, as well as for defense and commercial space operations. Aftermarket services include spare parts, overhaul and repair, engineering and technical support, training and fleet management solutions, asset management services, and information management services. Collins designs, manufactures, and supplies electric power generation, management and distribution systems, environmental control systems, flight control systems, air data and aircraft sensing systems, engine control systems, engine components, engine nacelle systems, including thrust reversers and mounting pylons, interior and exterior aircraft lighting, aircraft cargo systems, evacuation systems, landing systems (including landing gear, wheels, and braking systems), communication, navigation, surveillance systems, fire and ice detection and protection systems, integrated avionics, and propeller systems. Collins also designs, manufactures, and supports complete cabin interiors, including seating, oxygen systems, food and beverage preparation, storage and galley systems, lavatory, and wastewater management systems. Collins’ solutions support human space exploration with environmental control and power systems and extravehicular activity suits. Collins also provides connected aviation solutions and services through worldwide voice and data communication networks, airport systems and integrations, and air traffic management solutions. Collins supports government and defense customer missions by providing systems solutions for connected battlespace, test and training range systems, crew escape systems, and simulation and training.

Collins sells aerospace and defense products and services to aircraft manufacturers, airlines, airports and other aircraft operators, the U.S. and foreign governments, defense contractors, maintenance, repair, and overhaul providers, and independent distributors around the world. Collins’ largest commercial customers are Boeing and Airbus with combined sales, prior to discounts and incentives, of 16%, 16%, and 19% of total Collins segment sales in 2025, 2024, and 2023, respectively.

In 2025, Collins was awarded a contract to deliver satellite communication systems to support survivable communications across multiple frequency bands. Collins was also awarded a contract by the Federal Aviation Administration (FAA) to support the Radar System Replacement program as part of the Department of Transportation’s Brand New Air Traffic Control System. Collins was selected to be the primary subcontractor for the U.S. Navy’s solution for engineering design and manufacturing of the Very Low Frequency communication subsystem, as well as mission command, control, and communications infrastructure, Advanced Extremely High Frequency and voice communications. In addition, Collins was awarded a follow-on contract from the FAA to continue support of the Standard Terminal Automation Replacement System (STARS) which is used to manage aircraft spacing and sequencing on approach. Collins secured over \$4 billion in combined long-term agreements to provide new maintenance, repair and overhaul services, and long-term contracts to provide spare parts, for several airlines. Finally, Collins was selected by the European Union’s Clean Aviation Joint Undertaking (Clean Aviation) to collaborate with Pratt & Whitney Canada as well as other consortium members on multiple development projects aimed at increasing fuel efficiency for next-generation regional aircraft, most notably the Powerplant Hybrid Applications Regional Segment (PHARES) project. As part of the PHARES project, Pratt & Whitney Canada will lead the development of a hybrid-electric PW127XT-derivative engine, incorporating a Collins 250kW motor and integrated power controller. Collins will also develop an advanced propeller system for improved fuel efficiency and reduced noise for such engine as part of PHARES.

Collins continues to invest in sustainable technologies, such as electrical power architectures, advanced composite materials, digital trajectory optimizers, highly efficient cooling systems, and numerous other technologies that provide lower weight, improved drag, and carbon footprint solutions on aircraft. Collins is also investing in higher efficiency build processes, that reduce chemical and power usage and increase the use of recycling. Collins' thermoplastic and carbon structural technologies support optimization of the design of aircraft components and equipment to minimize weight, maximize energy efficiency, reduce fuel burn, and extend brake life. Collins works closely with numerous other industry organizations and airframers to explore alternative energy solutions such as sustainable aviation fuel, hydrogen, and hybrid electric power sources. Collins also continues to invest in operational capacity in strategic locations in the United States (including Puerto Rico), India, Mexico, Singapore, and the Philippines.

Pratt & Whitney is among the world's leading suppliers of aircraft engines for commercial, military, business jet, and general aviation customers. Pratt & Whitney designs, manufactures, and services large engines for widebody, narrowbody, and large regional aircraft for commercial customers and for fighter, bomber, tanker, and transport aircraft for military customers. Pratt & Whitney also designs, manufactures, and services small engines powering regional airlines, general and business aviation, and helicopters. Pratt & Whitney produces, sells, and services military and commercial auxiliary power units. Pratt & Whitney provides fleet management services and aftermarket maintenance, repair, and overhaul services in all of these product segments.

Pratt & Whitney sells products and services principally to aircraft manufacturers, airlines and other aircraft operators, aircraft leasing companies, and the U.S. and foreign governments. Pratt & Whitney's largest commercial customer by sales is Airbus, with sales, prior to discounts and incentives, of 29%, 31%, and 48% of total Pratt & Whitney segment sales in 2025, 2024, and 2023, respectively.

Pratt & Whitney produces and services the PW1000G Geared Turbofan (GTF) engine family. GTF engine models have demonstrated a significant reduction in fuel burn and noise levels and lower environmental emissions compared to prior-generation engines. The GTF aftermarket network expanded to 21 facilities worldwide, increasing PW1000G-JM shop visit output by approximately 26% year over year in 2025.

The GTF family now powers more than 2,600 aircraft for over 90 operators across three aircraft platforms: Airbus A320neo family, Airbus A220, and Embraer E-Jets E2. In 2025, the GTF Advantage engine received FAA and European Union Safety Agency (EASA) certification for the Airbus A320 neo family and is expected to extend the benefits of the current GTF engine, increasing takeoff thrust by 4 to 8 percent and reducing fuel consumption by up to an additional 1 percent, maintaining the engine's lead as the most efficient powerplant for the A320neo family.

Pratt & Whitney produces and sustains the F135 engine for the U.S. government's F-35 Joint Program Office to exclusively power the single-engine F-35 Lightning II fifth generation aircraft (commonly known as the Joint Strike Fighter) produced by Lockheed Martin. F135 propulsion system configurations are used for the U.S. Air Force's F-35A, the U.S. Marine Corps' F-35B, and the U.S. Navy's F-35C jets. F135 engines are also used on all F-35 aircraft purchased by Joint Strike Fighter partner countries and other countries through foreign military sales arrangements. In 2025, Pratt & Whitney's F135 engine surpassed one million engine flight hours, and the company was awarded a \$2.8 billion undefinitized contract action (UCA) for production of Lot 18 and Lot 19 long lead funding for the F135 engines to power all three variants of the F-35 Lightning II aircraft. Additionally, Pratt & Whitney continued design maturation and aircraft integration efforts for the F135 Engine Core Upgrade (ECU).

Significant activity continued on Pratt & Whitney's military engine development programs, including the Next Generation Adaptive Propulsion (NGAP) program. In early 2025, Pratt & Whitney completed the Detailed Design Review of its XA103 engine for the U.S. Air Force's NGAP, allowing it to begin procurement of hardware for the construction of the prototype ground demonstrator. Most recently, Pratt & Whitney announced accelerated XA103 engine development through the use of digital data packages, and continued progress toward the next major program milestone. Meanwhile, the B-21 Raider, which is powered by Pratt & Whitney engines, continued to progress its flight test program.

In 2025, Pratt & Whitney Canada was selected by the European Union's Clean Aviation to lead the PHARES project, marking the first time a Canadian company will participate in and lead a Clean Aviation program. As part of the PHARES consortium, Pratt & Whitney Canada will collaborate with Collins, ATR, Airbus, and technology research organizations to design and integrate a hybrid-electric propulsion demonstrator, targeting up to 20% improved fuel efficiency on regional aircraft missions. Finally, in 2025, Pratt & Whitney Canada's PT6 E-Series™ engine family surpassed 500,000 engine flight hours since entering service.

The development of new engines and improvements to current production engines present important growth opportunities for Pratt & Whitney. In view of the risks and costs associated with developing new engines, Pratt & Whitney has entered into collaboration arrangements in which revenues, costs, and risks are shared with third parties. At December 31, 2025, the interests of third-party collaboration participants in Pratt & Whitney-directed jet engine programs ranged, in the aggregate per

program, from 13% to 49%. See “Note 1: Basis of Presentation and Summary of Accounting Principles” within Item 8 of this Form 10-K for a description of our accounting for collaboration arrangements. Pratt & Whitney also continues to enhance its programs through performance improvement measures and product base expansion, utilizing similar collaboration arrangements.

Raytheon is a leading provider of defensive and offensive threat detection, tracking and mitigation capabilities for U.S. and foreign government and commercial customers. Raytheon designs, develops, and provides advanced capabilities in integrated air and missile defense, smart weapons, missiles, advanced sensors and radars, interceptors, space-based systems, hypersonics, and missile defense across land, air, sea, and space. Raytheon provides air-to-air and air-to-ground sensors, command and control and weapons including the Advanced Medium Range Air-to-Air Missile (AMRAAM), StormBreaker smart weapon, Long Range Stand Off Weapon (LRSO), and the Early Warning Radar. Raytheon also provides advanced naval sensors, command and control and weapons including classified naval radars, the Next Generation Jammer (NGJ), shipboard missiles including the Tomahawk and Standard Missile 6 (SM-6), air-to-air missiles such as the AIM-9X SIDEWINDER missile, and integrated systems such as the SPY-6 radar. In addition, Raytheon provides advanced systems and products that span layered land and integrated air and missile defense, including the Patriot air and missile defense system, the Lower Tier Air and Missile Defense Sensor (LTAMDS), the National Advanced Surface-to-Air Missile System (NASAMS), Javelin, Excalibur, Stinger, and High-Energy Lasers. Raytheon also provides technologically advanced sensors, satellites, and interceptors, including the AN/TPY-2 radar, and Standard Missile 3 (SM-3). Raytheon delivers integrated space solutions including sensors, mission orchestration, satellite control, and software. Raytheon also focuses on the development and early introduction of next-generation technologies and systems, including hypersonics, counter-hypersonics, next-generation radars, sensor experimentation, and electro-optical/infrared (EO/IR) advancements, and aligns products that use shared technologies, including fire control radars, surveillance radars, EO/IR, space-qualified satellite components, and electronics.

Raytheon serves as a prime contractor or major subcontractor on numerous programs with the U.S. Department of War (DoW) (formerly referred to as the U.S. Department of Defense), including the U.S. Navy, U.S. Army, Missile Defense Agency, U.S. Air Force, and U.S. Space Force, as well as programs with U.S. federal civil customers, and other international and classified customers.

In 2025, Raytheon achieved key advancements in, or received contract awards for, the following programs: Patriot, LTAMDS, SM-3, AIM-9X, AMRAAM, Tomahawk, and certain advanced technologies, including classified programs and advanced development programs. Major new contracts awarded in 2025 include contracts to provide AMRAAM missiles to the U.S. Navy, U.S. Air Force and international customers; Guidance Enhanced Missiles (GEM-T) for the North Atlantic Treaty Organization (NATO) Support and Procurement Agency (NSPA) and an international customer; low-rate initial production of LTAMDS for the U.S. Army and Poland; Iron Dome Tamir production for an international customer; AIM-9X Sidewinder short-range air-to-air missiles for the U.S. Navy, U.S. Air Force, and international customers; SM-3 exoatmospheric missile defense interceptors to the Missile Defense Agency; AN/SPY-6 radars for the U.S. Navy; NASAMS to an international customer; Stinger missiles to the U.S. Army and an international customer; Next Generation Jammer Mid-Band (NGJ-MB) for the U.S. Navy and the Royal Australian Air Force; and Javelin guided munition for the U.S. Army and international customers. In 2025, Raytheon also continued to experience increased global demand for the combat-proven Coyote system, a low-cost, expendable, unmanned aircraft system with the capability of operating in autonomous swarms.

Sales and Customers

We have substantial U.S. government sales, which we conduct through all three of our business segments. In addition, as a global company, all three of our business segments have substantial international sales. See “Note 20: Segment Financial Data” within Item 8 of this Form 10-K for additional information.

U.S. Government Sales. Our U.S. government sales were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Sales to the U.S. government ⁽¹⁾	\$ 33,279	\$ 32,246	\$ 31,628
Sales to the U.S. government as a percentage of total net sales ^{(1) (2)}	38 %	40 %	46 %

(1) Excludes foreign military sales through the U.S. government.

(2) 2023 total net sales includes the reduction in sales from the Powder Metal Matter.

International Sales. Our sales to international customers were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Total international sales	\$ 41,312	\$ 34,651	\$ 29,440
Total international sales as a percentage of total net sales ⁽¹⁾	47 %	43 %	43 %

(1) 2023 total net sales includes the reduction in sales from the Powder Metal Matter.

Backlog. Backlog, which is equivalent to our remaining performance obligations (RPO) for our sales contracts, represents the aggregate dollar value of firm orders for which products have not been provided or service has not been performed and excludes unexercised contract options and potential orders under ordering-type contracts (e.g., indefinite-delivery, indefinite-quantity (IDIQ) type contracts).

Total backlog was \$268 billion and \$218 billion as of December 31, 2025 and 2024, respectively. Of the total RPO as of December 31, 2025, we expect approximately 25% will be recognized as revenue over the next 12 months.

Competition

All of our businesses are subject to significant competition. Our businesses compete on a variety of factors such as price, delivery schedule, past performance, reliability, customer service, innovation, and technology. Many of our competitors have substantial financial resources and significant technological capabilities. Further, some non-U.S. competitors receive government research and development assistance, marketing subsidies, and other assistance for their products beyond the assistance that may be available to us as a U.S. company.

Our aerospace businesses compete with numerous U.S. and foreign businesses that obtain regulatory agency approval to manufacture products and spare parts. Customer selections of aircraft engines, components, and systems can also have a significant impact on future sales of parts and services. In addition, customers (including the U.S. government and other governments) may purchase parts from suppliers other than the original equipment manufacturer, which affects spare parts sales. Some competitors may offer substantial discounts and other financial incentives, performance and operating cost guarantees, and participation in financing arrangements in an effort to compete for the aftermarket associated with these products.

Our defense businesses compete with numerous U.S. and foreign companies in most defense and government electronics, space, effectors, communications, command and control, technical services and support, and other segments. We frequently partner on defense programs with our major suppliers, some of whom are, from time to time, competitors on other programs. In addition, the competitive landscape in the defense industry continues to evolve with trends such as the continued increase in commercial competitors, new entrants with different technology approaches and business models, governmental bid evaluation processes requesting expanded intellectual property disclosures and rights sharing that may risk the loss of competitively sensitive information, and increased government, particularly foreign government, sponsorship of competitors on defense development programs. Moreover, our potential international contract awards, particularly for sales of defense products and services, may be limited by our ability to agree to offset obligations or industrial cooperation obligations, sometimes in the form of in-country industrial participation (ICIP) agreements, designed to enhance local industry.

People

As a global technology and innovation-driven company, we depend on a highly skilled workforce. Attracting, developing, advancing, and retaining the best talent while promoting trust, accountability and shared purpose, is critical for us to execute our strategy and grow our business. Individuals with technical, engineering, and science backgrounds, experience, or interests are particularly important for us to succeed in the industries in which we compete. In addition, our defense business in particular requires qualified personnel with security clearances due to our classified programs. Macroeconomic, industry, and labor market conditions continue to affect the environment for hiring and retaining employees with relevant qualifications and experience. While competition for talent has softened, we continue to experience challenges hiring highly qualified personnel for some of our most critical roles and in specific locations. We continuously monitor labor market conditions and trends to mitigate hiring and retention issues.

Governance. The Human Capital & Compensation Committee of the RTX Board of Directors oversees the Company's human capital management.

Workforce Demographics. As of December 31, 2025, our global employee population consisted of a total of approximately 180,000 employees, including approximately 54,000 engineering professionals and approximately 32,000 employees represented by labor unions and other employee representative bodies. Our employees were located in 52 countries, with 69% of our employees located in the U.S.

Talent Acquisition, Development, and Retention; Employee Health and Safety. We continuously monitor the hiring, retention, and management of our employees by business and function with a focus to attract, develop, engage, advance, and retain the best talent in the industry. We aim to identify and hire quality external talent with skills matched to our Company's business needs. We invest in our workforce through internal and external education, training and development programs, and tuition assistance benefits. We also provide competitive compensation and benefits. We recognize and reward performance during our annual review process. We regularly conduct talent reviews and develop succession plans to ensure that we continue to cultivate the leadership pipeline of talent needed to execute our business strategy. We solicit employee feedback on RTX's performance as an employer via surveys in the pre-hire, active, and exit stages of employment, and use those results to improve our workplace and employee experience. These surveys cover various topics related to employee engagement and culture.

We have industry-leading health and safety programs to help maintain a safe work environment for all employees and mitigate workplace incidents, risks, and hazards. We review and monitor our performance and encourage employee input to identify opportunities to reduce incidents. Moreover, we have industry-leading ethics and compliance programs to help mitigate associated employee risks. We also provide health and wellness benefits and support flexible work arrangements for our employees.

For information on the risks related to our human capital resources, see Item 1A. “Risk Factors” of this Form 10-K.

Research and Development and Operations

Our innovative products and services incorporate advanced technologies. As a result, we invest substantial amounts in research and development activities using our own funds and under contractual arrangements with our customers, to enhance existing products and services and develop future technologies to meet our customers’ changing needs and requirements, as well as to address new business opportunities.

We manufacture and service our products in approximately 225 manufacturing, production, or overhaul facilities in approximately 25 countries, including the U.S.

Intellectual Property

We maintain a robust portfolio of patents, trademarks, copyrights, trade secrets, licenses, and franchises related to our businesses. We rely on a combination of these rights, along with nondisclosure agreements, information technology (IT) security systems, internal controls and compliance systems, and other measures to protect our intellectual property. The U.S. government and foreign governments have licenses to certain of our intellectual property, including certain patents, which are developed or used in the performance of government contracts. Commercial customers also have licenses to certain of our intellectual property largely in connection with the sale of our products. While our intellectual property rights in the aggregate are important to the operation of each of our businesses, we do not believe that our business would be materially affected by the expiration of any particular intellectual property right or termination of any particular intellectual property patent license agreement.

Suppliers and Raw Materials

We are dependent on a global supply chain for a wide range of raw materials, commodities, components, and services. Some of our products require relatively scarce raw materials. In some instances, we depend upon a single source of supply or participate in commodity markets that may be subject to allocations of limited supplies by suppliers. In addition, in some cases, we must comply with specific procurement requirements, which may limit the suppliers and subcontractors we may utilize. We are largely dependent upon foreign sources for certain raw materials, such as cobalt, tantalum, chromium, rhenium, nickel, and titanium, and we rely on foreign suppliers as single-source suppliers of some components.

In recent years, we have experienced supply chain disruptions that have impacted our ability to procure raw materials, including certain rare earth elements, microelectronics, and certain commodities, resulting in delays and increased costs. These disruptions have been driven by supply chain market constraints and macroeconomic conditions, including inflation and labor market shortages. The high inflationary environment has increased material and component prices, labor rates and supplier costs, which has negatively impacted our costs. Current geopolitical conditions, including conflicts and other causes of strained intercountry relations, as well as sanctions and other trade restrictive activities, such as tariffs and export controls, are continuing to contribute to these supply chain issues.

We have implemented certain actions and programs which have mitigated some of the impacts, but we anticipate that supply chain disruptions will continue. We work with our suppliers and subcontractors to assess and address the causes of performance failures and delays, including by providing suppliers with raw materials and technical support. We have arranged second and third supply source alternatives in some cases and have increased our materials and parts inventory. We regularly pursue cost reductions through a number of mechanisms, including consolidating or re-sourcing our purchases, expanding the use of long-term agreements, reducing the number of suppliers generally (except as described above for important supply alternatives), strategic sourcing in cost competitive regions, capitalizing on competitions among suppliers and other low-cost sourcing initiatives, and extending our contractually negotiated raw material pricing to higher-tier suppliers in our supply chain. For additional information related to supply chain issues, see Item 1A. “Risk Factors” of this Form 10-K.

Other Matters Relating to Our Business

As worldwide businesses, our operations can be affected by a variety of economic, industry, and other factors, including those described in this section, in Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” in “Cautionary Note Concerning Factors That May Affect Future Results and Risk Factor Summary,” and in Item 1A. “Risk Factors” of this Form 10-K.

Regulatory Matters

Our businesses are subject to extensive regulation in the industries we serve. We deal with numerous U.S. government agencies and entities, including but not limited to all of the branches of the DoW and the FAA. Similar government authorities exist in all of the countries in which we do business.

U.S. Government Contracts. The U.S. government is our largest customer, representing a substantial majority of our total defense sales. Our U.S. government contracts generally are subject to the Federal Acquisition Regulation (FAR), which sets forth policies, procedures, and requirements for the acquisition of goods and services by the U.S. government; department-specific regulations that implement or supplement the FAR, such as the DoW's Defense Federal Acquisition Regulation Supplement (DFARS); and other applicable laws and regulations. These regulations provide the U.S. government with various rights, including a broad right to unilaterally terminate contracts for convenience. These regulations further impose a broad range of requirements, many of which are unique to government contracting, including various procurement, import and export, security, contract pricing and cost, contract termination and adjustment, audit, and product integrity requirements. A contractor's failure to comply with these regulations and requirements could result in reductions to the value of contracts, contract modifications or termination, cash withholds on contract payments, forfeiture of profits, and/or the assessment of civil or criminal penalties and fines, and could lead to suspension or debarment, for cause, from U.S. government contracting or subcontracting for a period of time. In addition, in order to support U.S. government priorities, we may begin performance on an undefinitized contract action prior to completing contract negotiations on the terms, specifications, or price between the parties. The U.S. government has the ability to unilaterally definitize contracts, which would obligate us to perform under terms and conditions imposed by the U.S. government without our agreement.

For further discussion of risks related to government contracting, including on-going litigation associated with U.S. government audits and investigations, see Item 1A. "Risk Factors" and Item 3. "Legal Proceedings" of this Form 10-K and "Note 17: Commitments and Contingencies" within Item 8 of this Form 10-K.

Commercial Aerospace Product Regulation. Our commercial aerospace products are subject to regulations by the FAA, foreign aviation administration authorities, and international regulatory bodies, including on production and quality systems, airworthiness and installation approvals, repair procedures, and continuing operational safety. In addition, commercial aerospace regulations and regulator approaches differ across jurisdictions and changes in such regulations and implementing legislation can impact our operations.

Global Trade Regulation. We must comply with various laws and regulations relating to the export and import of products, services, and technology from and into the U.S. and other countries having jurisdiction over our operations. In the U.S., these laws and regulations include, among others, the Export Administration Regulations (EAR) administered by the U.S. Department of Commerce, the International Traffic in Arms Regulations (ITAR) and the Arms Export Control Act (AECA) provisions administered by the U.S. Department of State (DOS), embargoes and sanctions regulations administered by the U.S. Department of the Treasury, and import regulations administered by the U.S. Department of Homeland Security and the U.S. Department of Justice (DOJ). Certain of our products, services, and technologies have military or strategic applications and are on the U.S. Munitions List of the ITAR, the Commerce Control List of the EAR, or are otherwise subject to the EAR and/or the U.S. Munitions Import List, and we are required to obtain licenses and authorizations from the appropriate U.S. government agencies before exporting these products out of the U.S. or importing these products into the U.S. Foreign policy of the U.S. or other licensing jurisdictions may affect the licensing process or otherwise prevent us from engaging in business dealings with certain individuals, entities, or countries. Any failure by us, our customers, or our suppliers to comply with these laws and regulations could result in civil or criminal penalties, fines, seizure of our products, adverse publicity, restrictions on our ability to engage in export or import transactions, or the suspension or debarment from doing business with the U.S. government.

For further discussion of risks related to exports and imports, see Item 1A. "Risk Factors".

Compliance Matters. As previously disclosed, on October 15, 2024, Raytheon Company entered into a deferred prosecution agreement (DPA) (DPA-1) with the DOJ and on October 16, 2024, the Company became subject to an administrative order issued by the Securities and Exchange Commission (SEC) (the SEC Administrative Order) to resolve the previously disclosed criminal and civil government investigations into payments made by Raytheon Company and its joint venture, Thales-Raytheon Systems (TRS), since 2012 in connection with certain Middle East contracts. On October 16, 2024, Raytheon Company also entered into a DPA (DPA-2) and a False Claims Act (FCA) settlement agreement with the DOJ to resolve previously disclosed criminal and civil government investigations into defective pricing claims for certain legacy Raytheon Company contracts entered into between 2011 and 2013 and in 2017. Under DPA-1, DPA-2, and the SEC Administrative Order, Raytheon Company and the Company are required to undertake certain cooperation and disclosure obligations (for a term commencing on the effective date of DPA-1 and the SEC Administrative Order, as applicable, and ending three years from the date on which Raytheon Company and the Company engage an independent compliance monitor satisfactory to the DOJ and SEC). A single independent compliance monitor was selected to oversee Raytheon Company's and the Company's compliance with their

respective obligations under DPA-1, DPA-2, and the SEC Administrative Order, and that monitor is expected to be in place by the end of the first quarter. DPA-1 and DPA-2 further provide that, in the event the DOJ, in its sole discretion, determines during the period of deferral of prosecution that Raytheon Company or the Company have violated any provision of either DPA, Raytheon Company or the Company may be subject to prosecution for any federal criminal violation, including the charges against Raytheon Company in the relevant DPA. The SEC Administrative Order further provides that, in the event of a breach of the agreement with the SEC, the SEC may vacate the Administrative Order and institute proceedings against the Company. In the event of any such determination of breach, the Company may face additional adverse impacts.

Also as previously disclosed, on August 29, 2024, the Company entered into a Consent Agreement (CA) with the DOS to resolve alleged civil violations of the AECA and the ITAR. The CA, which has a three-year term, requires the Company to implement remedial compliance measures and to conduct an external audit of the Company's ITAR compliance program. The CA also requires appointment of an external independent Special Compliance Officer (SCO). The Company appointed its SCO on September 27, 2024. If the Company is unable to satisfy the requirements of the CA within three years as determined by the DOS, it may face a continuation of the CA, additional fines, or other adverse impacts.

For further discussion of DPA-1, DPA-2, the SEC Administrative Order, and the CA, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations," Item 1A. "Risk Factors," and "Note 17: Commitments and Contingencies" within Item 8 of this Form 10-K.

Environmental Regulation. Our operations are subject to and affected by environmental regulation by federal, state, and local authorities in the U.S. and regulatory authorities with jurisdiction over our international operations, including with respect to chemical substances in our products, manufacturing processes, and the operation of our facilities, as well as the generation, treatment, storage, disposal, and remediation of hazardous substances and wastes. We use hazardous substances and generate hazardous wastes in some of our operations and have incurred, and will likely continue to incur, costs associated with environmental compliance activities and management of remediation matters at sites with pollutants. A portion of these costs are eligible for future recovery through the pricing of our products and services under our contracts with the U.S. government. In addition, we have been identified as a potentially responsible party under the Comprehensive Environmental Response Compensation and Liability Act, also known as the Superfund law, or state law counterparts to the Superfund law, for a number of sites. The nature and extent of environmental concerns vary from site to site and our share of responsibility varies from sole responsibility to very little responsibility. We also manage various government-owned facilities on behalf of the U.S. government. At such facilities, environmental compliance and remediation costs have historically been primarily the responsibility of the U.S. government, and we have relied upon U.S. government funding to pay such costs. We do not anticipate that compliance with current provisions or requirements relating to the protection of the environment or that any payments we may be required to make for cleanup liabilities will have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity. Environmental matters are further addressed in "Note 1: Basis of Presentation and Summary of Accounting Principles" and "Note 17: Commitments and Contingencies" within Item 8 of this Form 10-K.

Most of the U.S. laws governing environmental matters include criminal provisions. If we were convicted of a violation of the federal Clean Air Act or Clean Water Act, the facility or facilities involved in the violation could be deemed ineligible to be used in performing any U.S. government contract we are awarded until the Environmental Protection Agency (EPA) thereafter certifies that the condition giving rise to the violation has been corrected.

In addition, we could be affected by future foreign or domestic laws or regulations imposed in response to concerns over climate change, and we monitor developments in environmental and climate-related laws and regulations and their potential impact to our business and financial condition. Changes in environmental and climate-related laws or regulations, including regulations on greenhouse gas emissions, carbon pricing, energy taxes, product efficiency standards, global chemical regulations, and mandatory disclosure obligations could lead to new or additional investment in product designs and facility upgrades and could increase our operational and environmental compliance expenditures, including increased energy and raw materials costs and costs associated with manufacturing changes.

For further discussion of risks related to environmental and climate matters and other government regulations, see Item 1A. "Risk Factors" of this Form 10-K.

Other Applicable Regulations. We conduct our businesses through subsidiaries and affiliates worldwide. As a result, our businesses and operations are subject to both U.S. and non-U.S. government laws, regulations, and procurement policies and practices, including regulations relating to tariffs, taxes, investment, sanctions, exchange controls, anti-corruption, privacy, and cash repatriation. Our international sales are also subject to varying currency, political, and economic risks.

Cautionary Note Concerning Factors That May Affect Future Results

This Form 10-K contains statements which, to the extent they are not statements of historical or present fact, constitute “forward-looking statements” under the securities laws. These forward-looking statements are intended to provide management’s current expectations or plans for our future operating and financial performance, based on assumptions currently believed to be valid, and are not statements of historical fact. Forward-looking statements can be identified by the use of words such as “believe,” “expect,” “expectations,” “plans,” “strategy,” “prospects,” “estimate,” “project,” “target,” “commit,” “commitment,” “anticipate,” “will,” “should,” “see,” “guidance,” “outlook,” “goals,” “objectives,” “confident,” “on track,” “designed to,” and other words of similar meaning. Forward-looking statements may include, among other things, statements relating to future sales, earnings, cash flow, results of operations, uses of cash, share repurchases, tax payments and rates, research and development spending, cost savings, other measures of financial performance, potential future plans, strategies or transactions, credit ratings and net indebtedness, the Powder Metal Matter and related matters and activities, including without limitation other engine models that may be impacted, targets and commitments (including for share repurchases or otherwise), and other statements which are not solely historical facts. All forward-looking statements involve risks, uncertainties, changes in circumstances, and other factors that are hard to predict, and each of which may cause actual results to differ materially from those expressed or implied in the forward-looking statements. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the U.S. Private Securities Litigation Reform Act of 1995, as amended. Such risks, uncertainties, and other factors include, without limitation:

- changes in economic, capital market, and political conditions in the U.S. and globally;
- changes in U.S. government defense spending, national priorities, and policy positions;
- our performance on our contracts and programs, including our ability to control costs, and our dependence on U.S. government approvals for certain international contracts;
- challenges in the development, certification, production, delivery, support, and performance of RTX’s advanced technologies and new products and services and the realization of anticipated benefits;
- the challenges of operating in RTX’s highly-competitive industries both domestically and abroad;
- our reliance on U.S. and non-U.S. suppliers and commodity markets, including cost increases and disruptions in the delivery of materials and services to RTX or our suppliers;
- changes in trade policies, implementation of sanctions, imposition of tariffs (and counter-tariffs), and other trade measures and restrictions, foreign currency fluctuations, and sales methods;
- the economic condition of the aerospace industry;
- the ability of RTX to attract, train, qualify, and retain qualified personnel and maintain its culture and high ethical standards, and the ability of our personnel to continue to operate our facilities and businesses around the world;
- the scope, nature, timing, and challenges of managing and completing acquisitions, investments, divestitures, and other transactions;
- compliance with legal, environmental, regulatory, and other requirements in the U.S. and other countries in which RTX and its businesses operate;
- pending, threatened, and future legal proceedings, investigations, audits, and other contingencies;
- the Deferred Prosecution Agreements, SEC Administrative Order, the Consent Agreement; and the related investigations by the SEC and the DOJ;
- RTX’s ability to engage in desirable capital-raising or strategic transactions;
- repurchases by RTX of its common stock, or declarations of cash dividends, which may be discontinued, accelerated, suspended, or delayed at any time due to various factors;
- realizing expected benefits from, incurring costs for, and successfully managing strategic initiatives such as cost reduction, restructuring, digital transformation, and other operational initiatives;
- additional tax exposures due to new tax legislation or other developments in the U.S. and other countries in which RTX and its businesses operate;
- the Powder Metal Matter;
- changes in production volumes of one or more of our significant customers as a result of business, labor, or other challenges, and the resulting effect on its or their demand for our products and services;
- an RTX product safety failure, quality issue, or other failure affecting RTX’s or its customers’ or suppliers’ products or systems;
- cybersecurity, including cyber-attacks on RTX’s information technology (IT) infrastructure, products, suppliers, customers and partners, and cybersecurity-related regulations;
- insufficient indemnity or insurance coverage;
- our intellectual property and certain third-party intellectual property;
- threats to RTX facilities and personnel, or those of its suppliers or customers, as well as public health crises, damaging weather, acts of nature, or other similar events outside of RTX’s control that may affect RTX or its suppliers or customers;

- changes in accounting estimates for our programs on our financial results;
- changes in pension and other postretirement plan estimates and assumptions and contributions;
- an impairment of goodwill and other intangible assets; and
- climate change and climate-related regulations, and any related customer and market demands, products and technologies.

In addition, this Form 10-K includes important information as to risks, uncertainties, and other factors that may cause actual results to differ materially from those expressed or implied in the forward-looking statements. The forward-looking statements speak only as of the date of this report or, in the case of any document incorporated by reference, the date of that document. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by applicable law. Additional information as to factors that may cause actual results to differ materially from those expressed or implied in the forward-looking statements is disclosed from time to time in our other filings with the SEC.

ITEM 1A. RISK FACTORS

Our business, operating results, financial condition, and liquidity can be impacted by the factors set forth below, any one of which could cause our actual results to vary materially from recent results or from our anticipated future results.

INDUSTRY RISKS

Changes in U.S. government defense spending could negatively impact our financial position, results of operations, liquidity, and overall business. U.S. government sales constitute a significant portion of our consolidated sales. Our U.S. government revenues largely result from contracts awarded under various U.S. government programs, primarily defense-related programs with the U.S. Department of War (DoW) (formerly referred to as the U.S. Department of Defense), and a broad range of programs with other departments and agencies. Changes in U.S. government defense spending for various reasons, including as a result of potential changes in policy or budgetary positions or priorities, could negatively impact our results of operations, financial condition, and liquidity. Our programs and contracts are subject to U.S. government policies, budget decisions, and appropriation processes, which are driven by numerous factors including U.S. domestic and broader geopolitical events, macroeconomic conditions, and the ability of the U.S. government to enact relevant legislation, such as appropriations bills. In recent years, U.S. government appropriations have been affected by larger U.S. government budgetary issues and related legislation, and the U.S. government has been unable to complete its budget process before the end of its fiscal year, resulting in both governmental shutdowns and continuing resolutions providing only enough funds for U.S. government agencies to continue operating at prior-year levels. Our business, program performance, and results of operations could be impacted by the resulting disruptions to federal government offices, workers, and operations, including risks relating to the funding of certain programs or contracts, stop work orders, as well as delays in contract awards, new program starts, payments for work performed, and other actions. As a result, U.S. government defense spending levels are subject to a wide range of outcomes and are difficult to predict beyond the near-term due to numerous factors, including the external threat environment, future governmental priorities, and the state of governmental finances. Significant changes in U.S. government defense spending or changes in U.S. government priorities, policies, and requirements could have a material adverse effect on our results of operations, financial condition, and liquidity.

We face risks relating to our U.S. government contracts and programs, including the mix of our U.S. government contracts and programs, our performance, and our ability to control costs. The termination of one or more of our U.S. government contracts, or the occurrence of performance delays, cost overruns, product failures, shortages in materials, components, or labor, contract definitization delays, or other failures to perform to customer expectations and contract requirements, could negatively impact our reputation and competitive position, results of operations, financial condition, and liquidity. U.S. government contracts with prime contractors generally permit the government to terminate the contract, in whole or in part, without prior notice, at the U.S. government's convenience or for default based on performance. If one of our contracts is terminated for convenience, we would generally be entitled to payments for our allowable costs incurred, termination costs, and would receive some allowance for profit on the work performed. If one of our contracts is terminated for default, we would generally be entitled to payments for work accepted by the U.S. government. A termination arising out of our default could expose us to liability and have a negative impact on our ability to obtain future contracts and orders. In addition, we are a subcontractor on some programs, and the U.S. government could terminate the prime contract for convenience or otherwise, without regard to our performance as a subcontractor. We may not be able to offset lost revenues resulting from contract termination. Moreover, because the funding of U.S. government programs is subject to congressional appropriations made on a fiscal year basis even for multi-year programs, programs are often only partially funded initially and may not continue to be funded in future years. Appropriation bills may be delayed, which may result in delays to funding, the collection of receivables, and our contract performance due to lack of authorized funds to procure related products and services. The timing of contract definitization can be affected by factors specific to the U.S. government, including staffing limitations. Under certain circumstances, we may use our own funds to meet our customer's desired delivery dates or other requirements, but we may not be reimbursed. Further, if appropriations for one of our programs become unavailable, reduced, or delayed, the U.S. government may terminate for convenience our contract or subcontract under that program. In addition, our U.S. government contracts typically involve the development, application, and manufacture of advanced defense and technology systems and products aimed at achieving challenging goals. As a result of untested or unproven technologies, or modified requirements or specifications, we may experience technological and other performance difficulties (including delays, setbacks, cost overruns, or product failures), our attention or resources may be diverted from other projects, and our future sales opportunities may be impacted. Additionally, as our customers demand more mature solutions, we may be required to invest in development prior to contract award with no guarantee of award.

Our profitability could be negatively affected based on the mix of our U.S. government contracts and programs and the costs incurred of performing the work, especially if we are unable to control costs or if our initial cost estimates are incorrect, particularly under fixed-price development contracts. Our U.S. government contracts are typically either fixed-priced contracts or cost reimbursement contracts. Fixed-price contracts are predominantly either firm fixed-price (FFP) contracts or fixed-price

incentive (FPI) contracts. Under FFP contracts, we receive a fixed price irrespective of the actual costs we incur, and we therefore carry the burden of any cost overruns. Under FPI contracts, we generally share with the U.S. government savings for cost underruns less than target costs and expenses for cost overruns exceeding target costs up to a negotiated ceiling price. We carry the entire burden of cost overruns exceeding the ceiling price amount under FPI contracts, which may result in a cumulative adjustment in the period our estimates change. Under cost reimbursable contracts, we are reimbursed for allowable costs and are typically paid a fixed or performance-based fee, but we are generally not reimbursed for unauthorized costs exceeding a cost ceiling amount or costs not allowable under the contract or applicable regulations. Excess costs on cost reimbursable contracts could also result in lower profit rates. We may incur unexpected costs for various reasons, including technical and manufacturing challenges, schedule delays, the timeliness and availability of materials, components, or labor, the inaccuracy of initial contract cost estimates, internal and subcontractor performance or product quality issues, inability to achieve expected cost reduction, digital transformation, manufacturing, operating, and other strategic initiatives, inflation, inability to pass on tariff costs, and changing laws or regulations, natural disasters, and public health crises. We may also experience cost underruns which would reduce contract value and related expected revenues, and we may be unable to expand the contract scope or secure additional work to offset the resulting lost revenues. While contracts for development programs with complex design and technical challenges are often cost reimbursable, they can be FFP or FPI, which can significantly increase our risk of a potential negative profit adjustment, as development contracts by nature involve elements that have not been undertaken before and, thus, are highly subject to future unexpected cost growth. In addition, other contracts in backlog are for the transition from development to production, which includes starting and stabilizing a manufacturing and test line while the final design is still being validated. Moreover, over the past several years, the DoW has increased its use of Other Transaction Authority (OTA) agreements, under which it awards certain prototypes, research, and production contracts without all of the procurement requirements that typically apply to DoW contracts, including justification of sole source awards. OTAs may use fixed-price contracting during all phases of the contract, or mandated contract cost sharing. They may also require non-traditional subcontractor participation and impose other requirements that differ from our other DoW contracts. Our business may be negatively impacted if we are unable to bid for OTA work and/or perform on our OTA agreements, including any applicable non-traditional requirements. In addition, in order to support U.S. government priorities, we may begin performance on an undefinitized contract action with a not-to-exceed price before completing contract negotiations on the terms, specifications, or price between the parties. The U.S. government has the ability to unilaterally definitize contracts, which would obligate us to perform under terms and conditions imposed by the U.S. government without our agreement. Uncertainties in final contract price, specifications and terms, or loss of negotiating leverage associated with particularly long delays in contract definitization may negatively affect our profitability. Our U.S. government contracts also require us to comply with extensive and evolving procurement laws, rules and regulations and subject us to potential U.S. government surveillance, audits, investigations, and disputes. We are also involved in programs that are classified by the U.S. government, which have security requirements that place limits on our ability to discuss our performance on these programs, including any risks, disputes, and claims.

Our international business is subject to economic, regulatory, competition, and other risks. Our international sales and operations are subject to risks associated with political and economic factors, regulatory requirements, competition, and other risks. A significant portion of our sales are international, including U.S. export sales. Transactions related to non-U.S. operations may be denominated in local currencies. Foreign currency exchange rate fluctuations (including their impact on supplier prices) may negatively affect demand for our products and our operating profit and margins. The majority of our commercial aerospace sales are in U.S. Dollars, while the majority of our non-U.S. operating costs are incurred in the applicable local currency. Pratt & Whitney Canada is especially susceptible to fluctuations in exchange rates for this reason. In addition, because our financial statements are denominated in U.S. Dollars, currency fluctuations may cause translation gains or losses for non-U.S. operating unit financial statements.

Our international sales and operations are also subject to risks associated with local government laws, regulations, and policies, including with respect to investments, taxation, exchange controls, capital controls, employment regulations, repatriation of earnings, and tariffs. Differing legal systems, customs, and contract laws and regulations pose additional risk. International transactions may include contractual terms that differ from those of similar contracts in the U.S. or that may be interpreted differently in foreign countries. In addition, in certain foreign countries, we engage foreign non-employee representatives and consultants for international sales and teaming with international subcontractors, partners, and suppliers for international programs. While we have robust policies and controls in place, these engagements expose us to various risks including those associated with the Foreign Corrupt Practices Act (FCPA) and local antibribery laws and regulations.

Our international business faces substantial competition from both U.S. companies and foreign companies. In some instances, foreign companies may be owned by foreign governments or may receive loans, marketing subsidies, and other assistance from their governments that may not be available to U.S. companies or our foreign subsidiaries. In addition, foreign companies may be subject to fewer restrictions on technology transfer than U.S. companies.

Our international contracts, particularly for sales of defense products and services, may include offset obligations or industrial cooperation obligations requiring specific local purchases, manufacturing agreements, technology transfer agreements, financial support obligations, or other local investments, sometimes in the form of in-country industrial participation (ICIP) agreements. Approvals of offset or ICIP thresholds and requirements may be subjective and time-consuming and may delay contract awards. Certain customers' demands are increasing for greater offset or ICIP commitment levels, higher-value content, including the transfer of technologies and capabilities, and local production and economic development. In addition, our ability to satisfy customer demands relating to the transfer of technologies and capabilities under ICIP arrangements and other international contracts may be limited by U.S. government export controls.

As a result of the above factors, we could experience financial penalties and award and funding delays on international programs, our profitability on these programs could be negatively affected, and we could incur losses on these programs that could negatively impact our results of operations, financial condition, and liquidity.

Geopolitical factors and changes in policies and regulations could adversely affect our business. Our international sales and operations are sensitive to changes in foreign national priorities, foreign government budgets, and regional and local political and economic factors, including wars and armed conflicts, political or civil unrest, volatility in energy prices or supply, inflation, interest rates, changes in threat environments and political relations, and geopolitical uncertainties. Our international sales and operations are also sensitive to changes in U.S. or foreign government laws, regulations, and policies, including those related to tariffs, sanctions, embargoes, export and import controls, other trade restrictions, and trade agreements. Events such as increased trade restrictions, retaliatory trade policies, or regime change can affect demand for our products and services, the competitive position of our products, our supply chain, and our ability to manufacture or sell products in certain countries. Further, operations in emerging market countries are subject to additional risks, including volatility in rates of economic growth, government instability, cultural differences (such as employment and business practices), the imposition of exchange and capital controls, and risks associated with exporting components manufactured in those countries for incorporation into finished products completed in other countries. While these factors and their impact are difficult to predict, any one or more of them could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity.

In addition, given the role of our defense businesses in the support of the national security interests of the U.S. and its allies, we are subject to risks and uncertainties relating to policies of the U.S. and its allies, as well as other countries, including those that are or become regarded as potential adversaries or threats. We engage in both direct commercial sales, which generally require U.S. government licenses and approvals, as well as foreign military sales, which are government-to-government transactions initiated by, and carried out at the direction of, the U.S. government. Changes in budgets and spending levels, policies, or priorities, which are subject to geopolitical risks and threats, may impact our defense businesses, including the timing of and delays in U.S. government licenses and approvals for sales, the risk of sanctions or other restrictions, as well as potential human rights issues associated with the use of our defense products. These risks and uncertainties may directly or indirectly impact our commercial businesses as well.

In February 2023, China announced sanctions against Raytheon Missiles & Defense (RMD) (a former RTX Corporation (RTX) business segment, which became part of Raytheon as a result of the July 1, 2023 RTX segment realignment), and previously announced it may take measures against RTX, in connection with certain foreign military sales to Taiwan. The Chinese sanctions against RMD included a fine equal to twice the value of the arms that RMD sold to Taiwan since September 2020. Since that time, China has announced additional sanctions against the Raytheon business and a Collins Aerospace (Collins) joint venture. If China were to impose additional sanctions, enforce announced sanctions, or take other regulatory action against RTX, our suppliers, affiliates, or partners, it could potentially disrupt our business operations. Any impact of these or other potential sanctions, or other actions by China, is uncertain. Our businesses have sold, and are expected to sell in the future, additional defense products to Taiwan from time to time in alignment with U.S. government policy, and we are unable to determine the potential impact, if any, of any future sanctions or other actions by China in response to these sales. Moreover, the Chinese government has generally expanded its ability to restrict China-related import, export and investment activities, which may have an adverse impact on our ability to conduct business or sell our commercial aerospace products in China. In addition, in response to Russia's invasion of Ukraine, the U.S. government and the governments of various jurisdictions in which we operate have imposed broad economic sanctions and export controls targeting specific industries, entities, and individuals in Russia. The Russian government has implemented similar counter-sanctions and export controls targeting specific industries, entities, and individuals in the U.S. and other jurisdictions in which we operate, including certain members of the Company's management team and Board of Directors. These government measures, among other limitations, restrict transactions involving various Russian banks and financial institutions and impose enhanced export controls limiting transfers of various goods, software, and technologies to and from Russia, including broadened export controls specifically targeting the aerospace sector. These measures have adversely affected and could continue to adversely affect the Company and/or our supply chain, business partners, or customers.

We continue to closely monitor potential impacts to RTX's business, customers, suppliers, employees, and operations in Israel, the Middle East, and the region at large due to continued regional instability and tensions.

Our financial performance is dependent on the condition of the aerospace industry. Our commercial aerospace businesses constitute a substantial portion of our financial results, and the performance of those businesses is directly tied to economic conditions in the commercial aerospace industry, which is cyclical in nature. Capital spending and demand for aircraft engines, aerospace products, and component aftermarket parts and services is limited to commercial airlines, lessors, other aircraft operators, and aircraft manufacturers that are influenced by a wide variety of factors, including current and predicted traffic levels, load factors, aircraft fuel prices, labor issues, airline consolidation, bankruptcies and restructuring activities, competition, the retirement of older aircraft, corporate profitability and financial health, cost reduction efforts, tightening of credit in financial markets and the availability of aircraft leasing and financing alternatives, remaining performance obligations levels, the satisfaction of certification or other regulatory requirements for aircraft in various jurisdictions, regulatory changes, terrorism and related safety concerns, political stability, and general economic conditions. Any of these factors affecting the industry could reduce the sales and margins of our aerospace businesses. In addition, because we have significant business with Airbus and Boeing, our aerospace businesses could be adversely affected by challenges faced by these or other individual customers. Other factors, including future terrorist actions, aviation safety concerns, public health issues, or major natural disasters, could also dramatically reduce the demand for commercial air travel, which could negatively impact the sales and margins of our aerospace businesses. Additionally, because a substantial portion of product deliveries to commercial aerospace customers are scheduled for delivery in the future, changes in economic conditions may cause customers to request that firm orders be rescheduled or canceled. At times, our aerospace businesses also enter into FFP or cost-share development contracts with customers, which may require us to bear cost overruns related to unforeseen technical and design challenges that arise during the development and early production stages of a program. Spare parts sales and aftermarket services, particularly under long-term aftermarket contracts are also affected by similar factors, including usage, pricing, technological improvements, regulatory changes, and the retirement of older aircraft. Furthermore, because of the lengthy research and development cycle involved in bringing products in these business segments to market, we cannot predict the economic conditions that will exist when any new product is ready to enter into service. A reduction in spending in the commercial aviation industry could have a significant effect on the demand for our products, which could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity.

We design, manufacture, and service products that incorporate advanced technologies; the introduction of new products and technologies involves risks, and we may not realize the degree or timing of benefits initially anticipated. The design, development, production, sale, and support of innovative commercial aerospace and defense systems and products involves advanced technologies. We invest substantial amounts in research and development efforts to pursue advancements in a wide range of technologies, products, and services aimed at meeting the ever-evolving product, program, and service needs of our customers. Our ability to realize the anticipated benefits of our investments depends on a variety of factors, including the competitiveness of our offerings' performance relative to our peers; meeting development, production, certification, and regulatory approval schedules; receiving regulatory approvals; execution of internal and external performance plans; achieving cost and production efficiencies; availability and quality of supplier- and internally-produced parts and materials; availability of supplier and internal facility capacity to perform maintenance, repair, and overhaul services; availability of test equipment; development of complex software; hiring and training of qualified personnel; identification of emerging technological trends for our target end-customers; the level of customer interest in new technologies and products; requirements to provide disclosure and company intellectual property rights for certain government procurement programs; and customer acceptance of our products and technologies. For example we are investing in artificial intelligence, among other advanced technologies, and our business may be adversely affected if we are unable to successfully integrate the technology into our internal business processes and products and services in a timely, cost-effective, compliant, and responsible manner. The methods and processes we use to develop, deploy or otherwise use artificial intelligence systems may be found to not be in compliance with rapidly evolving regulatory standards thereby preventing or frustrating our use of the systems or creating liability for us. These methods and processes may further perform in unexpected ways or be misused, jeopardizing RTX's intellectual property or potentially resulting in unexpected loss or misappropriation of intellectual property. Improper use of artificial intelligence could also lead to data breaches, undetected cyber-attacks, regulatory action, and reputational risks. In addition, our customers manufacture or acquire end products and systems that incorporate certain of our products. These end products and systems may also incorporate additional technologies manufactured by third parties and involve additional risks and uncertainties. As a result, the performance and industry acceptance of these larger systems and end products could affect the level of customer interest in, and acceptance of, our products in the marketplace. In addition, many of our products must adhere to strict regulatory and market-driven safety and performance standards in a variety of jurisdictions. The evolving nature of these standards, along with the long duration of development, production, and aftermarket support programs, creates uncertainty regarding program profitability, particularly with our aircraft engine products. Development efforts divert resources from other potential investments in our businesses, and these efforts may not lead to the development of new technologies or products on a timely

basis or meet the needs of our customers as fully as alternative investments. In addition, the industries for our products or products that incorporate our technologies may not develop or grow as we anticipate. We, or our customers, suppliers, or subcontractors, may encounter difficulties in developing and producing new products and services, and may not realize the degree or timing of benefits initially anticipated or may otherwise suffer significant adverse financial consequences. Due to the design complexity of our products, or those of our customers or third party manufacturers that incorporate our products into theirs or our customers' products, we may experience delays in completing the development and introduction of new products, or we may experience the suspension of production after these products enter into service due to safety concerns. Delays and/or suspension of production could result in increased development costs or deflect resources from other projects. If we fail in our development projects or if our new products or technologies fail to achieve customer acceptance or competitors develop more capable technologies or offerings, we may be unsuccessful in obtaining new contracts or winning all or a portion of next generation programs, including in key areas such as advanced sensing solutions, next-generation aircraft engine technologies, advanced avionics solutions and hypersonics. Any of the foregoing could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity.

In particular, Pratt & Whitney's Geared Turbofan (GTF) family of engines incorporates advanced technologies. The level of orders received for the GTF family of engines, coupled with a requirement to achieve mature production levels in a very short time frame, have required significant growth in our manufacturing and supply chain capacity. In addition, in July 2023 Pratt & Whitney determined that a rare condition in powder metal used to manufacture certain engine parts requires accelerated inspection of the PW1100G-JM (PW1100) GTF fleet, which powers the A320neo family of aircraft. This issue has resulted in increased engine removals and inspections, shop visits, aircraft on ground levels, and costs to the Company. If any of our production or maintenance, repair, and overhaul ramp-up efforts are delayed, if suppliers cannot timely deliver or perform to our standards, if any other engine models are found to be materially impacted by the powder metal issue, and/or if we identify or experience other issues, including durability issues, with in-service engines in the GTF family of engines (or other engines), whether for manufacturing reasons or otherwise, we may not meet customer requirements, which could result in material additional costs, including liquidated damages or other liabilities.

Competition may reduce our revenues and margins and limit our future opportunities. We operate in highly competitive industries and our competitors may have more extensive or more specialized engineering, manufacturing, servicing, and marketing capabilities than we do. Our contracts are typically awarded on a competitive basis. Our bids are based in part upon the cost to provide the products and services. If we fail to accurately estimate these costs, the profitability of our contracts may be adversely affected. In addition, we may face customer-directed cost reduction targets that could have a material adverse effect on the profitability of our contracts if these targets are not achieved when required. Moreover, bid protests from unsuccessful bidders on new program awards are frequent with respect to DoW awards in particular. Generally, a bid protest will delay the start of contract activities, delay earnings, and could result in the award decision being overturned and require a re-bid of the contract. We have also experienced highly competitive pricing, in which a bidder may anticipate making a substantial investment in a program in order to win the work. Highly competitive activity within the commercial aerospace industry has included substantial discounts and other financial incentives, performance and operating cost guarantees, and participation in financing arrangements, in order to secure both new engine business and the aftermarket revenues associated with these products. If our competitors can offer lower cost services or products, or provide services or products more quickly, at equivalent or in some cases even reduced capabilities, we may lose business opportunities, which could adversely affect our future results. Competitors may also be willing to accept more risk or lower profitability in competing for contracts than we are. Further, our competitors, including our customers, may develop competing technologies which gain industry acceptance in advance of, or instead of, our products, or meet particular in-demand technological needs before us or with technology that is superior to our existing or new technologies. This competition could cause our existing technologies and offerings to become obsolete or otherwise decrease demand for our offerings. In addition, the possibility exists that competitors or customers will develop aftermarket services and parts for our products that attract customers and adversely impact our return on investment on original equipment manufacturer products. We also anticipate companies continuing to enhance their competitive position against our defense businesses as a result of continued domestic and cross-border defense industry consolidation and the expansion of competitors' capabilities. We are also facing increased competition domestically and internationally from foreign and multinational firms. Additionally, some customers, including the DoW, are increasingly turning to commercial contractors, other non-traditional defense contractors, and startups. For example, the U.S. government may award large competitive contracts to other suppliers to maintain a broad industrial base. In addition, U.S. government procurement policies and procedures and the application thereof are regularly changing. For example, an increase in the use of contract structures that shift risk to the contractor (such as fixed-price development contracts and incentive-based fee arrangements), use of novel award fee criteria, evaluation of a bidder's willingness to provide detailed competitively sensitive intellectual property (such as detailed RTX design, manufacturing and process information that would risk loss of competitively sensitive information), or requirements to transfer technology to domestic sources in connection with offset obligations, could adversely affect our profit rates, ability to preserve differentiated product offerings, maintain lower tier suppliers, or make it more difficult to win new

contracts. If we are unable to continue to compete successfully against our current or future competitors in our core businesses, we may experience declines in revenues and industry segment share which could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity.

OPERATIONAL RISKS

Our business and financial performance may be adversely affected by cyber-attacks on information technology (IT) infrastructure and products, as well as changes in cybersecurity regulations. Our business may be impacted by disruptions to our own or third-party IT infrastructure, and the products and services that we provide our customers are also at risk of being adversely affected by cyber-attacks. Like other companies, we regularly experience cyber-based attacks. Cybersecurity threats are continuously evolving and may have an impact on our customers, suppliers, subcontractors, and other third parties with whom we do business routinely, both on premises and in the cloud, attempting to gain unauthorized access to our confidential, proprietary, or otherwise protected information, classified information, or personal data or other information relating to our employees, customers, and other third parties, or to disrupt our systems or the systems of third parties. Cybersecurity threats also include attacks targeting the security, confidentiality, integrity, and/or availability of the hardware, software, and information installed, stored, or transmitted in our products, including after the purchase of those products and when they are incorporated into third-party products, facilities, or infrastructure. We are also exposed to the risk of insider threat attacks. Any such attacks could disrupt our systems or those of third parties (including mission and safety critical systems), impact business operations, result in unauthorized release of confidential, proprietary, or otherwise protected information, and corrupt our data or that of third parties. The threats we face are continuous and evolving, and vary in degree of severity and sophistication. These threats include advanced persistent threats from highly organized adversaries, including but not limited to cyber criminals, nation states, and so-called hacktivists, particularly those adverse to the security interests of the U.S. and its allies, which target us and other defense contractors. These types of threats are related to the geopolitical environment and have, therefore, grown in number due to recent geopolitical conflicts. In addition, as a result of the rapid pace of technological change, we and our customers, suppliers, subcontractors, and other third parties with whom we conduct business continue to rely on legacy systems and software, which can be more vulnerable to cyber threats and attacks. Moreover, we, like other companies, are seeing an unprecedented number of previously unknown vulnerabilities, for which there are no known mitigations, being revealed by new attacks. Further, the sophistication, availability, and use of artificial intelligence by threat actors present an increased level of risk. Due to the evolving threat landscape, we have experienced and expect to continue to experience more frequent and increasingly advanced cyber-attacks. In addition, changes in domestic and international cybersecurity-related laws and regulations have expanded cybersecurity-related compliance requirements, and cybersecurity regulatory enforcement activity has grown. We expect the regulatory environment to continue to evolve, and these regulatory changes could increase our operational and compliance expenditures and those of our suppliers, and lead to new or additional IT and product development expenses. We also face reputational, litigation, and financial risks in relation to potential required disclosures and increased risk of enforcement. We continue to make investments and adopt measures designed to enhance our protection, detection, response, and recovery capabilities, and to mitigate potential risks to our technology, products, services, and operations from potential cybersecurity threats, as well as to comply with evolving regulations. However, given the unpredictability, nature, and scope of cyber-attacks, it is possible that we are unable to defend against all cyber-attacks, that potential vulnerabilities could go undetected and persist in the environment for an extended period, or that we may otherwise be unable to mitigate customer losses and other potential consequences of these attacks. In addition, some products and services that we provide to customers, particularly those related to public security, may raise potential liabilities related to privacy and intellectual property. In some cases, we must rely on the safeguards put in place by our customers, suppliers, subcontractors, and other third parties to protect against and report cyber threats and attacks. We could potentially be subject to production downtimes, operational delays, other detrimental impacts on our operations, or ability to provide products and services to our customers, the compromise of confidential information, intellectual property or otherwise protected information, misappropriation, destruction, or corruption of data, security breaches, other manipulation or improper use of our or third-party systems, networks, or products, financial losses from remedial actions, loss of business, or potential liability, penalties, fines, and/or damage to our reputation. Any of these could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity. Due to the evolving nature of such risks, the impact of any potential incident cannot be predicted. Further, our insurance coverage, which may exclude losses from war or cyber operations, may not be adequate to cover all related costs and we may not otherwise be fully indemnified for them.

We are dependent on a global supply chain and subject to risks related to the availability of materials and the performance of our suppliers; in recent years we have experienced supply chain disruptions that resulted in delays and increased costs and adversely affected our performance. Our performance requires a variety of raw materials, supplier-provided parts, components, sub-systems, and contract manufacturing services, and we rely on U.S. and non-U.S. suppliers (including third-party manufacturing suppliers, subcontractors, and service providers) and commodity markets for these materials and services. In some instances, we depend upon a single source of supply, manufacturing, services support, or assembly, or participate in commodity markets that may be subject to allocations of limited supplies by suppliers. Emerging laws and increasing regulatory

requirements aimed at global supply chains may impact our ability to access certain materials and components, and otherwise adversely affect our business, and we may not only be held responsible for our compliance, but for that of our suppliers. In addition, our defense businesses are subject to specific procurement requirements that limit the types of materials they use. Our defense businesses also must require suppliers to comply with various DoW requirements, any of which requirements may further limit the suppliers and subcontractors they may utilize. Identifying and qualifying second- or third- source suppliers can be difficult, time-consuming, and may result in increased costs.

Global supply chain disruptions have impacted our ability to procure raw materials, including certain rare earth elements, microelectronics, and certain commodities. These disruptions have been driven by supply chain market constraints and macroeconomic conditions, including inflation and labor market shortages. Current geopolitical conditions, including conflicts and other causes of strained intercountry relations, as well as sanctions and other trade restrictive activities, such as tariffs and export controls, are contributing to these issues. In addition, the inflationary environment has increased material and component prices, labor rates, and supplier costs, and negatively impacted costs. Credit market conditions, including higher interest rates and the availability of credit, have impacted some of our suppliers and subcontractors as well. As a result of these procurement issues, the production flow in our factories has been negatively impacted, which has, in turn, hindered our ability to perform on our commitments to customers and negatively affected our results of operations, financial condition, and liquidity. Our supply costs have increased due to the above factors. In addition, we are largely dependent upon foreign sources for certain raw materials, such as cobalt, tantalum, chromium, rhenium, nickel, and titanium, and we rely on foreign suppliers as single-source suppliers of some components. Some raw materials and components have been in the past sourced from areas now under sanctions, such as Russia, or are currently sourced from areas which are at risk of sanctions or other trade restrictive actions, such as China.

The timing of the impacts of these supply chain risks and issues and our ability to mitigate them are uncertain and difficult to predict. However, we expect the current supply chain, inflation, and price issues, and their negative impacts on our business, to continue. In particular, we expect to experience prolonged delays for certain critical component parts and sub-systems. Furthermore, the existing supply chain issues could be compounded by other events, such as an economic downturn; changes in trade policies, such as tariffs; supplier capacity constraints for other reasons; supplier quality issues (for example, defects or fraudulent parts); supplier closing, bankruptcy, or financial difficulties; price increases for various reasons; and worsening shortages of raw materials or commodities, including as a result of war or other geopolitical actions, natural disaster, health pandemics or other business continuity events, or transport and distribution issues, any of which could further negatively impact our ability to meet our commitments to customers or increase our operating costs and therefore incrementally affect our results of operations, financial condition, and liquidity.

Due to the nature of our products and services, a product safety failure, quality issue, or other failure affecting our or our customers' or suppliers' products or systems could seriously harm our business. Our products and services are highly sophisticated and specialized, involve complex advanced technologies, are often integrated with third-party products and services, and are utilized for specific purposes that require precision, reliability, and durability. Many of our products and services include both hardware and software that involve industrial machinery and intricate aviation and defense systems, including commercial and military jet engines, power and control systems, and other aircraft parts, air and missile defense systems, and military sensors and command and control systems. Technical, mechanical, quality, electronic, and other failures may occur from time to time, whether as a result of manufacturing or design defect, operational process, or production issue attributable to us, our customers, suppliers, partners, third party integrators, or others. Product design changes and updates could also have associated cost and schedule impacts. In addition, our products could fail as a result of cyber-attacks, such as those that seize control and result in misuse or unintended use of our products, or other intentional acts. The impact of a catastrophic product or system failure or similar event affecting our or our customers' or suppliers' products or services could be significant, and could result in injuries or death, property damage, loss of strategic capabilities, loss of intellectual property, loss of reputation, and other significant negative effects. A product or system failure, or perceived failure, could lead to negative publicity, a diversion of management attention, and damage to our reputation that could reduce demand for our products and services. It could also result in product recalls and product liability and warranty claims (including claims related to the safety or reliability of our products) and related expenses, other service, repair, and maintenance costs, labor and material costs, customer support costs, significant damages, and other costs, including fines and other remedies, and regulatory and environmental liabilities. We may also incur increased costs, delayed payments, reputational harm, or lost equipment or services revenue in connection with a significant issue with a third party's product with which our products are integrated. Further, our insurance coverage may not be adequate to cover all related costs and we may not otherwise be fully indemnified for them. Any of the foregoing could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity.

In particular, in 2023, Pratt & Whitney determined that a rare condition in powder metal used to manufacture certain engine parts requires accelerated inspection of the PW1100 GTF fleet, which powers the A320neo family of aircraft. This

determination and corresponding fleet actions have resulted in, and are expected to continue to result in, an elevated level of aircraft on ground for the A320neo family of aircraft and significant incremental shop visits necessary to perform inspections on PW1100 GTF engines through the end of 2026. As a result, we have and will continue to incur significant customer support and mitigation costs and significant labor, material, and related costs. This matter has caused reputational harm and has negatively impacted, and will continue to impact, our results of operations and financial condition. The expected financial impact of the powder metal issue is based on historical experience and is subject to various assumptions and judgments, including, without limitation, the number and expected timing of shop visits, inspection results and scope of work to be performed, turnaround time, availability of parts, available capacity at overhaul facilities, and outcomes of negotiations with impacted customers, and these assumptions are subject to variability. Potential changes to these assumptions could have a material effect on the Company's results of operations for the periods in which it is recognized. In addition, other engine models within Pratt & Whitney's fleet contain parts manufactured with affected powder metal. The negative impacts arising from the Powder Metal Matter could increase if any other engine models are found to be materially impacted by this rare condition.

We depend on the recruitment and retention of qualified personnel, and our failure to attract, train, and retain such personnel could seriously harm our business. Due to the specialized nature of our business, our future performance is highly dependent upon the continued services of our key technical personnel and executive officers, and the hiring, development, and retention of qualified technical, engineering, manufacturing, marketing, sales, and management personnel for our operations. Our defense business in particular requires qualified personnel with security clearances due to our classified programs. As portions of our workforce continue to retire and we lose experienced personnel in the future, it is critical that we develop other employees, hire new qualified personnel, and successfully manage the transfer of critical skillsets and industry knowledge within our workforce.

We have experienced, and continue to experience, challenges hiring highly qualified personnel including engineers, skilled laborers, and security clearance holders. We expect these difficulties to continue in the future. In addition, the cost of labor remains high. With respect to existing personnel, some may become required to receive various security clearances and substantial training in order to work on certain programs or perform certain tasks. Necessary security clearances may be delayed, which may impact our ability to perform on our U.S. government contracts. We also may not be successful in training or developing qualified personnel with the requisite relevant skills or security clearances. Moreover, some of our employees are covered by collective bargaining agreements. Historically, we have been able to renegotiate expiring agreements without experiencing significant prolonged disruptions to business operations. However, the labor environment has experienced shifts that pose higher risk of future labor disruption. Any of the above factors could seriously harm our business.

Exports and imports of certain of our products are subject to various export control, sanctions, and import regulations and may require authorization from regulatory agencies of the U.S. or other countries. We must comply with various laws and regulations relating to the export and import of products, services, and technology from and into the U.S. and other countries having jurisdiction over our operations. In the U.S., these laws and regulations include, among others, the Export Administration Regulations (EAR) administered by the U.S. Department of Commerce, the International Traffic in Arms Regulations (ITAR) and Arms Export Control Act (AECA) provisions administered by the U.S. Department of State (DOS), embargoes and sanctions regulations administered by the U.S. Department of the Treasury, and import regulations administered by the U.S. Department of Homeland Security and the U.S. Department of Justice (DOJ). Certain of our products, services, and technologies have military or strategic applications and are on the U.S. Munitions List of the ITAR, the Commerce Control List of the EAR, or are otherwise subject to the EAR and/or the U.S. Munitions Import List, and we are required to obtain licenses and authorizations from the appropriate U.S. government agencies before exporting these products out of the U.S. or importing these products into the U.S. U.S. foreign policy or the foreign policy of other licensing jurisdictions may affect the licensing process or otherwise prevent us from engaging in business dealings with certain individuals, entities, or countries. From time to time, we identify, investigate, remediate and voluntarily disclose violations or potential violations of the ITAR, EAR, or other global trade laws and regulations. Any failure by us, our customers, or our suppliers to comply with the above-referenced laws and regulations, arising out of our voluntary disclosures or otherwise, could result in civil or criminal penalties, fines, seizure of our products, adverse publicity, restrictions on our ability to engage in export or import transactions, or the suspension or debarment from doing business with the U.S. government. Moreover, any changes in export control, sanctions, or import regulations may further restrict the export or import of our products or services, and the possibility of such changes requires constant monitoring to ensure we remain compliant. Our ability to obtain required licenses and authorizations on a timely basis, or at all, is subject to risks and uncertainties, including changing laws, regulations, or foreign policies, delays in Congressional action, or geopolitical and other factors. If we are not successful in obtaining or maintaining the necessary licenses or authorizations in a timely manner, our sales relating to those approvals may be prevented or delayed, and revenue and profit previously recognized may be reversed. Any restrictions on the export or import of our products or product lines could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity.

In addition, as previously disclosed, on August 29, 2024, the Company entered into a Consent Agreement (CA) with the DOS to resolve alleged civil violations of the AECA and the ITAR. The CA, which has a three-year term, requires the Company to implement remedial compliance measures and to conduct an external audit of the Company's ITAR compliance program. The CA also requires appointment of an external, independent Special Compliance Officer (SCO). The Company appointed its SCO on September 27, 2024. If we are unable to satisfy the requirements of the CA within three years as determined by the DOS, we may face a continuation of the CA, additional fines, or other adverse impacts. In addition, during the term of the CA, the CA's transaction-related requirements may impact our ability to execute potential future divestitures within expected timeframes or consistent with expected valuation metrics, and on acceptable terms and conditions, which could delay or impair our ability to achieve the expected benefits from our strategic plan, or otherwise harm our competitive position, results of operations, financial condition, or liquidity.

Our business and financial performance may be adversely affected by threats to our physical security and other events outside our control. We could encounter threats to our physical security, including our facilities and personnel, and threats from workplace violence, civil unrest, terrorism, or similar acts, any of which could disrupt our business. In addition, our business, and the businesses of our suppliers, subcontractors, service providers, and customers, could be disrupted by public health crises, such as pandemics and epidemics, and governmental, business, and individual actions taken in response, damaging weather or other acts of nature, physical attacks due to proximity to nation-state conflicts, cyber-attacks on IT infrastructure and products, or other events outside of our control. Any such business disruption could subject us to production downtimes, operational delays, supply chain challenges, other detrimental impacts on our operations or ability to provide products and services to our customers, decreased demand for our products, decreased defense budgets, financial losses from remedial actions, the diversion of management's attention and resources, or loss of business, any of which could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity. The impact of any such business disruption is difficult to predict.

We depend on our intellectual property and have access to certain third-party intellectual property; infringement or failure to protect our intellectual property or access to third party intellectual property could adversely affect our future growth and success. We rely on a combination of patents, trademarks, copyrights, trade secrets, nondisclosure agreements, IT security systems, internal controls and compliance systems, and other measures to protect our intellectual property. We also rely on nondisclosure agreements, confidentiality obligations in contracts, IT security systems, and other measures to protect certain customer and supplier information and intellectual property that we have in our possession or to which we have access. The U.S. government and foreign governments have licenses under certain of our intellectual property, including certain patents, which are developed or used in performance of government contracts. Governments may use or authorize others (including our competitors) to use such patents and intellectual property for government and other purposes. Governments may challenge the sufficiency of intellectual property rights we have granted in government contracts and attempt to obtain greater rights, which could reduce our ability to protect our intellectual property rights and to compete. In some instances, we have augmented our technology base by licensing the proprietary intellectual property of others. Intellectual property obtained from third parties is also subject to challenge, invalidation, misappropriation, or circumvention by third parties. In addition, we may not be able to obtain necessary licenses on commercially reasonable terms. In other instances, our ability to procure and perform government contracts requires us to obtain certain rights in the intellectual property of others through government grants. Governments may deny us the right to obtain such rights in the intellectual property of others, which may affect our ability to perform government contracts. Moreover, our efforts to protect intellectual property and proprietary rights may not be sufficient. We cannot be sure that our pending patent applications will result in the issuance of patents to us, that patents issued to or licensed by us in the past or in the future will not be challenged or circumvented by competitors, or that these patents will be found to be valid or sufficiently broad to preclude our competitors from introducing technologies similar to those covered by our patents and patent applications. Our ability to protect and enforce our intellectual property rights may be limited in certain countries outside the U.S. In addition, we may be the target of competitor or other third-party patent enforcement actions seeking substantial monetary damages or seeking to prevent our sale and marketing of certain of our products or services. Our competitive position also may be adversely impacted by limitations on our ability to obtain possession of, and ownership of, necessary licenses concerning data important to the development or provision of our products or service offerings, or by limitations on our ability to restrict the use by others of data related to our products or services. We may also be subject to disruptions, losses, and liability resulting from various cybersecurity attacks or IT failures, as described above. Any of these events or factors could have a material adverse effect on our competitive position, subject us to judgments, penalties, and significant litigation costs, or temporarily or permanently disrupt our sales and marketing of the affected products or services. Any of the foregoing could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity.

LEGAL, ENVIRONMENTAL, AND REGULATORY RISKS

As a U.S. government contractor, we are subject to risks relating to U.S. government audits, investigations, and disputes. We are subject to U.S. government investigations relating to our U.S. government contracts. Such U.S. government investigations

often take years to complete and could result in administrative, civil, or criminal liabilities, including repayments, fines, treble and other damages, forfeitures, restitution, or penalties, or could lead to suspension or debarment of U.S. government contracting or of export privileges. For instance, if we or one of our business units were charged with wrongdoing in connection with a U.S. government investigation (including fraud, or violation of certain environmental, FCPA, and other anti-bribery and anti-corruption laws, or export laws, as further described below), the U.S. government could suspend us from bidding on or receiving awards of new U.S. government contracts pending the completion of legal proceedings. If convicted or found liable, the U.S. government could fine and debar us from new U.S. government contracting for a period generally not to exceed three years, and could void any contracts found to be tainted by fraud. We also could suffer reputational harm if allegations of impropriety were made against us, even if such allegations are later determined to be unsubstantiated. Further, our U.S. government contracts are subject to audit and we have received audit reports recommending the reduction of certain contract prices because, for example, cost or pricing data disclosures or cost accounting practices used to price and negotiate those contracts may not have conformed to government regulations. Some of these audit reports recommend that certain payments be repaid, delayed, or withheld, and may involve substantial amounts, which could, if the audit reports' theories were to prevail in litigation, also have future impacts such as increasing the costs absorbed by our commercial businesses. We have made voluntary refunds in those cases we believe appropriate, have settled some allegations, and, in some cases, continue to negotiate and/or litigate. We may be, and have been, required to make significant payments into escrow of disputed liabilities while the related litigation is pending. If the litigation is resolved in our favor, any such payments will be returned to us with interest. The Defense Contract Audit Agency (DCAA) and the Defense Contract Management Agency (DCMA) also review the adequacy of, and our compliance with, our internal control systems and policies, including our accounting, purchasing, government property, estimating, earned value management, and material management accounting systems. Our final allowable incurred costs for each year are subject to audit and have from time to time resulted in disputes between us and the U.S. government, including DCMA claims to recover payments for alleged noncompliance with cost accounting standards. Any costs found to be improperly allocated to a specific contract will not be reimbursed by the U.S. government or must be refunded by us to the U.S. government if already reimbursed. In some cases, the DOJ has conducted investigations or convened grand juries to investigate possible irregularities in our costs. An adverse outcome of any audit or investigation could result in civil and criminal penalties and fines, which could negatively impact our results of operations, financial condition, and liquidity. In addition, if allegations of impropriety were made against us, we could suffer serious reputational harm, which could negatively affect our results of operations, financial position, and liquidity. As discussed below and as previously disclosed, in October 2024, the Company entered into a deferred prosecution agreement and a civil settlement agreement with the DOJ to resolve investigations relating to pricing on certain government contracts.

A violation by Raytheon Company or the Company of any one of the deferred prosecution agreements or Securities and Exchange Commission (SEC) administrative order announced on October 16, 2024 could adversely affect our business. As previously disclosed, on October 15, 2024, Raytheon Company entered into a deferred prosecution agreement (DPA) (DPA-1) with the DOJ and on October 16, 2024, the Company became subject to an administrative order issued by the SEC (the SEC Administrative Order) to resolve the previously disclosed criminal and civil government investigations into payments made by Raytheon Company and its joint venture, Thales-Raytheon Systems (TRS), since 2012 in connection with certain Middle East contracts. On October 16, 2024, Raytheon also entered into a DPA (DPA-2) and a False Claims Act (FCA) settlement agreement with the DOJ to resolve previously disclosed criminal and civil government investigations into defective pricing claims for certain legacy Raytheon contracts entered into between 2011 and 2013 and in 2017. The Company made a settlement payment, criminal and civil penalties, restitution, and disgorgement, as applicable, pursuant to DPA-1, DPA-2, the SEC Administrative Order and the FCA settlement agreement as described in "Note 17: Commitments and Contingencies" within Item 8 of this Form 10-K. Pursuant to DPA-1, among other terms, the DOJ will defer, for a period of three years, criminal prosecution of Raytheon Company related to one count of conspiracy to violate the anti-bribery provisions of the FCPA and one count of conspiracy to violate the AECA by failing to make related disclosures of certain payments that qualified as fees, commissions and/or political contributions under Part 130 of ITAR. Pursuant to DPA-2, among other terms, the DOJ will defer, for a period of three years, criminal prosecution of Raytheon Company related to two counts of major fraud against the United States by Raytheon Company involving two legacy contracts. Under DPA-1, DPA-2, and the SEC Administrative Order, Raytheon Company and the Company are required to undertake certain cooperation and disclosure obligations (for a term commencing on the effective date of DPA-1 and the SEC Administrative Order, as applicable, and ending three years from the date on which Raytheon Company and the Company engage an independent compliance monitor satisfactory to the DOJ and SEC). A single independent compliance monitor was selected to oversee Raytheon Company's and the Company's compliance with their respective obligations under DPA-1, DPA-2, and the SEC Administrative Order, and that monitor is expected to be in place by the end of the first quarter. DPA-1 and DPA-2 further provide that, in the event the DOJ, in its sole discretion, determines during the deferred prosecution period that Raytheon Company or the Company has violated any provision of either DPA, Raytheon Company or the Company may be subject to prosecution for any federal criminal violations brought against Raytheon Company or the relevant Company in DPA-1 and DPA-2. The SEC Administrative Order further provides that, in the event of a breach of the SEC Administrative Order, the SEC may vacate the Administrative Order and institute proceedings

against the Company. Any breach of DPA-1, DPA-2, or the SEC Administrative Order could subject Raytheon Company or the Company to criminal prosecutions and/or administrative proceedings, resulting in additional criminal and civil penalties and fines, extension of either DPA's term(s), including the terms of the monitorship, increased future regulatory and legal scrutiny by U.S. or foreign government agencies, additional reputational harm, additional compliance costs, suspension of export privileges and/or suspension or debarment from U.S. government contracting or subcontracting for a period of time, any of which could negatively affect our results of operations, financial position, and liquidity. In addition, during the term of the DPAs, the DPAs' transaction-related requirements may impact our ability to execute potential future divestitures within expected timeframes or consistent with expected valuation metrics, which could delay or impair our ability to achieve the expected benefits from our strategic plan, or otherwise harm our competitive position, results of operations, financial condition or liquidity.

We are subject to litigation, environmental, anti-corruption, and other legal and compliance risks. We are subject to a variety of litigation and legal compliance risks. These risks relate to, among other things, product safety and reliability, personal injuries, intellectual property rights, contract-related claims, government contracts, taxes, environmental matters, the use of chemical substances, the use of artificial intelligence, export control, sanctions, employment matters, securities laws, competition laws, and laws governing improper business practices. We or one of our businesses could be charged with wrongdoing as a result of such matters. If convicted or found liable, we could be subject to significant fines, penalties, repayments, or other damages (in certain cases, treble damages). Product recalls or other supply disruptions and product liability and warranty claims can result in significant damages and costs, including fines, as well as other harm to our business as discussed above. As a global business, we are subject to complex laws and regulations in the U.S. and in other countries in which we operate. Those laws and regulations may be interpreted in different ways. They may also change from time to time, as may related interpretations and other guidance. Changes in laws or regulations could result in higher expenses. Uncertainty relating to laws or regulations may also affect how we conduct our operations and structure our investments and could limit our ability to enforce our rights.

We use hazardous substances and generate hazardous wastes in our operations. We also rely upon the use of chemical substances that are heavily regulated in connection with our products, manufacturing processes and operation of our facilities. As a result, we are subject to potentially material liabilities related to potential non-compliance and both personal injuries or property damage that may be caused by hazardous substance releases and exposures. Personal injury lawsuits may involve individual and purported class actions alleging that contaminants originating from our current or former products or operating facilities caused or contributed to medical conditions, including cancers or other illnesses incurred by employees, former employees, third-parties' employees, or residents in the area, and environmental damage or diminution of real estate values. For example, we are investigating and remediating contamination related to past practices at a number of properties and, in some cases, have been named as a defendant in related "toxic tort" claims. We are also subject to laws and regulations that: (1) impose requirements for chemical substances and the proper management, treatment, storage, and disposal of hazardous substances and wastes; (2) restrict air and water emissions from our operations (including U.S. government-owned facilities we manage); and (3) require maintenance of a safe workplace. These laws and regulations can lead to substantial fines and criminal sanctions for violations, and may require the installation of costly equipment or operational changes to limit pollution emissions, decrease the likelihood of accidental hazardous substance releases, and/or reduce the risks of injury to people. We incur, and expect to continue to incur, capital and other expenditures to comply with these laws and regulations. A criminal violation of certain U.S. environmental statutes such as the Clean Air Act and Clean Water Act could result in suspension, debarment, or disqualification by the U.S. Environmental Protection Agency (EPA). A facility determined to be in violation of the criminal provisions of these statutes can be prohibited from performing any U.S. government contract work until the violation has been corrected and the EPA approves the reinstatement of the facility. Even in litigation where we believe our liability is remote, there is a risk that a negative finding or decision in a matter involving multiple plaintiffs or a purported class action could have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity, in particular with respect to environmental claims in regions where we have, or previously had, significant operations. In addition, new laws, regulations, or governmental policies, sudden changes in the interpretation and enforcement of existing laws and regulations, the discovery of previously unknown contamination, or the imposition of new clean-up standards could require us to incur additional costs in the future that would have a negative effect on our results of operations, financial condition, and liquidity.

In addition, the FCPA and other anti-bribery and anti-corruption laws generally prohibit companies and their intermediaries from making improper payments to U.S. and non-U.S. officials for the purpose of obtaining or retaining business. These laws apply to companies, individual directors, officers, employees, and agents. U.S. companies also may be held liable for actions taken by strategic or local partners or representatives. The FCPA also imposes accounting standards and requirements on publicly traded U.S. corporations and their foreign affiliates, which are intended to prevent the diversion of corporate funds to the payment of bribes and other improper payments. Certain of our customer relationships outside of the U.S. are with governmental entities and are, therefore, subject to the FCPA and other anti-bribery and anti-corruption laws, including the anti-

bribery and anti-corruption laws of non-U.S. countries. Our policies mandate compliance with these anti-bribery and anti-corruption laws. Despite meaningful measures that we undertake to ensure lawful conduct, which include training and internal control policies, these measures may not always prevent violations of the FCPA or similar laws. As discussed above and as previously disclosed, in October 2024, the Company entered into a DPA with the DOJ and consented to the entry of an SEC Administrative Order to resolve investigations related to conduct that, among other things, violated the FCPA. We have been subject to regulatory investigations for alleged violations of anti-bribery and anti-corruption laws, and could be subject to such investigations in the future, which could result in criminal and civil penalties, disgorgement, further changes or enhancements to our procedures, policies and controls, personnel changes, or other remedial actions. Violations of these laws, or allegations of such violations, could disrupt our operations, cause reputational harm, involve significant management attention, and result in a material adverse effect on our competitive position, results of operations, financial condition, or liquidity.

Cybersecurity, artificial intelligence, and data security and protection laws and regulations are evolving and present increasing compliance challenges, which may increase our costs, affect our competitiveness, cause reputational harm, and expose us to substantial fines or other penalties.

Our business and financial performance may be adversely affected by climate change, including regulations, customer demand, technologies, and extreme weather. Our business may be impacted by climate change and governmental and industry actions taken in response, which present short, medium, and long-term risks to our business and financial condition. Current and emerging environmental and climate-related laws, regulations, or other policies, including regulations on greenhouse gas emissions, carbon pricing, energy taxes, product efficiency standards, and mandatory disclosure obligations, could increase our operational and compliance expenditures and those of our suppliers, including increased energy and raw materials costs, and costs associated with manufacturing changes, and lead to new or additional investments in product designs and facility upgrades. In addition, we continue to see ever-increasing demands for offerings focused on addressing long-term climate change, transitioning to lower emission technologies, including low to no carbon products and services, the use of alternative energy sources, and other sustainable aviation technologies, weather and climate monitoring products and services. Customers, shareholders, and institutional investors may focus on measuring and minimizing environmental impact, including our environmental sustainability practices and commitments with respect to our operations, products, and suppliers. As a result, we continue to evaluate making additional investments in new technologies and capabilities, and devoting management and other resources in response to the foregoing. We may not realize, on a timely basis or at all, the anticipated benefits of these investments and actions for a variety of reasons, including technological challenges, evolving government and customer requirements, and our ability to anticipate them and develop in-demand technologies on a timely basis, and other risks related to the development of advanced technologies described above. In addition, certain technologies will be dependent upon government action, such as investments in infrastructure, creating appropriate market incentives, and making certain raw materials available for development of certain technologies. Moreover, we rely on our suppliers to timely and effectively adapt and meet our evolving technological supply needs, and they may be unable to fully respond to our requirements in a timely manner or at all. We also face competition risks as our competitors also respond to advancing sustainable technologies. Our competitors may develop these in-demand technologies before we do, their new technologies may be deemed by our customers to be superior to technologies we may develop, and their technologies may otherwise gain industry acceptance in advance of or instead of our products. In addition, as we and our competitors develop increasingly sustainable technologies, demand for our older offerings may decrease or become nonexistent. Our reputation may also be damaged if we or our industry fail, or are perceived to fail, to achieve sustainability goals or commitments or to comply with evolving environmental and climate-related regulations. In addition, climate-related litigation and government investigations could be commenced against us, could be costly to defend, and could adversely affect our business. Moreover, our business, the businesses of our suppliers, subcontractors, service providers, distributors, and customers, and the industries in which we operate, could be negatively impacted by increasing frequency and severity of acute extreme weather events caused by climate change, including hurricanes, tornadoes, floods, snow and ice storms, fires, heat waves, and mud slides, and by chronic changes in weather patterns, such as temperature increases, drought, and sea level rise. These events could damage our and our suppliers' facilities, products, and other assets, and cause disruptions to our business and operations, supply chain, and distribution networks, and the businesses of our customers, and require an increase in expenditures to improve climate resiliency of our operations. Any of the foregoing could materially decrease our revenues and materially increase our costs and expenses.

FINANCIAL, TAX, AND INSURANCE RELATED RISKS

Our debt levels and related debt service obligations could negatively impact our intended capital allocation, and we may be unable to obtain debt at competitive rates, on commercially reasonable terms, or in sufficient amounts. We have outstanding debt and other financial obligations, and we depend, in part, upon the issuance of debt to fund our business requirements. The increased indebtedness of RTX in connection with the \$10 billion accelerated share repurchase (ASR) transactions that began in October 2023 and completed in September 2024 may have various negative impacts on our business. These include shifting significant cash flow from operations to debt principal and interest payments, which will reduce funds we have available for

other purposes, such as acquisitions, research and development, and other reinvestments in our businesses, and dividends and common stock repurchases. It could also reduce our flexibility in planning for, or reacting to, changes in our business and market conditions. It exposes us to interest rate and credit market risk at the time of refinancing outstanding debt, as well as these same risks on our commercial paper obligations, which are issued at variable rates.

In addition, if we require additional funding in order to fund outstanding financing commitments or meet other business requirements, a number of factors could cause us to incur increased borrowing costs and to have greater difficulty accessing public and private markets for debt, any of which may adversely affect our ability to fund our business requirements. These factors include disruptions or declines in the global capital markets and/or a decline in our financial performance, outlook, or credit ratings. Downgrades of our credit ratings may result, if we are unable to meet operating expectations and our cash flow expectations, or to the extent that we are unable to reduce our outstanding debt according to planned timeframes.

We use estimates in accounting for many of our programs, and changes in our estimates could adversely affect our future financial results. Accounting for long-term contracts and related assets requires estimates and judgments related to our progress toward completion and the long-term performance on the contract. Significant judgments include potential risks associated with the ability and cost to achieve program schedule, including customer-directed delays or reductions in scheduled deliveries, and technical and other specific contract requirements including customer activity levels and variable consideration based upon that activity. Due to the nature of the work required to be performed on many of our performance obligations, the estimation of total revenues and cost at completion is complex and subject to many variables. Management must make assumptions and estimates regarding contract revenue and cost (such as estimates of variable consideration, including award fees and penalties), including with respect to: (1) labor productivity and availability; (2) the complexity and scope of the work to be performed; (3) the availability and cost of materials including any impact from changing costs or inflation; (4) the length of time to complete the performance obligation; (5) execution by our subcontractors; (6) the availability and timing of funding from our customer; (7) overhead cost rates; and (8) current and past maintenance cost and frequency driven by estimated aircraft and engine utilization and estimated useful lives of components, among other variables. Cost estimates may also include the estimated cost of satisfying our industrial cooperation agreements, sometimes in the form of either offset obligations or ICIP agreements, required under certain contracts. In addition, in 2023 Pratt & Whitney determined that a rare condition in powder metal used to manufacture certain engine parts requires accelerated inspection of the PW1100 GTF fleet, which powers the A320neo family of aircraft. This determination and corresponding fleet actions have resulted in, and are expected to continue to result in, significant incremental shop visits necessary to perform inspections on PW1100 GTF engines as compared to estimates prior to this determination. Actual and future estimated aircraft on ground levels for the A320neo family of aircraft have therefore increased. The expected financial impact of the powder metal issue is based on historical experience and is subject to various assumptions and judgments, including, without limitation, the number and expected timing of shop visits, inspection results and scope of work to be performed, turnaround time, availability of parts, available capacity at overhaul facilities, and outcomes of negotiations with impacted customers, and these assumptions are subject to variability. Because of the significance of management's judgments and estimation processes described above, it is likely that materially different amounts could be recorded if we used different assumptions or if the underlying circumstances were to change. Changes in underlying assumptions, circumstances, or estimates may adversely affect our future results of operations and financial condition.

Significant changes in key estimates and assumptions with respect to our retirement plans, such as discount rate, expected return on plan assets (EROA), and other actuarial factors, could affect our future earnings, equity, and pension contributions. We must determine our pension and other postretirement benefit plans' expense or income, which involves significant judgment particularly with respect to our discount rate, EROA, and other actuarial assumptions. These assumptions are evaluated annually at December 31 and when significant events require a mid-year remeasurement. They may change significantly due to changes in economic, legislative, regulatory, and/or demographic experience or circumstances. Changes in our assumptions or actual experience that differs from these assumptions, as well as management changes to retirement plans, could impact our pension and postretirement net periodic (income) expense, the plans' funded status, and/or the required cash contributions to such plans, which could negatively impact our results of operations, financial condition, or liquidity. Our plan assets are invested in accordance with our investment management objectives and are subject to market volatility and other conditions.

Additional tax expense or exposures could affect our future profitability. We are subject to income taxes in the United States and international jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes. In the ordinary course of our business, there are transactions and calculations where the ultimate tax determination is uncertain. Changes in tax laws and regulations, as well as changes and conflicts in related interpretations and other tax guidance, and fluctuations in taxable income could materially impact our tax receivables and liabilities and our deferred tax assets and deferred tax liabilities, as well as our income tax expense and tax payments. Additionally, in the ordinary course of business, we are subject to examinations by various tax authorities. In addition to ongoing examinations, there could be additional

examinations launched in the future by governmental authorities in various jurisdictions, and existing examinations could be expanded. The final determination of tax audits and any related litigation could be materially different from our historical income tax provisions and accruals. Additionally, changes in the geographic mix of our sales could impact our tax liabilities and affect our income tax expense and profitability. The global and diverse nature of our operations means that these risks will continue to exist and additional examinations, proceedings, and contingencies will arise from time to time. Our results of operations, financial condition, or liquidity could be negatively impacted by any of the above factors, the outcome of any one of which cannot be predicted with certainty.

Goodwill and other intangible assets represent a significant portion of our assets, and any impairment of these assets could negatively impact our results of operations and financial condition. A significant portion of our assets consists of goodwill and other intangible assets, primarily recorded as the result of historical acquisitions or investments in businesses. We may subsequently experience unforeseen events that could adversely affect the value of our goodwill or intangible assets. Our goodwill and indefinite-lived intangible assets are subject to an impairment test annually and are also tested for impairment whenever facts and circumstances indicate that goodwill or indefinite-lived intangible assets may be impaired. In the event of an impairment, any excess of the carrying value of these assets over the fair value must be written off in the period of determination. Finite-lived intangible assets are generally amortized over the useful life of such assets. Future determinations of significant impairments of goodwill or indefinite-lived intangible assets as a result of an impairment test or accelerated amortization of finite-lived intangible assets could have a negative impact on our results of operations and financial condition.

Quarterly cash dividends and share repurchases are subject to uncertainties and may affect our common stock price. Quarterly cash dividends and share repurchases under our share repurchase program generally constitute components of our capital allocation strategy, which we fund through a combination of operating free cash flow, borrowings, and proceeds from divestitures. However, we are not required to declare dividends or make any share repurchases under our share repurchase program. Dividends and share repurchases may be discontinued, accelerated, suspended, or delayed at any time without prior notice. Even if not discontinued, the amount of such dividends and repurchases may be changed, and the amount, timing, and frequency of such dividends and repurchases may vary from historical practice or from the company's stated expectations. Decisions with respect to dividends and share repurchases are subject to the discretion of our Board of Directors and are based on a variety of factors. In addition, pursuant to a January 7, 2026 Executive Order, the Secretary of War could seek to limit our ability to pay cash dividends or make share repurchases if the Secretary of War determines that we have underperformed or lacked sufficient prioritization of, investment in or production speed in carrying out / performing under our U.S. government contracts. Other important factors that could cause us to discontinue, limit, suspend, increase, or delay our quarterly cash dividends or share repurchases include market conditions, the price of our common stock, the nature and timing of other investment opportunities, changes in our business strategy, the terms of our financing arrangements, our outlook as to the ability to obtain financing at attractive rates, the impact on our credit ratings, the availability of domestic cash, and overall business expectations. The reduction or elimination of our cash dividend, or suspension or elimination of our share repurchase program could adversely affect the market price of our common stock. Additionally, there can be no assurance that any share repurchases will enhance shareowner value because the market price of our common stock may decline below the levels at which we repurchased shares of common stock, and short-term stock price fluctuations could reduce the program's effectiveness.

See Item 5. "Market for Registrant's Common Equity, Related Stockholder Matters, and Issuer Purchases of Equity Securities" in this Form 10-K for a description of our share repurchase program and past share repurchases.

We face certain significant risk exposures and potential liabilities that may not be adequately covered by indemnity or insurance. A significant portion of our business relates to designing, developing, and manufacturing advanced aerospace, defense, and technology systems and products. New technologies may be untested or unproven. In addition, we may incur significant liabilities that are unique to our products and services. In some, but not all, circumstances, we may be entitled to indemnification from our customers through contractual provisions, and we may obtain limitations of liability and additional defenses for various reasons including the qualification of our products and services by the Department of Homeland Security under the SAFETY Act provisions of the Homeland Security Act of 2002. The insurance coverage we maintain or indemnification to which we may be contractually or otherwise entitled may not be adequate to cover all claims or liabilities. Accordingly, we may be forced to bear substantial costs resulting from risks and uncertainties of our business, which would negatively impact our results of operations, financial condition, and liquidity. Any accident, failure of, or defect in our products and services, even if fully indemnified or insured, could negatively affect our reputation among our customers and the public, and make it more difficult for us to compete effectively. It could also affect the cost and availability of insurance in the future.

STRATEGIC INITIATIVE AND TRANSACTION RISKS

We may be unable to realize expected benefits from strategic initiatives. In order to operate more effectively and efficiently, from time to time we undertake strategic and other operational initiatives. For example, we are undergoing significant, multi-

year digital transformation initiatives to improve our business, modernize operations, and reduce costs. Under these initiatives, we are leveraging digital capabilities throughout the way in which we conduct our business and provide our products and services to customers, including how we design, build, and maintain our products and services and operate our facilities. We also use our Customer Oriented Results and Excellence (CORE) operating system to drive continuing improvement into our processes and facilities. In addition, we continue to invest in structural cost reduction in our facilities, including aligning work to more efficient manufacturing centers, implementing advanced manufacturing capabilities including digital initiatives and automation, and closing facilities that are not required to meet future capacity and work needs. Other initiatives include the pursuit of advanced technologies and new business acquisitions and subsequent integrations. For example, we continue to invest in the integration of artificial intelligence technologies into our processes and business operations. We also implement restructuring plans from time to time. Restructuring activities include or may result in reductions of the workforce, the number of global facilities, procurement costs, legal entity and operational reorganizations, and other cost reduction initiatives. These strategic activities are complex and require the investment of resources including in personnel and systems. If we do not successfully manage our current or future strategic initiatives, expected efficiencies and benefits might be delayed or not realized, and our operations and business could be disrupted. In addition, certain U.S. government contracts and programs have begun to require digital engineering and other digital capabilities, and our inability to achieve these capabilities with respect to these programs timely may result in loss of revenues. Risks associated with workforce management issues include unfavorable political responses to such actions, unforeseen delays in the implementation of anticipated workforce reductions, additional unexpected costs, adverse effects on employee morale, and the failure to meet operational targets due to the loss of employees or work stoppages. Any of the above factors may impair our ability to achieve anticipated benefits, or otherwise harm our business, or have a material adverse effect on our competitive position, results of operations, financial condition, or liquidity.

Failure to successfully manage and execute potential future acquisitions, investments, divestitures, joint ventures, and other transactions, and other risks associated with these activities could adversely affect our future financial results. In pursuing our business strategies, we continually review, evaluate, and consider potential investments, acquisitions, divestitures, joint ventures, and other teaming and collaborative arrangements. We undertake to identify opportunities that will complement our existing products and services or customer base, as well as expand our offerings and business opportunities into new areas that naturally extend from our core capabilities. In evaluating such transactions, we are required to make difficult judgments regarding the value of business opportunities, technologies, and other assets, and the risks and cost of potential liabilities. Further, these transactions involve certain other risks and uncertainties including: (1) the risks involved with entering new markets; (2) the difficulty in integrating newly-acquired businesses and managing or monitoring other collaborative business arrangements; (3) the complexity of separating a portion of our business to enable a divestiture; (4) the risk that we may be unable to execute potential transactions, if at all, within the expected timeline, on acceptable financial or other terms and conditions; (5) continued financial involvement in divested businesses, such as through continued equity ownership, guarantees, retained assets or liabilities, transition services or other ongoing commercial commitments, indemnities, or other current or contingent financial or commercial commitments, following a divestiture; (6) challenges and failures in achieving strategic objectives and other expected benefits, which may result in certain liabilities to us for guarantees and other commitments; (7) the risk that regulatory authorities may deny our proposed transactions, or may impose on those transactions conditions that undermine the strategic rationale, reduce the financial benefit of, or jeopardize the consummation of those transactions; (8) unidentified issues not discovered in RTX's due diligence; (9) the diversion of our attention and resources from our operations and other initiatives; (10) the potential impairment of acquired assets; (11) the performance of underlying products, capabilities, or technologies; and (12) the performance or potential loss of key employees and customers of acquired businesses. In addition, future transactions may impact our deployment of capital, including dividends, share repurchases, pension contributions, and investments.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 1C. CYBERSECURITY

As a global aerospace and defense company serving commercial and government customers in the aerospace industry and domestic and international military and government customers as a defense contractor, we are the target of advanced and persistent cyber-attacks from a variety of sources. Our products and services are highly sophisticated and specialized, involve complex advanced technologies including information technology (IT) systems, and process, store, or transmit highly sensitive unclassified and classified information. Moreover, our products and services are often integrated with third-party products and services. Cybersecurity threats include attacks on, or other attempts to infiltrate, our IT infrastructure and the IT infrastructure of our customers, suppliers, subcontractors, and other third parties, attempting to gain unauthorized access to our confidential or other proprietary information, classified information, or information relating to our employees, customers, and other third parties, or to disrupt our systems or the systems of our customers, suppliers, subcontractors, and other third parties.

Cybersecurity threats also include attempts to infiltrate our products or services, such as attacks targeting the security, confidentiality, integrity or availability of the hardware, software and information installed, stored, or transmitted in our products, which may occur after the purchase of those products or when they are incorporated into third-party products, facilities, or infrastructure.

Our Cybersecurity Program

Given the nature of our business and the cybersecurity risks we face, we have a robust cybersecurity program for identifying, assessing, and managing cybersecurity risks, which include material risks from cybersecurity threats, to our internal systems, our products, services and programs for customers, and our supply chain. Our cybersecurity program is made up of two components: our enterprise cybersecurity program and our cybersecurity program for our products and services.

Enterprise Cybersecurity. Our enterprise cybersecurity program aligns with the National Institute of Standards and Technology (NIST) standards. Our program includes processes and controls for the deployment of new IT systems by the Company and controls over new and existing system operation. We monitor and conduct regular testing of these controls and systems, including vulnerability management through active discovery and testing to regularly assess patching and configuration status. In addition, we require our employees and contract workers to complete annual cybersecurity training, and we regularly conduct simulated phishing and cyber-related communications to educate individuals on the latest threats.

Product and Services Cybersecurity. Our product development processes apply development, security, and operations principles aligned with applicable government and commercial standards, and include vulnerability scanning and static and dynamic composition analysis. We regularly assess our product development processes, product cyber maturity, and the teams providing our secure services in relation to cybersecurity. In addition, we strive to meet all security requirements mandated by government and commercial customers and adhere to regulatory guidance and standards for system security engineering. Many of our products also undergo industry audits and regulatory compliance certifications, and our products delivered to the U.S. Department of War (DoW) (formerly referred to as the U.S. Department of Defense) must comply with DoW risk management requirements.

Cybersecurity for Systems used in Support of U.S. Government Customers. With respect to products and services provided to, and IT systems used in connection with programs for, the U.S. government, our cybersecurity program aligns with the NIST standards and meets the requirements of 32 CFR Part 117 and other applicable U.S. government guidance. The program includes authorization and assessment of new and existing IT systems by our customers and third parties. We monitor use on these systems, including vulnerability management through patching and configuration. In addition, we restrict user access and require authorized users to complete additional user and cybersecurity training.

Incident Response. Our cybersecurity program includes monitoring for potential security threats that may lead to exploitation of vulnerabilities. We evaluate and assign severity levels to incidents, escalate and engage incident response teams based on severity, and manage and mitigate the related risks. Incidents are reported internally to members of senior management and the Board of Directors as appropriate based on severity and incident type and are also analyzed for external reporting requirements. Our incident management process is designed to coordinate functions to enable continuity of essential business operation in the event of a cyber crisis.

Third-Party Service Providers. We engage third party service providers to expand the capabilities and capacity of our cybersecurity program, including for design, monitoring, and testing of the program's risk prevention and protection measures, and process execution including incident detection, investigation, analysis and response, eradication, and recovery.

Management of Third-Party Risks. Our suppliers, subcontractors, and other third-party service providers are subject to cybersecurity obligations and controls. We assess and periodically reassess the cybersecurity posture of third-party service providers who store, process, or transmit our information as a service, or connect to our networks. We also require our suppliers, subcontractors, and other third-party service providers to agree to cybersecurity-related contractual terms and conditions of purchase. Many of these third parties are also subject to regulatory requirements in mandatory government procurement clauses, including those contained in the Federal Acquisition Regulation (FAR) and the Defense Federal Acquisition Regulation Supplement (DFARS). Among other things, mandatory government procurement clauses obligate adherence to a generally accepted cybersecurity framework, such as NIST, and occasional assessment of the implementation of cybersecurity controls as a condition of contract award or during contract performance. Finally, we require these third parties to notify us of cybersecurity incidents that impact us.

Program Assessment. We continuously evaluate and seek to improve and mature our cybersecurity processes. Our cybersecurity program is regularly assessed through management self-evaluation and ongoing monitoring procedures to evaluate our program effectiveness, including assessments associated with internal controls over financial reporting as well as vulnerability management through active discovery and testing to validate patching and configuration. Additionally, our Internal Audit function regularly assesses our program effectiveness through audits of our systems and processes to help

maintain compliance with policies. As cybersecurity threats are continuously evolving, we also periodically engage with third parties to perform maturity assessments of our program to identify potential risk areas and improvement opportunities. This includes assessment of our overall program, policies and processes, compliance with regulatory requirements, and assessment of key vulnerabilities. We use these assessments to supplement our own evaluation of the overall health of our program and target improvement areas. Several external organizations also evaluate our enterprise cybersecurity program, including the Defense Contract Management Agency (DCMA) and Cybersecurity Maturity Model Certification Third-Party Assessment Organizations. Moreover, some of our products are audited or reviewed for regulatory compliance certification pursuant to the relevant DoW risk management framework.

Board Oversight and Management's Role

Enterprise Cybersecurity. Our Board of Directors has primary oversight responsibility for enterprise cybersecurity risks. The Special Activities Committee of the Board supports the Board in oversight of classified business cybersecurity, including with respect to Company internal information and operational technology systems. The Audit Committee also considers enterprise cybersecurity risks in connection with its financial and compliance risk oversight role.

Our global chief information security officer (CISO), under the direction of our chief digital officer, leads our enterprise cybersecurity program and is responsible for assessing and managing enterprise cybersecurity risks. Our CISO regularly updates the Board of Directors on cybersecurity risks as they relate to our information and operational technology systems, our suppliers, and other third-party service providers, in addition to updates on enterprise cybersecurity incidents and key Company defenses and mitigation strategies.

Our CISO is an experienced cybersecurity senior executive with more than 25 years' experience building and leading cybersecurity, risk management, and IT teams. In performing his role, he regularly reviews enterprise cybersecurity risks, controls, program policy, and processes, including training, oversees policy and program development, implementation and updates, and informs senior leadership on cybersecurity-related issues and activities affecting the organization. Our CISO is regularly apprised of enterprise cybersecurity events, threats, and activities, including with respect to incidents, protection vulnerabilities, software update needs, and lifecycle status.

Product and Services Cybersecurity. The Special Activities Committee of our Board of Directors has primary oversight responsibility for cybersecurity risks related to our products and services. The full Board of Directors also receives periodic briefings from management regarding the Company's products and services cybersecurity risks. The Audit Committee also considers product and services cybersecurity risks in connection with its financial and compliance risk oversight role.

Our product cybersecurity officer (PCO), under the direction of our chief technology officer, leads our cybersecurity program for our products and services and is responsible for assessing and managing related cybersecurity risks. Our PCO updates the Special Activities Committee on cybersecurity risks as they relate to our products and services, in addition to updates on product and service cybersecurity incidents, defenses, and mitigation strategies.

Our PCO is an experienced embedded systems engineer and chief engineer with 20 years' experience in the development, product assurance, and security of critical and highly regulated embedded and other computer systems in medical, aviation, and military products and services. In performing her role, she regularly reviews cybersecurity risks, controls, program policy and processes, including training, and oversees and advises teams performing policy and program development, implementation, and updates. Our PCO is regularly apprised of product and service cybersecurity events, threats, and activities including with respect to incidents, protection vulnerabilities, software update needs, and lifecycle status.

Enterprise Risk Management

Our cybersecurity risk processes are a key element of our Enterprise Risk Management (ERM) process, which is designed to identify and evaluate the full range of significant risks to RTX. As part of our ERM program, RTX's functional and operations departments identify and manage enterprise risks on an annual cycle. The process consists of structured reviews, discussions, and mitigation planning, and includes risks identified by our Enterprise Cybersecurity and Product Cybersecurity functions as part of the overall review of significant risks to RTX. The top ERM risks are compiled annually and shared with the Audit Committee of the Board of Directors as well as the full Board of Directors. In addition, Internal Audit incorporates these risks into its continuous risk assessment process and periodically audits specific ERM risks.

For more information on risks related to cybersecurity, see Item IA. "Risk Factors" of this Form 10-K.

ITEM 2. PROPERTIES

We have significant properties in approximately 25 countries, with approximately 450 significant properties comprising approximately 75 million square feet of productive space. Approximately 30% of our square footage related to our significant

properties is leased, and 70% is owned. Approximately 70% of our square footage related to our significant properties is located in the United States.

Our fixed assets as of December 31, 2025 include manufacturing facilities and non-manufacturing facilities such as warehouses, laboratories, office space, and a substantial quantity of machinery and equipment, including general purpose machinery and equipment using special jigs, tools, and fixtures and in many instances having automatic control features and special adaptations. The facilities, warehouses, machinery, and equipment in use as of December 31, 2025 are in good operating condition and are well-maintained.

ITEM 3. LEGAL PROCEEDINGS

We are subject to a number of lawsuits, investigations, and claims (some of which involve substantial amounts). For a discussion of contingencies related to certain legal proceedings, see “Note 17: Commitments and Contingencies” within Item 8 of this Form 10-K. Except as otherwise noted, while we are unable to predict the final outcome, based on information currently available, we do not believe that resolution of any of these matters will have a material adverse effect upon our competitive position, results of operations, financial condition, or liquidity.

A further discussion of government contracts and related investigations, as well as a discussion of our environmental liabilities, can be found under the heading “Other Matters Relating to Our Business” within Item 1. “Business” of this Form 10-K and in Item 1A. “Risk Factors” of this Form 10-K.

Pursuant to the Securities and Exchange Commission (SEC) regulations, for proceedings under environmental laws to which a government authority is a party and we reasonably believe such proceedings will result in monetary sanctions, we have adopted a disclosure threshold of \$1 million.

Environmental Enforcement Proceeding

The Colorado Department of Public Health and Environment (CDPHE) issued a Notice of Violation/Cease and Desist Order (NOV/CDO) to Raytheon Company on January 31, 2023, alleging violations of a water discharge permit at a former Raytheon Company facility in Boulder, Colorado. On March 27, 2024, the CDPHE informed Raytheon Company that it was seeking a penalty in the amount of approximately \$1 million in connection with the alleged violations and was requiring Raytheon Company to undertake a compliance program. In order to resolve the NOV/CDO, on October 6, 2025, Raytheon Company signed a Compliance Order on Consent (COC) with the CDPHE under which, without any admission of fault or liability, it agreed to pay \$458,211 in civil penalties and to perform certain remediation work at the former facility under an agreed upon compliance schedule. Raytheon Company paid the civil penalties in the fourth quarter of 2025.

737 MAX Aircraft Litigation

Multiple lawsuits were filed in U.S. courts relating to the October 29, 2018 Lion Air Flight 610 and the March 10, 2019 Ethiopian Airlines Flight 302 accidents. Collins Aerospace (Collins) sold certain aircraft parts and systems to The Boeing Company for the 737 MAX aircraft involved in these accidents. Certain of our Collins businesses were named, along with other third parties, as parties in many of these lawsuits. All lawsuits related to the Lion Air flight have been resolved, and the Collins businesses have obtained a full release. Only one lawsuit related to the Ethiopian Airlines flight remains pending, and we anticipate during 2026 the lawsuit will either be resolved or the claims against the Collins businesses will be dismissed.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES

RTX Corporation's common stock is listed on the New York Stock Exchange under the ticker symbol "RTX." There were 35,327 registered shareowners at December 31, 2025. The information required by Item 5 with respect to securities authorized for issuance under equity compensation plans is contained within Item 12 of this Form 10-K.

Stock Performance Graph

The following graph presents the cumulative total shareowner return for the five years ending December 31, 2025 for our common stock as compared to the Standard & Poor's 500 Stock Index and the S&P 500 Aerospace & Defense (A&D) Index. These figures assume that all dividends paid over the five-year period were reinvested, and that the starting value of each index and the investment in common stock was \$100.00 on December 31, 2020.

Comparison of Cumulative Five Year Total Return

Company/Index	Annual Return Percentage Years Ending				
	12/31/2021	12/31/2022	12/31/2023	12/31/2024	12/31/2025
RTX Common Stock	23.27	20.01	(14.44)	40.76	61.44
S&P 500 Index	28.71	(18.11)	26.29	25.02	17.88
S&P 500 Aerospace & Defense Index	13.22	17.37	6.77	14.40	41.98

Company/Index	Indexed Returns Years Ending					
	Base Period 12/31/2020	12/31/2021	12/31/2022	12/31/2023	12/31/2024	12/31/2025
RTX Common Stock	\$ 100.00	\$ 123.27	\$ 147.94	\$ 126.58	\$ 178.17	\$ 287.64
S&P 500 Index	100.00	128.71	105.40	133.10	166.40	196.16
S&P 500 Aerospace & Defense Index	100.00	113.22	132.89	141.88	162.31	230.45

Comparison of Cumulative Five Year Total Return

Issuer Purchases of Equity Securities

The following table provides information about our purchases of equity securities that are registered by us pursuant to Section 12 of the Exchange Act during the quarter ended December 31, 2025.

2025	Total Number of Shares Purchased (000's)	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program (000's)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program (dollars in millions)
October 1 - October 31	—	\$ —	—	\$ 615
November 1 - November 30	—	—	—	615
December 1 - December 31	—	—	—	615
Total	—	\$ —	—	

On October 21, 2023, our Board of Directors authorized a share repurchase program for up to \$11 billion of our common stock, replacing the previous program announced on December 12, 2022. Under the 2023 program, shares may be purchased on the open market, in privately negotiated transactions, under accelerated share repurchase programs, and under plans complying with Rules 10b5-1 and 10b-18 under the Securities Exchange Act of 1934, as amended.

We may also reacquire shares outside of the program in connection with the surrender of shares to cover taxes on vesting of restricted stock. Our ability to repurchase shares is subject to applicable law. During the quarter ended December 31, 2025, we did not repurchase shares outside of the program.

ITEM 6.

Reserved.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to provide information to the reader in understanding our consolidated financial statements and notes thereto included in Item 8. "Financial Statements and Supplementary Data" of this Form 10-K, the changes in certain key items in those financial statements between select periods, and the primary factors that accounted for those changes. In addition, we discuss certain accounting principles, policies, and critical estimates that affect our financial statements. Our discussion also contains some additional context regarding our business, including industry considerations and the business environment, as well as certain forward-looking statements related to future events and expectations. This MD&A should be read in conjunction with the other sections of this Form 10-K, including Item 1A. "Risk Factors."

BUSINESS OVERVIEW

We are a global premier systems provider of high technology products and services to the aerospace and defense industries. We operate in three principal business segments: Collins Aerospace (Collins), Pratt & Whitney, and Raytheon. Unless the context otherwise requires, the terms "we," "our," "us," "the Company," and "RTX" mean RTX Corporation and its subsidiaries.

Industry Considerations

Our worldwide operations can be affected by industrial, economic, and political factors on both a regional and global level. Our operations include original equipment manufacturer (OEM) and extensive related aftermarket parts and services related to our aerospace operations. Our defense business serves both domestic and international customers primarily as a prime contractor or subcontractor on a broad portfolio of defense and related programs for government customers. Our business mix also reflects the combination of shorter cycles in our commercial aerospace spares contracts and certain service contracts in our defense business, and longer cycles in our aerospace OEM and aftermarket maintenance contracts and on our defense contracts to design, develop, manufacture, or modify complex equipment. Our customers are in the public and private sectors, and our businesses reflect an extensive geographic diversification that has evolved with continued globalization.

Government legislation, policies, and regulations can impact our business and operations. Changes in environmental and climate change-related laws or regulations, including regulations on greenhouse gas emissions, carbon pricing, and energy taxes, could lead to new or additional investment in product designs and facility upgrades and could increase our operational and environmental compliance expenditures, including increased energy and raw materials costs and costs associated with manufacturing changes. In addition, government and industry-driven safety and performance regulations, restrictions on aircraft engine noise and emissions, government imposed travel restrictions, and government procurement practices can impact our businesses.

Collins and Pratt & Whitney serve both commercial and government aerospace customers. Revenue passenger miles (RPMs), available seat miles, and the general economic health of airline carriers and airframers, as well as the financial strength and performance of airframers, are key barometers for our commercial aerospace operations. Performance in the general aviation sector is closely tied to the overall health of the economy and is positively correlated to corporate profits. Many of our aerospace customers are covered under long-term aftermarket service agreements at both Collins and Pratt & Whitney, which are inclusive of both spare parts and services.

Our defense operations are affected by U.S. Department of War (DoW) (formerly referred to as the U.S. Department of Defense) budget and spending levels, changes in demand, changes in policy positions or priorities, the domestic and global political and economic environment, and the evolving nature of the global and national security threat environment. In addition, our defense businesses engage in both direct commercial sales, which generally require U.S. government licenses and approvals, as well as foreign military sales, which are government-to-government transactions initiated by, and carried out at the direction of, the U.S. government. Changes in these budget and spending levels, policies, or priorities, which are subject to U.S. domestic and foreign geopolitical risks and threats, may impact our defense businesses, including the timing of and delays in U.S. government licenses and approvals for sales, the risk of sanctions, or other restrictions.

Other Matters

Global, economic, and political conditions, changes in raw material and commodity prices and supply, labor availability and costs, inflation, interest rates, potential changes in U.S. government policy positions, including changes in DoW policies or priorities, geopolitical conflicts and strained intercountry relations, U.S. and non-U.S. tax law changes, foreign currency exchange rates, sanctions, tariffs, energy costs and supply, levels of air travel, the financial condition of commercial airlines, and the impact from natural disasters and weather conditions create uncertainties that could impact our businesses.

Legal Matters. As previously disclosed, in 2024 the Company resolved several outstanding legal matters, herein referred to as "Resolution of Certain Legal Matters." See "Note 17: Commitments and Contingencies," within Item 8 of this Form 10-K, for additional information.

Pratt & Whitney Powder Metal Matter. As described further in “Note 17: Commitments and Contingencies,” within Item 8 of this Form 10-K, in 2023, Pratt & Whitney determined that a rare condition in powder metal used to manufacture certain engine parts requires accelerated inspection of the PW1100G-JM (PW1100) Geared Turbofan (GTF) fleet, which powers the A320neo family of aircraft (A320neo) (herein referred to as the “Powder Metal Matter”).

Global Supply Chain. We are dependent on a global supply chain and have experienced supply chain disruptions that resulted in delays and increased costs and adversely affected our performance. These disruptions impacted our ability to procure raw materials, including certain rare earth elements, microelectronics, and certain commodities on a timely basis and/or at expected prices, and are driven by supply chain market constraints and macroeconomic conditions, including inflation and labor market shortages. Current geopolitical conditions, including conflicts and other causes of strained intercountry relations, as well as sanctions and other trade restrictive activities, such as tariffs and export controls, are contributing to these issues. Furthermore, our suppliers and subcontractors have been impacted by these same issues. We have implemented actions and programs to mitigate some of the impacts but anticipate supply chain disruptions to continue.

Economic Environment. The inflationary environment has increased material and component prices, labor rates, and supplier costs and has negatively impacted our performance, including our productivity expectations. Due to the nature of our government and commercial aerospace businesses, and their respective customer and supplier contracts, we are not always able to offset cost increases by increasing our contract value or pricing, in particular on our fixed-price contracts. Increasing material, component, and labor prices could subject us to losses in our fixed price contracts in the event of cost overruns. In addition, higher interest rates have increased the cost of borrowing and tightened the availability of capital. Among other things, these effects can constrain our customers’ purchasing power and decrease orders for our products and services and impact the ability of our customers to make payments and our suppliers to perform. Moreover, changes in the macroeconomic environment, including volatility with respect to global trade policy, interest rates, and financial markets, can lead to economic uncertainty, an economic downturn or recession and impact the demand for our products and services as well as our supply chain. We continue to pursue strategic and operational initiatives to help address these macroeconomic pressures, including our digital transformation, operational modernization, cost reduction, and advanced technology programs, and we apply our Customer Oriented Results and Excellence (CORE) operating platform to the execution of these initiatives. However, the impact of these pressures and corresponding initiatives is uncertain and subject to a range of factors and future developments.

The global trade environment is highly dynamic. Since February 2025, the U.S. government has imposed tariffs on imports from all countries with which the U.S. engages in trade. In response, certain countries have announced, and in some cases imposed, tariffs, and non-tariff countermeasures on goods that are imported from the U.S. Our businesses and suppliers import goods subject to U.S. imposed tariffs, as well as goods subject to counter tariffs imposed by other countries. We continue to pursue available options to mitigate the impact of tariffs and countermeasures, including (i) utilizing available exemptions or exclusions to tariffs, such as trade agreements, treaties or other statutory relief, (ii) evaluating operational and supply chain changes, and (iii) where feasible, increasing the prices of our goods and services. Our results for 2025 reflect our best estimate of the impact of the tariffs then in effect. As the duration, extent and enforceability of the tariffs and counter tariffs remain uncertain, we are continuing to evaluate the potential future impacts of the imposition of the announced tariffs to our business and financial condition. Based on current conditions, we do not believe that the tariffs announced by the U.S. or counter tariffs or other actions taken by other countries will have a material adverse effect upon our results of operations, financial condition, or cash flows. However, the actual financial impacts of tariffs are dependent upon various factors, most notably, the scope of goods covered by tariffs, the value of our imports subject to tariffs, the rate of tariffs applied, the timing and duration of tariffs, the enforceability of tariffs and counter-tariffs, the implementation of tariff and non-tariff countermeasures by countries subject to U.S. tariffs, and our and our suppliers’ ability to mitigate the impacts of tariffs. Changes in any of these factors and actual tariff costs incurred could significantly affect the estimates inherent in our financial statements, including those used in our estimates-at-completion (EACs), and estimates supporting the recoverability of our inventories, contract fulfillment costs, deferred tax assets, intangible assets and goodwill, and could have a material effect on our results of operations and cash flows in the periods recognized and paid.

U.S. Government’s Budget, Tax Legislation and Executive Orders. On February 3, 2026, Congress passed and the President signed a spending package to end a U.S. government shutdown. The spending package funds the government through the end of the government’s fiscal year, with the exception of the Department of Homeland Security, which remains subject to a continuing resolution.

On July 4, 2025, “An Act to Provide for Reconciliation Pursuant to Title II of the H. Con. Res. 14” (the Act) was enacted. The Act provides for several corporate tax changes including, but not limited to, restoring full expensing of domestic research and

development costs, restoring immediate deductibility of certain capital expenditures, and changes in the computations of U.S. taxation on international earnings. See “Note 12: Income Taxes,” within Item 8 of this Form 10-K, for additional information.

The Act also provides a supplementary \$156.2 billion to the DoW for obligations through 2029, which includes \$24.4 billion for the Golden Dome for America project. The project, outlined in a January 27, 2025 Executive Order, calls for the development and deployment of a next-generation missile defense shield. On May 20, 2025, the DoW announced a draft architecture and implementation plan for the system. With next generation technologies across land, sea and space that build upon existing, proven defense capabilities, RTX’s portfolio is well-positioned to play a role in delivering reliable solutions for the Golden Dome for America initiative. Whether this Executive Order or corresponding funding will have a material impact on our business or results of operations will depend on a variety of factors, including actual awards, award timelines, mission priorities, and future budget determinations. The Act also includes \$25.4 billion in funding to enhance DoW resources for munitions and supply chain resiliency. As a leading munitions manufacturer, RTX is strategically situated to play a key role in supporting this initiative.

The President has also issued multiple executive orders, including one intended to reform the DoW’s defense acquisition processes and promote expedited and streamlined acquisitions. Following issuance of those orders, the Secretary of War issued a memorandum and released the DoW’s Acquisition Transformation Strategy, which is aligned with the executive orders and seeks to overhaul the existing defense acquisition system through process changes that prioritize speed, flexibility, and rigorous execution. A subsequent executive order was issued that may limit corporate distributions, share repurchases, and executive compensation incentives during periods of defense contractor underperformance, insufficient prioritization, investment or production speed under their U.S. Government contracts. We are monitoring how these executive orders and related actions will be implemented and any potential future impacts to our business. While those impacts are uncertain, a limitation on our ability to issue distributions or engage in share repurchases related to the defense contractor performance executive order could adversely affect the market price of our common stock.

Geopolitical Matters. In response to Russia’s invasion of Ukraine, the U.S. government and the governments of various jurisdictions in which we operate, have imposed broad economic sanctions and export controls targeting specific industries, entities, and individuals in Russia. The Russian government has implemented similar counter-sanctions and export controls targeting specific industries, entities, and individuals in the U.S. and other jurisdictions in which we operate, including certain members of the Company’s management team and Board of Directors. These government measures, among other limitations, restrict transactions involving various Russian banks and financial institutions and impose enhanced export controls limiting transfers of various goods, software, and technologies to and from Russia, including broadened export controls specifically targeting the aerospace sector. These measures have adversely affected, and could continue to adversely affect, the Company and/or our supply chain, business partners, or customers; however, based on information available to date, we do not currently expect these issues will have a material adverse effect on our financial results. We will continue to monitor future developments, including additional sanctions and other measures, that could adversely affect the Company and/or our supply chain, business partners, or customers.

In February 2023, China announced sanctions against Raytheon Missiles & Defense (RMD) (a former RTX business segment which became part of the Raytheon business during the third quarter of 2023), and previously announced it may take measures against RTX, in connection with certain foreign military sales to Taiwan. The Chinese sanctions against RMD included a fine equal to twice the value of the arms that RMD sold to Taiwan since September 2020. Since that time, China has announced additional sanctions against the Raytheon business and a Collins joint venture. If China were to impose additional sanctions, enforce announced sanctions, or take other regulatory action against RTX, our suppliers, affiliates, or partners, it could potentially disrupt our business operations. Any impact of these or other potential sanctions or other actions by China, is uncertain.

We have direct commercial sales contracts for products and services to certain foreign customers, for which U.S. government review and approval have been pending. The U.S. government’s approval of these sales is subject to a range of factors, including its foreign policies related to these customers, which are subject to continuing review and potential changes. Likewise, regulatory approvals previously granted for prior sales can be paused or revoked if the products and services have not yet been delivered to the customer. In addition, certain programs require approvals by foreign governments, and those approvals may not be obtained on a timely basis or at all or may be revoked. If we ultimately do not receive all of the regulatory approvals, or those approvals are revoked, it could have a material effect on our financial results.

We continue to closely monitor potential impacts to RTX’s business, customers, suppliers, employees, and operations in Israel, the Middle East, and the region at large due to continued regional instability and tensions.

See Item 1A. “Risk Factors” within Part I of this Form 10-K for further discussion.

FINANCIAL SUMMARY

We use the following key financial performance measures to manage our business on a consolidated basis and by business segment, and to monitor and assess our results of operations:

- Net sales: a metric that measures our revenue for the current year;
- Operating profit: a measure of our profit for the year, before non-operating expenses (income), net and income tax expense;
- Operating profit margin: a measure of our Operating profit as a percentage of Total net sales; and
- Operating cash flow: a measure of the amount of cash generated by our business operations.

<i>(dollars in millions)</i>	2025	2024	2023
Total net sales	\$ 88,603	\$ 80,738	\$ 68,920
Operating profit	9,300	6,538	3,561
Operating profit margin	10.5 %	8.1 %	5.2 %
Operating cash flow	\$ 10,567	\$ 7,159	\$ 7,883

In order to better assess the underlying performance of our business, we also focus on the change in organic net sales on both a consolidated basis and business segment basis, and the change in organic operating profit on a business segment basis, which allows for better year-over-year comparability. See “Results of Operations” below for our definition of the organic change in Net sales and Operating profit, which are non-Generally Accepted Accounting Principles (non-GAAP) measures that are not defined measures under U.S. Generally Accepted Accounting Principles (GAAP) and may be calculated differently by other companies.

We also focus on backlog as a key financial performance measure of our forward-looking sales growth. Total backlog was \$268 billion and \$218 billion as of December 31, 2025 and 2024, respectively. Backlog, which is equivalent to our remaining performance obligations (RPO) for our sales contracts, represents the aggregate dollar value of firm orders for which products have not been provided or service has not been performed and excludes unexercised contract options and potential orders under ordering-type contracts (e.g., indefinite-delivery, indefinite-quantity (IDIQ) type contracts). Backlog generally increases with bookings and/or orders and generally decreases as sales are recognized on these bookings and is affected by changes in foreign exchange rates, as well as contract cancellations and terminations, and cost underruns on cost-type contracts.

In addition, we maintain a strong focus on program execution and the prudent management of capital and investments in order to maximize operating income and cash. We focus on adjusted earnings per share (EPS) and measures to assess our cash generation and the efficiency and effectiveness of our use of capital, such as free cash flow, both of which are non-GAAP measures that are not defined measures under U.S. GAAP and may be calculated differently by other companies.

Considered together, we believe these metrics are strong indicators of our overall performance and our ability to create shareowner value. We also use these and other performance metrics for executive compensation purposes.

A discussion of our results of operations and financial condition follows below in “Results of Operations”, “Segment Review”, and “Liquidity and Financial Condition”.

RESULTS OF OPERATIONS

As described in our “Cautionary Note Concerning Factors That May Affect Future Results” of this Form 10-K, our period-to-period comparisons of our results, particularly at a segment level, may not be indicative of our future operating results. The following discussions of comparative results among periods, including the discussion of segment results, should be viewed in this context.

We provide the organic change in Net sales and Cost of sales for our consolidated results of operations as well as the organic change in Net sales and Operating profit for our segments. We believe that these non-GAAP measures are useful to investors because they provide transparency to the underlying performance of our business, which allows for better year-over-year comparability. The organic change in Net sales, Cost of sales, and Operating profit excludes acquisitions and divestitures, net, and the effect of foreign currency exchange rate translation fluctuations and other significant non-operational items and/or significant operational items that may occur at irregular intervals (Other). Additionally, the organic change in Cost of sales and Operating profit excludes restructuring costs, the FAS/CAS operating adjustment, and acquisition accounting adjustments. Restructuring costs generally arise from severance related to workforce reductions and facility exit costs. We are continuously evaluating our cost structure and implement restructuring actions in an effort to keep our cost structure competitive. The FAS/CAS operating adjustment represents the difference between the service cost component of our pension and postretirement benefit (PRB) expense under the Financial Accounting Standards (FAS) requirements of U.S. GAAP and our pension and PRB expense under U.S. government Cost Accounting Standards (CAS), primarily related to our Raytheon segment. Acquisition

accounting adjustments include the amortization of acquired intangible assets related to acquisitions, the amortization of the property, plant, and equipment fair value adjustment acquired through acquisitions, the amortization of customer contractual obligations related to loss making or below market contracts acquired, and goodwill impairment, if applicable.

Net Sales

<i>(dollars in millions)</i>	2025	2024	2023
Total net sales	\$ 88,603	\$ 80,738	\$ 68,920

The factors contributing to the total change year-over-year in Total net sales are as follows:

<i>(dollars in millions)</i>	2025	2024
Organic ⁽¹⁾	\$ 8,894	\$ 7,816
Acquisitions and divestitures, net	(1,179)	(1,291)
Other	150	5,293
Total change	\$ 7,865	\$ 11,818

(1) See “Results of Operations” for definition of organic. A reconciliation of this measure to reported U.S. GAAP amounts is provided in the table above.

Net sales increased \$8.9 billion organically in 2025, primarily due to higher organic sales of \$4.8 billion at Pratt & Whitney, \$2.6 billion at Collins, and \$1.7 billion at Raytheon.

The \$1.2 billion decrease in net sales related to Acquisitions and divestitures, net in 2025 was primarily driven by the sale of the actuation and flight control business within our Collins segment completed in the third quarter of 2025, the sale of the Simmonds Precision Products business within our Collins segment completed in the fourth quarter of 2025, the sale of the Cybersecurity, Intelligence and Services (CIS) business within our Raytheon segment completed in the first quarter of 2024, and the sale of the Goodrich Hoist & Winch business within our Collins segment completed in the fourth quarter of 2024.

Net sales increased \$7.8 billion organically in 2024, primarily due to higher organic sales of \$4.4 billion at Pratt & Whitney, \$2.1 billion at Collins, and \$1.7 billion at Raytheon.

The \$1.3 billion decrease in net sales related to Acquisitions and divestitures, net in 2024 was primarily driven by the sale of our CIS business within our Raytheon segment completed in the first quarter of 2024.

The increase in Other net sales of \$5.3 billion in 2024 was primarily driven by the absence of the net sales charge of \$5.4 billion associated with the Powder Metal Matter recognized in the third quarter of 2023.

See “Segment Review” below for further information by segment.

<i>(dollars in millions)</i>	2025	2024	2023	% of Total Net Sales		
				2025	2024	2023
Net sales						
Products	\$ 64,171	\$ 59,612	\$ 49,571	72 %	74 %	72 %
Services	24,432	21,126	19,349	28 %	26 %	28 %
Total net sales	\$ 88,603	\$ 80,738	\$ 68,920	100 %	100 %	100 %

Refer to “Note 20: Segment Financial Data” within Item 8 of this Form 10-K for the composition of external net sales by products and services by segment.

Net products sales increased \$4.6 billion in 2025 compared to 2024, primarily due to increases in external products sales of \$2.2 billion at Pratt & Whitney, \$1.2 billion at Collins, and \$1.2 billion at Raytheon.

Net services sales increased \$3.3 billion in 2025 compared to 2024, primarily due to increases in external services sales of \$2.7 billion at Pratt & Whitney, \$0.5 billion at Collins, and \$0.1 billion at Raytheon.

Net products sales increased \$10.0 billion in 2024 compared to 2023, primarily driven by the absence of the net sales charge of \$5.3 billion associated with the Powder Metal Matter, and increases in external product sales of \$2.4 billion at Pratt & Whitney, \$1.2 billion at Collins, and \$1.0 billion at Raytheon.

Net services sales increased \$1.8 billion in 2024 compared to 2023, primarily due to increases in external services sales of \$2.0 billion at Pratt & Whitney, including the absence of a services sales charge of \$0.1 billion associated with the Powder Metal Matter, and a \$0.4 billion increase at Collins, partially offset by a decrease in external services of \$0.7 billion at Raytheon, primarily driven by the sale of our CIS business completed in the first quarter of 2024.

Our sales to major customers were as follows:

<i>(dollars in millions)</i>	2025	2024	2023	% of Total Net Sales		
				2025	2024	2023
Sales to the U.S. government ⁽¹⁾	\$ 33,279	\$ 32,246	\$ 31,628	38 %	40 %	46 %
Foreign military sales through the U.S. government	6,702	5,765	4,974	8 %	7 %	7 %
Foreign government direct commercial sales	6,123	5,317	4,249	7 %	7 %	6 %
Commercial aerospace and other commercial sales ⁽²⁾	42,499	37,410	28,069	48 %	46 %	41 %
Total net sales	\$ 88,603	\$ 80,738	\$ 68,920	100 %	100 %	100 %

(1) Excludes foreign military sales through the U.S. government.

(2) 2023 includes the reduction in sales from the Powder Metal Matter.

Cost of Sales

<i>(dollars in millions)</i>	2025	2024	2023
Total cost of sales	\$ 70,814	\$ 65,328	\$ 56,831
Percentage of net sales	80 %	81 %	82 %

The factors contributing to the change year-over-year in Total cost of sales are as follows:

<i>(dollars in millions)</i>	2025	2024
Organic ⁽¹⁾	\$ 7,132	\$ 6,188
Acquisitions and divestitures, net	(1,055)	(1,210)
Restructuring	12	(9)
FAS/CAS operating adjustment	89	246
Acquisition accounting adjustments	(52)	61
Other	(640)	3,222
Total change	\$ 5,486	\$ 8,498

(1) See “Results of Operations” for definition of organic. A reconciliation of this measure to reported U.S. GAAP amounts is provided in the table above.

The organic increase in total cost of sales in 2025 of \$7.1 billion was primarily due to the organic net sales increases at Pratt & Whitney, Collins, and Raytheon noted above. The \$1.1 billion decrease in cost of sales related to Acquisitions and divestitures, net in 2025 was primarily due to the net sales decreases related to Acquisitions and divestitures, net noted above.

The decrease in Other cost of sales of \$0.6 billion in 2025 was primarily driven by the absence of charges recorded in 2024, including a \$0.5 billion charge recorded in the second quarter of 2024 at Raytheon related to the termination of a fixed price development contract with a foreign customer (herein referred to as “Raytheon Contract Termination”) and \$0.2 billion of charges recorded in the first quarter of 2024 at Collins related to the recognition of unfavorable purchase commitments and an impairment of contract fulfillment costs that were no longer recoverable as a result of initiating alternative titanium sources.

The organic increase in total cost of sales in 2024 of \$6.2 billion was primarily due to the organic net sales increases at Pratt & Whitney, Collins, and Raytheon noted above.

The \$1.2 billion decrease in cost of sales related to Acquisitions and divestitures, net in 2024 was primarily driven by the sale of our CIS business within our Raytheon segment completed in the first quarter 2024.

The increase in Other cost of sales of \$3.2 billion in 2024 was primarily driven by the absence of the Powder Metal Matter charge recorded in the third quarter of 2023, which resulted in a \$2.5 billion net reduction in cost of sales primarily reflecting our partners’ 49% share of the impact. In addition, the increase in Other cost of sales includes a \$0.5 billion charge related to the Raytheon Contract Termination recorded in the second quarter of 2024, and \$0.2 billion of charges recorded in the first quarter of 2024 at Collins related to the recognition of unfavorable purchase commitments and an impairment of contract fulfillment costs that are no longer recoverable as a result of initiating alternative titanium sources.

Restructuring actions relate to ongoing cost reduction efforts including workforce reductions and the consolidation of facilities.

For discussion on FAS/CAS operating adjustment, see the “FAS/CAS operating adjustment” subsection under the “Segment Review” section below. For discussion on Acquisition accounting adjustments, see the “Acquisition accounting adjustments” subsection under the “Segment Review” section below.

(dollars in millions)	2025	2024	2023	% of Total Net Sales		
				2025	2024	2023
Cost of sales						
Products	\$ 53,780	\$ 50,768	\$ 43,425	61 %	63 %	63 %
Services	17,034	14,560	13,406	19 %	18 %	19 %
Total cost of sales	\$ 70,814	\$ 65,328	\$ 56,831	80 %	81 %	82 %

Net products cost of sales increased \$3.0 billion in 2025 compared to 2024, primarily driven by increases in external products cost of sales at Pratt & Whitney and Collins, each driven by the products sales changes noted above. The increase was partially offset by the absence of a \$0.5 billion charge recorded in the second quarter of 2024 at Raytheon related to the Raytheon Contract Termination and charges of \$0.2 billion recorded in the first quarter of 2024 at Collins as a result of initiating alternative titanium sources.

Net services cost of sales increased \$2.5 billion in 2025 compared to 2024, primarily due to an increase in external services cost of sales at Pratt & Whitney, driven by the services sales change noted above.

Net products cost of sales increased \$7.3 billion in 2024 compared to 2023, primarily due to the absence of the Powder Metal Matter charge recorded in the third quarter of 2023, which resulted in a \$2.5 billion net reduction in cost of sales primarily reflecting our partners' 49% share of the impact. In addition, net product cost of sales includes increases in external products cost of sales at Pratt & Whitney, Collins, and Raytheon all driven by the products sales changes noted above, a \$0.5 billion charge related to the Raytheon Contract Termination in the second quarter of 2024, and \$0.2 billion of charges at Collins as a result of initiating alternative titanium sources recorded in the first quarter of 2024.

Net services cost of sales increased \$1.2 billion in 2024 compared to 2023, primarily due to increases in external services cost of sales at Pratt & Whitney and Collins, partially offset by a decrease in external services cost of sales at Raytheon, all driven by the services sales changes noted above.

Research and Development

(dollars in millions)	2025	2024	2023
Company-funded	\$ 2,807	\$ 2,934	\$ 2,805
Percentage of net sales	3.2 %	3.6 %	4.1 %
Customer-funded ⁽¹⁾	\$ 4,886	\$ 4,723	\$ 4,456
Percentage of net sales	5.5 %	5.8 %	6.5 %

(1) Included in Cost of sales in our Consolidated Statement of Operations.

Research and development spending is subject to the variable nature of program development schedules and, therefore, year-over-year fluctuations in spending levels are expected.

The decrease in company-funded research and development of \$0.1 billion in 2025 compared to 2024, was primarily driven by lower spending on military and commercial programs at Collins and Pratt & Whitney, partially offset by higher expenses on development programs at Raytheon.

The increase in company-funded research and development of \$0.1 billion in 2024 compared to 2023, was primarily driven by increased spending on commercial program development at Collins and Pratt & Whitney, partially offset by lower expenses on development programs at Raytheon.

The increase in customer-funded research and development of \$0.2 billion in 2025 compared to 2024, was primarily driven by higher development spend on various military and commercial programs at Collins and increased spending at Pratt & Whitney on military development programs, partially offset by lower spending on customer-funded expenses at Raytheon on military development programs, specifically related to the Next Generation Interceptor (NGI) program.

The increase in customer-funded research and development of \$0.3 billion in 2024 compared to 2023, was primarily driven by higher development spend on various military and commercial programs at Collins and increased spending at Pratt & Whitney on military programs primarily driven by the F135 Engine Core Upgrade (ECU), partially offset by lower expenses at Raytheon primarily related to the NGI program.

Selling, General, and Administrative

<i>(dollars in millions)</i>	2025	2024	2023
Selling, general, and administrative	\$ 6,095	\$ 5,806	\$ 5,809
Percentage of net sales	6.9 %	7.2 %	8.4 %

Selling, general, and administrative expenses increased \$0.3 billion in 2025 compared to 2024, primarily driven by higher employee-related costs and higher restructuring costs related to ongoing cost reduction efforts driven by various workforce reductions initiated in 2025 at Collins.

Selling, general, and administrative expenses in 2024 were relatively consistent compared to 2023.

We are continuously evaluating our cost structure and have implemented restructuring actions in an effort to keep our cost structure competitive. Therefore, the amounts reflected above include the beneficial impact of previous restructuring actions on Selling, general, and administrative expenses.

Other Income (Expense), Net

<i>(dollars in millions)</i>	2025	2024	2023
Other income (expense), net	\$ 413	\$ (132)	\$ 86

Other income (expense), net includes equity earnings in unconsolidated entities, royalty income, foreign exchange gains and losses, and other ongoing and non-recurring items.

The increase in Other income (expense), net of \$0.5 billion in 2025 compared to 2024 was primarily due to a \$0.2 billion gain on sale of the actuation and flight control business in the third quarter of 2025, a \$0.1 billion gain on sale of the Simmonds Precision Products business in the fourth quarter of 2025, and \$0.1 billion of gains related to the increase in fair value on investments in 2025. The increase in Other income (expense), net in 2025 compared to 2024 also benefited from the absence of a \$0.9 billion charge related to the Resolution of Certain Legal Matters in 2024, partially offset by the absence of a prior year benefit of \$0.4 billion gain on sale of the CIS business net of transaction and other related costs, a \$0.2 billion benefit from a tax related indemnity receivable, a \$0.1 billion gain on sale of Collins' Goodrich Hoist & Winch business, and an insurance recovery at Pratt & Whitney of approximately \$0.1 billion.

The decrease in Other income (expense), net of \$0.2 billion in 2024 compared to 2023, was primarily due to a \$0.9 billion charge during the second quarter of 2024 related to the Resolution of Certain Legal Matters. This was partially offset by a \$0.4 billion gain on sale of Raytheon's CIS business in the first quarter of 2024, a \$0.2 billion benefit from a tax related indemnity receivable recorded in the third quarter of 2024, a \$0.1 billion gain on sale of Collins' Goodrich Hoist & Winch business in the fourth quarter of 2024, and an insurance recovery at Pratt & Whitney of approximately \$0.1 billion in the fourth quarter of 2024.

Operating Profit

<i>(dollars in millions)</i>	2025	2024	2023
Operating profit	\$ 9,300	\$ 6,538	\$ 3,561
Operating profit margin	10.5 %	8.1 %	5.2 %

The increase in Operating profit of \$2.8 billion in 2025 compared to 2024 was primarily driven by an increase in the organic operating performance of our segments of \$1.5 billion, a \$0.2 billion gain on sale of the actuation and flight control business in 2025, and a \$0.1 billion gain on sale of the Simmonds Precision Products business in the fourth quarter of 2025. The increase in Operating profit in 2025 compared to 2024 also benefited from the absence of 2024 charges, including a \$0.9 billion charge related to the Resolution of Certain Legal Matters, a \$0.6 billion charge related to the Raytheon Contract Termination, and charges of \$0.2 billion at Collins as a result of initiating alternative titanium sources. These increases were partially offset by the absence of prior year benefits including a \$0.4 billion gain on sale of the CIS business, net of transaction and other related costs and a \$0.2 billion benefit from a tax related indemnity receivable.

The increase in Operating profit of \$3.0 billion in 2024 compared to 2023 was primarily driven by the absence of the \$2.9 billion of charges associated with the Powder Metal Matter recorded in the third quarter of 2023. In addition, the increase in Operating profit was driven by the increased operating performance of our segments of approximately \$1.5 billion, a \$0.4 billion gain on sale of the CIS business recorded in the first quarter of 2024, and a \$0.2 billion benefit from a tax related indemnity receivable recorded in the third quarter of 2024. The above items were partially offset by a \$0.9 billion charge in the second quarter of 2024 related to the Resolution of Certain Legal Matters, a \$0.6 billion charge in the second quarter of 2024

related to the Raytheon Contract Termination, and the \$0.3 billion change in our FAS/CAS operating adjustment which is described below in “Segment Review.”

Non-service Pension Income

<i>(dollars in millions)</i>	2025	2024	2023
Non-service pension income	\$ (1,182)	\$ (1,518)	\$ (1,780)

The change in Non-service pension income of \$0.3 billion in 2025 compared to 2024 was primarily driven by a \$0.3 billion settlement charge recorded in fourth quarter of 2025 associated with the annuity buy-out conversion. See “Note 10: Employee Benefit Plans” within Item 8 of this Form 10-K for further discussion.

The change in Non-service pension income of \$0.3 billion in 2024 compared to 2023 was primarily driven by the decrease in the recognized actuarial net (gain) loss as a result of the merger of the remaining Raytheon Company qualified pension plans into the RTX Consolidated Pension Plan at December 31, 2023.

Interest Expense, Net

<i>(dollars in millions)</i>	2025	2024	2023
Interest expense	\$ 1,835	\$ 1,970	\$ 1,653
Interest income	(98)	(102)	(100)
Other non-operating expense (income) ⁽¹⁾	12	(6)	(48)
Interest expense, net	\$ 1,749	\$ 1,862	\$ 1,505
Total average interest expense rate - average outstanding borrowings during the year:	4.5 %	4.6 %	4.3 %
Total average interest expense rate - outstanding borrowings as of December 31:	4.5 %	4.5 %	4.6 %

(1) Primarily consists of the gains or losses on assets associated with certain of our nonqualified deferred compensation and employee benefit plans, the gains or losses on liabilities associated with certain of our nonqualified deferred compensation plans, and non-operating dividend income.

Interest expense, net decreased \$0.1 billion in 2025 compared to 2024, primarily driven by debt repayments in 2025.

Interest expense, net increased \$0.4 billion in 2024 compared to 2023. The increase in Interest expense of \$0.3 billion was primarily due to long-term debt issuances and term loan borrowings in 2023, partially offset by the reversal of interest accruals as a result of the conclusion of the examination phases of certain RTX and Rockwell Collins tax audits in the first quarter of 2024.

Income Taxes

	2025	2024	2023
Effective income tax rate	19.1 %	19.1 %	11.9 %

Although the 2025 and 2024 effective tax rates are the same, the 2025 effective rate reflects a lower U.S. tax benefit associated with Foreign Derived Intangible Income resulting from the Act. Both periods include tax benefits associated with certain legal entity reorganizations and the tax effects of dispositions.

The 2024 effective tax rate includes tax benefits of \$0.3 billion resulting from the conclusion of the examination phases of the U.S. federal income tax audits for RTX 2017 and 2018 tax years and Rockwell Collins 2016, 2017, and 2018 tax years. Also included in the 2024 effective tax rate is a \$0.2 billion tax charge related to U.S. federal income taxes owed by the Company resulting from a favorable non-U.S. tax ruling Otis received in 2024. The ruling Otis received reduces U.S. foreign tax credits previously claimed by the Company in pre-separation tax years. This item is subject to a tax matters agreement entered into with Carrier and Otis in connection with the separations of those businesses in 2020. Accordingly, the Company recorded a pre-tax benefit of \$0.2 billion for a portion of the indemnity owed by Otis to the Company for the reduction in foreign taxes in the pre-separation years. Additionally, the Company is indemnified by Otis for the associated interest related to the Otis non-US ruling.

The 2023 effective tax rate includes a deferred tax benefit of \$0.7 billion associated with the \$2.9 billion Powder Metal Matter pre-tax charge.

For additional discussion of income taxes and the effective income tax rate, see “Income Taxes” within Critical Accounting Estimates below, and “Note 12: Income Taxes” within Item 8 of this Form 10-K.

Net Income Attributable to Common Shareowners

<i>(dollars in millions, except per share amounts)</i>	2025	2024	2023
Net income attributable to common shareowners	\$ 6,732	\$ 4,774	\$ 3,195
Diluted earnings per share	\$ 4.96	\$ 3.55	\$ 2.23

Net income attributable to common shareowners for 2025 includes the following:

- acquisition accounting adjustments of \$1.6 billion, net of tax, which had an unfavorable impact on diluted earnings per share (EPS) of \$1.15;
- a pension settlement charge of \$0.2 billion, net of tax, which had an unfavorable impact on diluted EPS of \$0.15; and
- restructuring charges of \$0.2 billion, net of tax, which had an unfavorable impact on diluted EPS of \$0.14.

Net income attributable to common shareowners for 2024 includes the following:

- acquisition accounting adjustments of \$1.6 billion, net of tax, which had an unfavorable impact on diluted EPS of \$1.20;
- a charge related to the Resolution of Certain Legal Matters of \$0.9 billion, net of tax, which had an unfavorable impact on diluted EPS of \$0.65;
- a charge of \$0.4 billion, net of tax, related to the Raytheon Contract Termination, which had an unfavorable impact on diluted EPS of \$0.33;
- benefit recognized as a result of the conclusion of the examination phases of the RTX and Rockwell Collins tax audits of \$0.3 billion, net of tax, which had a favorable impact on diluted EPS of \$0.21;
- a gain on sale of the CIS business, net of transaction and other related costs, of \$0.2 billion, net of tax, which had a favorable impact on diluted EPS of \$0.18;
- charges related to initiating alternative titanium sources at our Collins segment of \$0.2 billion, which had an unfavorable impact on diluted EPS of \$0.13;
- restructuring charges of \$0.2 billion, net of tax, which had an unfavorable impact on diluted EPS of \$0.12;
- a charge of \$0.1 billion, net of tax, related to a customer bankruptcy, which had an unfavorable impact on diluted EPS of \$0.09; and
- a charge of \$0.1 billion, net of tax, related to impairment of contract fulfillment costs in the fourth quarter of 2024, due to a contract cancellation at our Collins segment, which had an unfavorable impact on diluted EPS of \$0.09.

Net income attributable to common shareowners for 2023 includes the following:

- charge associated with the Powder Metal Matter of \$2.2 billion, net of tax and partner share, which had an unfavorable impact on diluted EPS of \$1.55;
- acquisition accounting adjustments of \$1.6 billion, net of tax, which had an unfavorable impact on diluted EPS of \$1.09;
- restructuring charges of \$0.2 billion, net of tax, which had an unfavorable impact on diluted EPS of \$0.13; and
- charges related to a customer insolvency of \$0.1 billion, net of tax and noncontrolling interest, which had an unfavorable impact on diluted EPS of \$0.08.

SEGMENT REVIEW

For a detailed description of our businesses, see “Business Segments” within Item 1. “Business” of this Form 10-K.

Segments are generally based on the management structure of the businesses and the grouping of similar operations, based on capabilities and technologies, where each management organization has general operating autonomy over diversified products and services. Segment Total net sales and Operating profit (loss) include intercompany sales and profit, which are ultimately eliminated within Eliminations and other, which also includes certain smaller non-reportable segments. Segment results exclude certain acquisition accounting adjustments, the FAS/CAS operating adjustment, and certain corporate expenses, as further discussed below.

We present a FAS/CAS operating adjustment outside of segment results, which represents the difference between the service cost component of our pension and postretirement benefit (PRB) expense under the Financial Accounting Standards (FAS) requirements of U.S. GAAP and our pension and PRB expense under U.S. government Cost Accounting Standards (CAS) primarily related to our Raytheon segment. While the ultimate liability for pension and PRB costs under FAS and CAS is similar, the pattern of cost recognition is different. Over time, we generally expect to recover the related Raytheon pension and PRB liabilities through the pricing of our products and services to the U.S. government. Collins and Pratt & Whitney generally record pension and PRB expense on a FAS basis.

Given the nature of our business, we believe that Total net sales and Operating profit (loss) (and the related operating profit (loss) margin percentage), which we disclose and discuss at the segment level, are most relevant to an understanding of management's view of our segment performance, as described below.

We provide the organic change in Net sales and Operating profit (loss) for our segments as discussed above in "Results of Operations." We believe that these non-GAAP measures are useful to investors because they provide transparency to the underlying performance of our business, which allows for better year-over-year comparability. For Pratt & Whitney only, Other also includes the transactional impact of foreign exchange hedging at Pratt & Whitney Canada due to its significance to Pratt & Whitney's overall operating results.

Total Net Sales. Total net sales by segment were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Collins Aerospace	\$ 30,196	\$ 28,284	\$ 26,253
Pratt & Whitney ⁽¹⁾	32,916	28,066	18,296
Raytheon	28,043	26,713	26,350
Total segment	91,155	83,063	70,899
Eliminations and other	(2,552)	(2,325)	(1,979)
Consolidated	\$ 88,603	\$ 80,738	\$ 68,920

(1) 2023 includes the reduction in sales from the Powder Metal Matter.

Operating Profit (Loss). Operating profit (loss) by segment was as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Collins Aerospace	\$ 4,923	\$ 4,135	\$ 3,825
Pratt & Whitney ⁽¹⁾	2,596	2,015	(1,455)
Raytheon	3,227	2,594	2,379
Total segment	10,746	8,744	4,749
Eliminations and other	54	(48)	(42)
Corporate expenses and other unallocated items ⁽²⁾	(248)	(933)	(275)
FAS/CAS operating adjustment	753	833	1,127
Acquisition accounting adjustments	(2,005)	(2,058)	(1,998)
Consolidated	\$ 9,300	\$ 6,538	\$ 3,561

(1) 2023 includes the impacts from the Powder Metal Matter.

(2) Includes a \$0.9 billion charge in the second quarter of 2024 related to the Resolution of Certain Legal Matters. See "Note 1: Basis of Presentation and Summary of Accounting Principles" within Item 8 of this Form 10-K for additional information.

Included in segment Operating profit (loss) are Estimate at Completion (EAC) adjustments, which relate to changes in Operating profit and margin due to revisions to total estimated revenues and costs at completion. These changes may reflect improved or deteriorated operating performance, as well as changes in facts and assumptions related to contract options, contract modifications, incentive and award fees associated with program performance, customer activity levels, and other customer-directed changes. For a full description of our EAC process, refer to "Note 1: Basis of Presentation and Summary of Accounting Principles" within Item 8 of this Form 10-K. Given that we have thousands of individual contracts, and given the types and complexity of the assumptions and estimates we must make on an on-going basis and the nature of the work required to be performed under our contracts, we have both favorable and unfavorable EAC adjustments in the ordinary course.

We had the following net EAC adjustments for the periods presented:

<i>(dollars in millions)</i>	2025	2024	2023
Net EAC adjustments	\$ (386)	\$ (473)	\$ (648)

The change in net EAC adjustments of \$0.1 billion in 2025 compared to 2024 was primarily due to favorable changes in net EAC adjustments at Raytheon, partially offset by unfavorable changes in net EAC adjustments at Pratt & Whitney. The change at Raytheon benefited from the absence of a \$53 million unfavorable adjustment in the third quarter of 2024, with the remaining change spread across numerous individual programs. The unfavorable changes at Pratt & Whitney were spread across numerous programs, with no individual or common significant driver.

The change in net EAC adjustments of \$0.2 billion in 2024 compared to 2023 was primarily due to favorable changes in net EAC adjustments at Pratt & Whitney and Raytheon, partially offset by unfavorable changes in net EAC adjustments at Collins.

The change at Pratt was primarily driven by the absence of a \$0.1 billion unfavorable impact recorded in the third quarter of 2023 as a result of increased cost to our aftermarket contracts resulting from the Powder Metal Matter. The change at Collins was spread across numerous individual programs, with no individual or common significant driver. The change at Raytheon was primarily due to improvement in net EAC adjustments related to certain fixed price development contracts.

In addition to the amounts included in the table above, during the fourth quarter of 2024, as a result of obtaining critical licenses and further regulatory approvals, we restarted work under certain contracts with a Middle East customer and began recognizing revenue on these contracts. As a result, Raytheon recognized a net operating profit benefit of \$0.1 billion primarily related to reserve and contract loss provision adjustments. Additionally, during the second quarter of 2024, Raytheon recognized a \$0.6 billion charge related to the impact of the Raytheon Contract Termination. The charge included the write-off of remaining contract assets and the estimated settlement with the customer. The contract termination was completed and customer settlement occurred during the fourth quarter of 2024, in line with previously accrued amounts.

Significant EAC adjustments, when they occur, are discussed in each business segment's discussion below.

Backlog and Bookings. Total backlog was approximately \$268 billion and \$218 billion as of December 31, 2025 and 2024, respectively. Our backlog by segment, which excludes intercompany backlog, was as follows at December 31:

<i>(dollars in billions)</i>	2025	2024
Collins Aerospace	\$ 42	\$ 36
Pratt & Whitney	151	119
Raytheon	75	63
Total backlog	\$ 268	\$ 218

Total backlog includes commercial backlog of \$161 billion and \$125 billion as of December 31, 2025 and 2024, respectively, and defense backlog of \$107 billion and \$93 billion as of December 31, 2025 and 2024, respectively.

Backlog, which is equivalent to our RPO for our sales contracts, represents the aggregate dollar value of firm orders for which products have not been provided or service has not been performed and excludes unexercised contract options and potential orders under ordering-type contracts (e.g., IDIQ type contracts). Backlog generally increases with bookings and/or orders and generally decreases as sales are recognized on these bookings and is affected by changes in foreign exchange rates, as well as contract cancellations and terminations, and cost underruns on cost-type contracts as discussed further below.

We believe bookings are an important measure of future performance for our defense businesses. Our defense operations consist primarily of our Raytheon business and operations in the defense businesses within our Collins and Pratt & Whitney segments. Defense bookings were approximately \$61 billion in both 2025 and 2024 and \$51 billion in 2023.

Defense bookings generally represent the dollar value of new external defense contracts awarded to us during the reporting period and include firm orders for which funding has not been appropriated. Defense bookings exclude unexercised contract options and potential orders under ordering-type contracts (e.g., IDIQ type contracts). We reflect contract cancellations and terminations, as well as the impact of changes in foreign exchange rates, directly as an adjustment to backlog in the period in which the cancellation or termination occurs and the impact is determinable. Contract cancellations and terminations also include contract underruns on cost-type programs.

Collins Aerospace

<i>(dollars in millions)</i>	2025	2024	2023	% Change	
				2025 compared with 2024	2024 compared with 2023
Net sales	\$ 30,196	\$ 28,284	\$ 26,253	7 %	8 %
Operating profit	4,923	4,135	3,825	19 %	8 %
Operating profit margins	16.3 %	14.6 %	14.6 %		

2025 Compared with 2024

<i>(dollars in millions)</i>	Factors Contributing to Total Change				
	Organic ⁽¹⁾	Acquisitions / Divestitures, net	Restructuring Costs	Other	Total Change
Net sales	\$ 2,606	\$ (754)	\$ —	\$ 60	\$ 1,912
Operating profit	495	(56)	(157)	506	788

(1) See "Segment Review" above for definition of organic. A reconciliation of these measures to reported U.S. GAAP amounts is provided in the table above.

2024 Compared with 2023

(dollars in millions)	Factors Contributing to Total Change				
	Organic ⁽¹⁾	Acquisitions / Divestitures, net	Restructuring Costs	Other	Total Change
Net sales	\$ 2,096	\$ (18)	\$ —	\$ (47)	\$ 2,031
Operating profit	618	(3)	24	(329)	310

(1) See “Segment Review” above for definition of organic. A reconciliation of these measures to reported U.S. GAAP amounts is provided in the table above.

2025 Compared with 2024

The organic net sales increase of \$2.6 billion in 2025 compared to 2024 primarily relates to higher commercial aerospace aftermarket sales of \$1.4 billion, higher defense sales of \$0.7 billion and higher commercial OEM sales of \$0.5 billion. The increase in commercial aftermarket sales was driven by higher volume across all aftermarket sales channels. The increase in defense sales was due to higher volume across multiple programs and platforms. The increase in commercial OEM sales was primarily driven by higher volume on widebody and narrowbody.

The organic operating profit increase of \$0.5 billion in 2025 compared to 2024 was primarily due to higher commercial aerospace operating profit of \$0.3 billion, principally driven by the higher sales volume discussed above, partially offset by the impact of tariffs and unfavorable commercial OEM mix. Defense operating profit increased \$0.1 billion in 2025 compared to 2024 due to higher sales volume. Lower research and development expenses were partially offset by higher selling, general and administrative expenses.

The decrease in net sales due to Acquisitions/Divestitures, net from 2025 compared to 2024 primarily relates to the sale of the actuation and flight control business completed in 2025, the sale of Simmonds Precision Products completed in 2025, and the sale of the Goodrich Hoist & Winch business completed in 2024.

The increase in Other operating profit of \$0.5 billion in 2025 compared to 2024 primarily relates to higher net gains on the sale of businesses, as referenced above, of \$0.3 billion in 2025 as compared to \$0.1 billion in 2024. The increase is also driven by the absence of \$0.2 billion of charges recorded in 2024 related to the recognition of unfavorable purchase commitments and an impairment of contract fulfillment costs that are no longer recoverable as a result of initiating alternative titanium sources, and the absence of a \$0.2 billion charge related to the impairment of contract fulfillment costs due to a contract cancellation recognized in 2024.

The increase in restructuring costs from 2025 compared to 2024 relates to ongoing cost reduction efforts driven by various workforce reductions initiated in 2025.

2024 Compared with 2023

The organic net sales increase of \$2.1 billion in 2024 compared to 2023 primarily relates to higher commercial aerospace aftermarket sales of \$1.2 billion, higher defense sales of \$0.8 billion, and higher commercial aerospace OEM sales of \$0.1 billion. The increase in commercial aerospace sales was principally driven by continued growth in commercial air traffic, which has resulted in an increase in flight hours and increased OEM volume primarily within widebody and regional aircraft, partially offset by decreased OEM volume in narrowbody aircraft. The defense sales increase was primarily due to higher volume across multiple programs and platforms.

The organic operating profit increase of \$0.6 billion in 2024 compared to 2023 was primarily due to higher commercial aerospace operating profit of \$0.4 billion, principally driven by the higher aftermarket sales volume discussed above, partially offset by unfavorable OEM mix. Defense operating profit increased \$0.3 billion 2024 compared to 2023 due to the higher volume discussed above, partially offset by higher space program costs. The above increases were partially offset by \$0.1 billion of higher research and development costs.

The decrease in Other operating profit of \$0.3 billion in 2024 compared to 2023 was primarily driven by \$0.2 billion of charges in the first quarter of 2024, related to the recognition of unfavorable purchase commitments and an impairment of contract fulfillment costs that are no longer recoverable as a result of initiating alternative titanium sources, \$0.2 billion impairment of contract fulfillment costs in the fourth quarter of 2024 due to a contract cancellation, and the absence of net favorable customer settlements recorded in 2023. These decreases in Other operating profit were partially offset by a \$0.1 billion net gain on the sale of the Goodrich Hoist & Winch business in the fourth quarter of 2024.

Restructuring actions relate to ongoing cost reduction efforts driven by various workforce reductions.

Defense Bookings – In 2025, Collins recorded \$12 billion in defense bookings, comprised of a number of smaller individual bookings under \$0.5 billion.

Pratt & Whitney

(dollars in millions)	2025	2024	2023	% Change	
				2025 compared with 2024	2024 compared with 2023
Net sales	\$ 32,916	\$ 28,066	\$ 18,296	17 %	53 %
Operating profit (loss)	2,596	2,015	(1,455)	29 %	NM
Operating profit (loss) margins	7.9 %	7.2 %	(8.0)%		

NM = Not meaningful

2025 Compared with 2024

(dollars in millions)	Factors Contributing to Total Change				
	Organic ⁽¹⁾	Acquisitions / Divestitures, net	Restructuring Costs	Other	Total Change
Net sales	\$ 4,810	\$ —	\$ —	\$ 40	\$ 4,850
Operating profit	448	—	81	52	581

(1) See “Segment Review” above for definition of organic. A reconciliation of these measures to reported U.S. GAAP amounts is provided in the table above.

2024 Compared with 2023

(dollars in millions)	Factors Contributing to Total Change				
	Organic ⁽¹⁾	Acquisitions / Divestitures, net	Restructuring Costs	Other	Total Change
Net sales	\$ 4,386	\$ —	\$ —	\$ 5,384	\$ 9,770
Operating profit (loss)	559	—	(28)	2,939	3,470

(1) See “Segment Review” above for definition of organic. A reconciliation of these measures to reported U.S. GAAP amounts is provided in the table above.

2025 Compared with 2024

The organic net sales increase of \$4.8 billion in 2025 compared to 2024 was primarily driven by higher commercial aftermarket sales of \$2.9 billion primarily driven by higher volume. Also contributing to the organic net sales increase was higher commercial OEM sales of \$0.9 billion driven by favorable mix and higher volume. Military sales increased \$1.0 billion, primarily due to higher production volume on the F135 program.

The organic operating profit increase of \$0.4 billion in 2025 compared to 2024 reflects higher commercial aerospace operating profit of \$0.5 billion and higher military operating profit of \$0.2 billion. Higher commercial aftermarket volume and favorable commercial OEM mix more than offset the impacts of unfavorable aftermarket mix and higher tariffs and production costs. The increase in military operating profit was driven by the higher sales volume discussed above, as well as favorable mix and the absence of an unfavorable EAC adjustment of approximately \$50 million in the fourth quarter of 2024, partially offset by higher production costs. These increases were partially offset by higher selling and general administrative expenses of \$0.2 billion and the absence of a fourth quarter 2024 insurance recovery of approximately \$0.1 billion.

The increase in Other operating profit in 2025 compared to 2024 primarily relates to a customer bankruptcy charge of \$0.1 billion in 2025 compared to a \$0.2 billion charge in 2024.

2024 Compared with 2023

The organic net sales increase of \$4.4 billion in 2024 compared to 2023 primarily reflects higher commercial OEM sales of \$1.7 billion primarily driven by favorable mix on higher volume and higher commercial aftermarket sales of \$1.6 billion primarily driven by higher volume. Military sales increased \$1.1 billion, primarily due to higher sustainment and production volume across multiple platforms.

The Other net sales decrease of \$5.4 billion in 2024 compared to 2023 was primarily relates to the absence of a charge recognized in the third quarter of 2023 related to the Powder Metal Matter.

The organic operating profit (loss) increase of \$0.6 billion in 2024 compared to 2023 reflects higher commercial aerospace operating profit of \$0.4 billion driven by favorable mix on higher large commercial OEM volume which was partially offset by higher OEM production costs. Commercial aerospace operating profit also benefited from higher commercial aftermarket volume, which was partially offset by the impact of a shift in aftermarket mix towards higher GTF volume as well as two favorable contract matters in 2023 totaling \$0.1 billion that did not repeat in 2024. The increase in military operating profit of \$0.2 billion was driven by the increases from the sales volume discussed above, as well as favorable sustainment mix, partially offset by higher production costs. Military operating profit also benefited from the absence of an unfavorable EAC adjustment

of approximately \$60 million in the fourth quarter of 2023, which was partially offset by an unfavorable EAC adjustment of approximately \$50 million in the fourth quarter of 2024. Higher research and development expenses and selling, general, and administrative expenses were partially offset by an insurance recovery of approximately \$0.1 billion in the fourth quarter of 2024.

The change in Other operating profit (loss) of \$2.9 billion in 2024 compared to 2023 reflects the absence of a charge recognized in the third quarter of 2023 related to the Powder Metal Matter of \$2.9 billion and a \$0.2 billion charge related to a customer insolvency in the second quarter of 2023, partially offset by a \$0.2 billion charge related to a customer bankruptcy in the fourth quarter of 2024.

Restructuring actions relate to ongoing cost reduction efforts including workforce reductions and the consolidation of facilities.

Defense Bookings – In 2025, Pratt & Whitney recorded \$9 billion in defense bookings. In addition to a number of smaller individual bookings, Pratt & Whitney booked \$2.9 billion for F135 production and \$2.4 billion for F135 sustainment.

Raytheon

(dollars in millions)	2025	2024	2023	% Change	
				2025 compared with 2024	2024 compared with 2023
Net sales	\$ 28,043	\$ 26,713	\$ 26,350	5 %	1 %
Operating profit	3,227	2,594	2,379	24 %	9 %
Operating profit margins	11.5 %	9.7 %	9.0 %		
Defense Bookings	\$ 39,975	\$ 39,235	\$ 31,889	2 %	23 %

2025 Compared with 2024

(dollars in millions)	Factors Contributing to Total Change				
	Organic ⁽¹⁾	Acquisitions / Divestitures, net	Restructuring Costs	Other	Total Change
Net sales	\$ 1,715	\$ (460)	\$ —	\$ 75	\$ 1,330
Operating Profit	563	(34)	32	72	633

(1) See “Segment Review” above for definition of organic. A reconciliation of these measures to reported U.S. GAAP amounts is provided in the table above.

2024 Compared with 2023

(dollars in millions)	Factors Contributing to Total Change				
	Organic ⁽¹⁾	Acquisitions / Divestitures, net	Restructuring Costs	Other	Total Change
Net sales	\$ 1,691	\$ (1,274)	\$ —	\$ (54)	\$ 363
Operating Profit	352	(74)	6	(69)	215

(1) See “Segment Review” above for definition of organic. A reconciliation of these measures to reported U.S. GAAP amounts is provided in the table above.

2025 Compared with 2024

The organic net sales increase of \$1.7 billion in 2025 compared to 2024 was primarily due to higher net sales of \$1.6 billion from land and air defense systems programs driven by higher net sales on Patriot programs, international National Advanced Surface-to-Air Missile System (NASAMS) programs, and Lower Tier Air and Missile Defense Sensor (LTAMDS) programs. Also contributing to the increase was higher net sales of \$0.7 billion from naval power programs primarily due to higher net sales on Evolved SeaSparrow Missile (ESSM) programs, SPY-6 radar programs, and certain classified programs. These increases were partially offset by lower net sales of \$0.3 billion within air and space defense systems, primarily driven by lower development program volume partially offset by higher net sales on advanced medium-range air-to-air missile (AMRAAM) programs. Additionally, the organic net sales increase was partially offset by the absence of \$0.3 billion of sales recognized in the fourth quarter of 2024 associated with the restart of certain contracts with a Middle East customer.

The increase in Other net sales of \$0.1 billion in 2025 compared to 2024 was primarily driven by the absence of \$0.1 billion charge related to Raytheon Contract Termination initiated in the second quarter of 2024.

The organic operating profit increase of \$0.6 billion in 2025 compared to 2024 was primarily due to a favorable change in mix and other performance of \$0.3 billion, a favorable change in net EAC adjustments of \$0.2 billion and higher volume of approximately \$0.1 billion. The favorable change in mix and other performance was primarily driven by increased production

on Patriot programs. The favorable change in net EAC adjustments was spread across numerous programs and benefited from the absence of a \$53 million unfavorable adjustment in the third quarter of 2024 related to cost increases on a classified program. The increase in volume was principally driven by the higher net sales discussed above.

The decrease in net sales and operating profit due to Acquisitions / Divestitures, net in 2025 compared to 2024 primarily relates to the sale of the CIS business completed in the first quarter of 2024.

The increase in Other operating profit of \$0.1 billion in 2025 compared to 2024 was primarily due to the absence of a \$0.6 billion charge related to the Raytheon Contract Termination initiated in the second quarter of 2024, partially offset by the absence of a \$0.4 billion gain on sale of the CIS business in the first quarter of 2024, and a \$0.1 billion net benefit primarily related to reserve and contract loss provision adjustments recognized in the fourth quarter of 2024 as a result of restarting work under certain contracts with a Middle East customer.

2024 Compared with 2023

The organic net sales increase of \$1.7 billion in 2024 compared to 2023 was primarily due to higher net sales of \$1.4 billion from land and air defense systems programs driven by higher net sales on certain international Patriot programs, certain international NASAMS programs, and Counter-Unmanned Aircraft Systems (C-UAS) programs. Also contributing to the increase was higher net sales of \$0.4 billion from advanced technology programs primarily driven by higher volume on classified programs and on a development program. Additionally, the organic net sales increase includes \$0.3 billion of sales associated with the restart of certain contracts with a Middle East customer. These increases were partially offset by lower net sales of \$0.5 billion from air and space defense systems programs primarily due to the completion of certain programs, and the timing of a prior year program award.

The decrease in Other net sales in 2025 compared to 2024 was primarily driven by \$0.1 billion related to the Raytheon Contract Termination initiated in the second quarter of 2024.

The organic operating profit increase of \$0.4 billion in 2024 compared to 2023 was primarily due to higher volume of \$0.2 billion primarily driven by the net sales increases noted above and an improvement in net EAC adjustments of \$0.2 billion. The change in net EAC adjustments was primarily due to improvement in net EAC adjustments related to certain fixed price development contracts. Included in the change in net EAC adjustments was a benefit from the absence of a \$51 million unfavorable adjustment in 2023 related to significant contract options exercised, which was offset by a \$53 million unfavorable EAC adjustment in the third quarter of 2024 related to cost increases on a classified program.

The decrease in net sales and operating profit due to Acquisitions / Divestitures, net in 2024 compared to 2023 primarily relates to the sale of the CIS business completed in the first quarter of 2024.

The decrease in Other operating profit in 2024 compared to 2023 was primarily driven by \$0.6 billion related to the Raytheon Contract Termination initiated in the second quarter of 2024, partially offset by a \$0.4 billion gain on the sale of the CIS business in the first quarter of 2024, and a \$0.1 billion net benefit primarily related to reserve and contract loss provision adjustments recognized in the fourth quarter of 2024 as a result of restarting work under certain contracts with a Middle East customer.

Defense Backlog and Bookings— Backlog was \$75 billion at December 31, 2025 compared to \$63 billion at December 31, 2024. In 2025, Raytheon recorded \$40 billion in defense bookings. In addition to a number of smaller individual bookings, Raytheon booked \$2.5 billion on several contracts to provide Guidance Enhanced Missiles (GEM-T) and Patriot launchers for international customers and the U.S. Army, \$2.1 billion to provide AMRAAM to the U.S. Air Force, U.S. Navy, and international customers, \$1.5 billion for low-rate initial production (LRIP) of LTAMDS for the U.S. Army and Poland, \$1.2 billion for Iron Dome Tamir production for an international customer, \$1.2 billion to provide Patriot systems for Spain, \$1.1 billion for AIM-9X Sidewinder Block II short-range air-to-air missiles for the U.S. Navy and international customers, \$901 million to provide Standard Missile-3 (SM-3) for the Missile Defense Agency (MDA), \$647 million for a SPY-6 Hardware Production and Sustainment contract for the U.S. Navy, \$581 million for Next Generation Jammer Mid-Band (NGJ-MB) for the U.S. Navy and the Royal Australian Air Force, \$556 million to provide NASAMS to an international customer, \$529 million to provide Patriot systems for the Netherlands, \$517 million to provide Stinger missiles to the U.S. Army and international customers, \$513 million to provide Tomahawk to the U.S. Navy, and \$5.9 billion on a number of classified contracts.

Corporate and Eliminations and other

Eliminations and other reflects the elimination of sales, other income, and operating profit transacted between segments, as well as the operating results of certain smaller operations.

Corporate expenses and other unallocated items consists of costs not considered part of management's evaluation of reportable segment operating performance, including certain unallowable costs and reserves.

<i>(dollars in millions)</i>	Net Sales			Operating Profit		
	2025	2024	2023	2025	2024	2023
Eliminations and other	\$ (2,552)	\$ (2,325)	\$ (1,979)	\$ 54	\$ (48)	\$ (42)
Corporate expenses and other unallocated items	—	—	—	(248)	(933)	(275)

The increase in eliminations and other net sales of \$0.2 billion in 2025 compared to 2024 was primarily due to an increase in intersegment eliminations, principally driven by Collins. The change in eliminations and other operating profit of \$0.1 billion in 2025 compared to 2024 was primarily due to gains related to the increase in fair value on investments recognized in 2025.

The increase in eliminations and other net sales of \$0.3 billion in 2024 compared to 2023 was primarily due to an increase in intersegment eliminations, principally driven by Collins. Eliminations and other operating profit in 2024 was relatively consistent with 2023.

The change in corporate expenses and other unallocated items of \$0.7 billion in 2025 compared to 2024 was primarily due to the absence of a \$0.9 billion charge related to the Resolution of Certain Legal Matters recorded in the second quarter of 2024 related to the Resolution of Certain Legal Matters, partially offset by higher selling, general and administrative expenses of \$0.1 billion in 2025 and the absence of a \$0.2 billion benefit from a tax related indemnity receivable recorded in the third quarter of 2024.

The change in corporate expenses and other unallocated items of \$0.7 billion in 2024 compared to 2023 was primarily due to a \$0.9 billion charge related to the Resolution of Certain Legal Matters recorded in the second quarter of 2024, partially offset by a \$0.2 billion benefit from a tax related indemnity receivable recorded in the third quarter of 2024.

FAS/CAS operating adjustment

The segment results of Raytheon include pension and PRB expense as determined under U.S. government CAS, which we generally recover through the pricing of our products and services to the U.S. government. The difference between our CAS expense and the FAS service cost attributable to these segments under U.S. GAAP is the FAS/CAS operating adjustment. The FAS/CAS operating adjustment results in consolidated pension expense in operating profit equal to the service cost component of FAS expense under U.S. GAAP. The segment results of Collins and Pratt & Whitney generally include FAS service cost.

The CAS expense calculation is different from the FAS requirements and calculation methodology. While the ultimate liability for pension costs under FAS and CAS is similar, the pattern of cost recognition is different. Our CAS pension expense is comprised primarily of CAS service cost and amortization amounts resulting from demographic or economic experience different than expected, changes in assumptions, or changes in plan provisions. Unlike FAS, CAS expense is only recognized for plans that are not fully funded on a CAS basis. Consequently, if plans become or cease to be fully funded under CAS due to our asset or liability experience, our CAS expense will change accordingly.

The components of the FAS/CAS operating adjustment were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
FAS service cost (expense)	\$ (120)	\$ (138)	\$ (145)
CAS expense	873	971	1,272
FAS/CAS operating adjustment	\$ 753	\$ 833	\$ 1,127

The change in our FAS/CAS operating adjustment of \$0.1 billion in 2025 compared to 2024 was driven by a decrease in CAS expense, primarily due to increases in the applicable CAS discount rates and reductions in administrative expenses paid by the pension plans.

The change in our FAS/CAS operating adjustment of \$0.3 billion in 2024 compared to 2023 was driven by a decrease in CAS expense, primarily due to the recognition of historical CAS gain/loss experience.

Acquisition accounting adjustments

Acquisition accounting adjustments include the amortization of acquired intangible assets related to acquisitions, the amortization of the property, plant, and equipment fair value adjustment acquired through acquisitions, the amortization of

customer contractual obligations related to loss-making or below-market contracts acquired, and goodwill impairment, if applicable. These adjustments are not considered part of management's evaluation of segment results.

The components of Acquisition accounting adjustments were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Amortization of acquired intangibles	\$ (2,050)	\$ (2,095)	\$ (2,021)
Amortization of property, plant, and equipment fair value adjustment	(33)	(44)	(60)
Amortization of customer contractual obligations related to acquired loss-making and below-market contracts	78	81	83
Acquisition accounting adjustments	\$ (2,005)	\$ (2,058)	\$ (1,998)

Acquisition accounting adjustments related to acquisitions in each segment were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Collins Aerospace	\$ (807)	\$ (833)	\$ (854)
Pratt & Whitney	(384)	(312)	(287)
Raytheon	(814)	(913)	(857)
Acquisition accounting adjustments	\$ (2,005)	\$ (2,058)	\$ (1,998)

LIQUIDITY AND FINANCIAL CONDITION

<i>(dollars in millions)</i>	2025	2024
Cash and cash equivalents	\$ 7,435	\$ 5,578
Total debt	37,904	41,261
Total equity	67,102	61,923
Total capitalization (total debt plus total equity)	105,006	103,184
Total debt to total capitalization	36 %	40 %

We assess our liquidity in terms of our ability to generate cash to fund our operating, investing, and financing activities and the timing of such activities. Our principal source of liquidity is cash flows from operating activities. In addition to operating cash flows, other significant factors that affect our overall management of liquidity include: capital expenditures, customer financing requirements, investments in and divestitures of businesses, dividends, common stock repurchases, pension funding, access to the commercial paper markets, adequacy of available bank lines of credit, redemptions of debt, and the ability to attract long-term capital at satisfactory terms.

At December 31, 2025, we had cash and cash equivalents of \$7.4 billion, of which 33% was held by RTX's foreign subsidiaries. We manage our worldwide cash requirements by reviewing available funds among the many subsidiaries through which we conduct our business and the cost effectiveness with which those funds can be accessed. The Company intends to repatriate certain undistributed earnings of its international subsidiaries that have been previously taxed in the U.S. Taxes associated with the future remittance of these earnings have been recorded. For the remainder of the Company's undistributed international earnings, unless tax effective to repatriate, RTX will continue to permanently reinvest these earnings.

Our ability to access global debt markets and the related cost of these borrowings depends on the strength of our credit rating and market conditions. In March 2025, our Moody's Investors Service outlook improved from Baa1/negative to Baa1/stable. In June 2025, our S&P Global rating was affirmed and our outlook was revised from BBB+/negative to BBB+/stable. Though the Company expects to continue having adequate access to funds, declines in our credit ratings or Company outlook could result in higher borrowing costs.

As of December 31, 2025, we had a revolving credit agreement with various banks permitting aggregate borrowings of up to \$5.0 billion, which expires in August 2028. As of December 31, 2025, there were no borrowings outstanding under this agreement. In addition, at December 31, 2025, approximately \$0.6 billion was available under short-term lines of credit primarily with global banks at our international subsidiaries.

From time to time, we use commercial paper borrowings for general corporate purposes, including the funding of potential acquisitions, pension contributions, debt refinancing, dividend payments, and repurchases of our common stock. The commercial paper notes have original maturities of not more than 364 days from the date of issuance. As of December 31, 2025, our maximum commercial paper borrowing limit was \$5.0 billion as the commercial paper is backed by our \$5.0 billion revolving credit agreement. We had no commercial paper borrowings outstanding at December 31, 2025.

During 2025, we made the following repayments of long-term debt:

Date	Description of Notes	Aggregate Principal Balance (in millions)
December 17, 2025	3 Month SOFR plus 1.225% Term Loan due 2026	\$ 1,100
August 18, 2025	3.950% notes due 2025	1,500
May 7, 2025	3 Month SOFR plus 1.225% term loan due 2025	750

We have an existing universal shelf registration statement, which we filed with the SEC on September 18, 2025, for an indeterminate amount of debt and equity securities for future issuance, subject to our internal limitations on the amount of debt to be issued under this shelf registration statement.

The Company offers voluntary supply chain finance (SCF) programs with global financial institutions which enables our suppliers, at their sole discretion, to sell their receivables from the Company to the financial institutions at a rate that leverages our credit rating, which might be beneficial to them. Our suppliers' participation in the SCF programs does not impact or change our terms and conditions with those suppliers, and therefore, we have no economic interest in a supplier's decision to participate in the programs. In addition, we do not pay for any of the costs of the programs incurred by those suppliers that choose to participate, and have no direct financial relationship with the financial institutions, as it relates to sales of receivables made by those suppliers. As such, the SCF programs do not impact our working capital, cash flows, or overall liquidity.

We believe our cash on hand and future operating cash flows will be sufficient to meet our future operating cash needs. Further, we continue to have access to the commercial paper markets and our existing credit facilities, and our ability to obtain debt or equity financing, as well as the availability under committed credit lines, provides additional potential sources of liquidity should they be required.

Cash Flow - Operating Activities

<i>(dollars in millions)</i>	2025	2024	2023
Net cash flows provided by operating activities	\$ 10,567	\$ 7,159	\$ 7,883

2025 Compared with 2024 Operating Activities

Included within Net income for 2024 was a \$0.9 billion charge related to the Resolution of Certain Legal Matters and a \$0.4 billion, net of tax, charge related to the Raytheon Contract Termination. During 2024, we paid a combined \$1.5 billion related to the Resolution of Certain Legal Matters and the Raytheon Contract Termination.

The \$3.4 billion increase in cash flows provided by operating activities in 2025 compared to 2024 was primarily driven by higher net income after adjustments to reconcile to net cash provided by operating activities driven by our segment performance, an increase in accounts payable and accrued liabilities due to the timing of collaborator payables, and the benefit of lower inventory growth. These increases were partially offset by an increase in accounts receivable due to higher volume and timing of collections.

The Company enters into various factoring agreements with third-party financial institutions to sell certain of its receivables, primarily related to customer facilitated programs. The activity pursuant to these agreements is generally dependent on underlying delivery volumes within our commercial OEM programs. Factoring activity resulted in a \$0.1 billion decrease in cash provided by operating activities in 2025 compared to 2024.

2024 Compared with 2023 Operating Activities

Net income in 2024 included charges of \$0.9 billion related to the Resolution of Certain Legal Matters and \$0.4 billion related to the Raytheon Contract Termination, net of tax. Net income in 2023 included a \$2.2 billion charge related to the Powder Metal Matter, net of tax. The Powder Metal Matter also had the effect of increasing Other accrued liabilities by \$2.8 billion in 2023. Utilization of Other accrued liabilities in 2024 related to this matter were \$1.0 billion and represent cash paid and credits issued to customers. During 2024, we also paid a combined \$1.5 billion related to the Resolution of Certain Legal Matters and the Raytheon Contract Termination.

Additionally, a favorable impact from accounts receivable collections, including the related impact of factoring as discussed below, and a favorable change in accounts payable and other accrued liabilities driven by timing of payments and an increase in material purchases, partially offset by the net change in contract assets and contract liabilities, primarily at Pratt & Whitney, due to sales in excess of billings, contributed to an increase in net cash flows provided by operating activities in 2024 compared to 2023. Excluding the charges discussed above, higher net income after adjustments for depreciation and amortization, deferred income tax benefit, stock compensation cost, net periodic pension and other postretirement income, and gain on sale of CIS business, net of transaction costs also contributed to an increase in net cash flows provided by operating activities in 2024 compared to 2023, primarily driven by the operating performance of our segments.

The Company enters into various factoring agreements with third-party financial institutions to sell certain of its receivables, primarily related to customer facilitated programs. The activity pursuant to these agreements is generally dependent on underlying delivery volumes within our commercial OEM programs. Factoring activity resulted in a \$0.9 billion increase in cash provided by operating activities in 2024, compared to 2023.

Operating Activities

We make both required and discretionary contributions to our pension plans. Required contributions are primarily determined by Employee Retirement Income Security Act of 1974 (ERISA) funding rules, which require us to fully fund our U.S. qualified pension plans over a rolling fifteen-year period as determined annually based on the calculated funded status at the beginning of each year per the Pension Protection Act of 2006 and subsequent amendments. The funding requirements are primarily based on the year's expected service cost and amortization of other previously unfunded liabilities, which are dependent upon many factors, including returns on invested assets, the level of market interest rates, and actuarial assumptions.

Global pension and PRB cash funding requirements are expected to be approximately \$0.3 billion in 2026, which includes benefit payments to be paid directly by the Company. We can contribute cash or RTX shares to our plans at our discretion, subject to applicable regulations. As of December 31, 2025, the total investment by the U.S. qualified pension plans in RTX shares was less than 1% of total plan assets.

Our domestic defined contribution plan uses an Employee Stock Ownership Plan (ESOP) for certain employer matching contributions. In the fourth quarter of 2024, we expanded the use of ESOP shares to fund our matching contributions to additional participants who had previously received matching contributions in cash.

We made net income tax payments of \$1.6 billion, \$1.2 billion, and \$1.5 billion in 2025, 2024, and 2023, respectively. See "Note 12: Income Taxes" within Item 8 of this Form 10-K for further discussion.

Included in cash flows from operating activities are payments related to our operating lease obligations. See "Note 11: Leases" within Item 8 of this Form 10-K for actual and expected payments on operating lease obligations.

In addition, the majority of our cash flows for purchase obligations are classified as cash flows from operating activities. We expect future payments related to our purchase obligations to be approximately \$47 billion, of which \$29 billion is payable in 2026. Purchase obligations include current amounts committed for the purchase of goods and services under legally enforceable contracts or purchase orders, and do not represent our entire anticipated purchases in the future. Approximately 50% of our purchase obligations described above represent purchase orders for products to be delivered under firm contracts with the U.S. government for which we have full recourse under customary contract termination clauses.

While the timing of cash flows are subject to a number of variables, for the Powder Metal Matter we estimate the accrual for expected customer compensation to be utilized consistent with the timing of execution of the fleet management plan, the period of increased aircraft on ground levels, and contractual terms with customers. In both 2025 and 2024, we utilized \$1.0 billion of the accrual through cash payments and credits issued to customers. We currently estimate a full year 2026 cash impact related to the Powder Metal Matter of approximately \$0.7 billion, which includes the impact of cash paid, customer credits applied and the timing of partner recovery.

Cash Flow - Investing Activities

<i>(dollars in millions)</i>	2025	2024	2023
Net cash flows used in investing activities	\$ (1,265)	\$ (1,534)	\$ (3,039)

Our investing activities primarily include capital expenditures, cash investments in customer financing assets, investments in and dispositions of businesses, payments related to our collaboration intangible assets and contractual rights to provide product on new aircraft platforms, and settlements of derivative contracts not designated as hedging instruments and designated net investment hedges.

2025 Compared with 2024 Investing Activities

The \$0.3 billion change in cash flows used in investing activities in 2025 compared to 2024 primarily related to higher receipts from settlements of derivative contracts of \$0.3 billion. Also contributing to the change was a \$0.1 billion increase in net proceeds received from divestitures. In 2025, we received \$1.2 billion from the actuation and flight control business divestiture and \$0.7 billion from the sale of the Simmonds Precision Products business as compared to \$1.3 billion from the CIS divestiture and \$0.5 billion from the Goodrich Hoist & Winch divestiture in 2024.

2024 Compared with 2023 Investing Activities

The \$1.5 billion change in cash flows used in investing activities in 2024 compared to 2023 primarily related to the cash proceeds from the sale of our CIS business within our Raytheon segment and the sale of our Goodrich Hoist & Winch business within our Collins segment of approximately \$1.3 billion and \$0.5 billion, respectively.

Investing Activities

There were no significant acquisitions in 2025, 2024, or 2023. For information on dispositions of businesses in 2025, 2024, or 2023, see above and “Note 2: Acquisitions and Dispositions” within Item 8 of this Form 10-K.

In 2025, 2024, and 2023 our intangible assets increased by \$0.5 billion, \$0.6 billion, and \$0.8 billion, respectively, primarily related to collaboration payment commitments made under our 2012 agreement to acquire Rolls-Royce’s collaboration interests in International Aero Engines AG (IAE) and exclusivity payments made on contractual commitments included within intangible assets. At December 31, 2025, we had commercial aerospace financing and other contractual commitments, including exclusivity and collaboration payment commitments, of approximately \$13.1 billion, on a gross basis before reduction for our collaboration partners’ share. Refer to “Note 17: Commitments and Contingencies” within Item 8 of this Form 10-K for further details on our commercial aerospace financing and other contractual commitments.

As discussed in “Note 13: Financial Instruments” within Item 8 of this Form 10-K, we enter into derivative instruments primarily for risk management purposes, including derivatives designated as hedging instruments and those utilized as economic hedges. We operate internationally and in the normal course of business, are exposed to fluctuations in interest rates, foreign exchange rates, and commodity prices. These fluctuations can increase the costs of financing, investing, and operating the business. We have used derivative instruments, including swaps, forward contracts, and options, to manage certain foreign currency, interest rate, and commodity price exposures.

Cash Flow - Financing Activities

<i>(dollars in millions)</i>	2025	2024	2023
Net cash flows used in financing activities	\$ (7,486)	\$ (6,617)	\$ (4,527)

Our financing activities primarily include the issuance and repayment of commercial paper and other short-term and long-term debt, payment of dividends, and share repurchases.

2025 Compared with 2024 Financing Activities

The \$0.9 billion increase in cash flows used in financing activities in 2025 compared to the 2024 was primarily driven by higher year-over-year long-term debt repayments of \$0.9 billion. Refer to “Note 9: Borrowings and Lines of Credit” within Item 8 of this Form 10-K for additional information on debt repayments. Additionally, lower share repurchases were more than offset by higher dividends paid in 2025 as compared to 2024.

2024 Compared with 2023 Financing Activities

The \$2.1 billion increase in cash flows used in financing activities in 2024 compared to 2023 was primarily driven by higher year-over-year long-term debt repayments of \$1.9 billion. Prior year long-term debt proceeds of \$12.9 billion were partially offset by lower year-over-year share repurchases of \$12.4 billion, primarily related to the prior year ASR.

Financing Activities

Included in cash flows from financing activities are principal payments related to our long-term debt. A summary of our long-term debt commitments, including interest payments which are included in cash flows provided by operating activities, as of December 31, 2025 was as follows:

(dollars in millions)	Payments Due by Period			
	2026	2027	2028	Thereafter
Long-term debt—principal	\$ 3,412	\$ 2,928	\$ 3,490	\$ 27,947
Long-term debt—future interest	\$ 1,676	\$ 1,491	\$ 1,413	\$ 16,826

At December 31, 2025, management had remaining authority to repurchase approximately \$0.6 billion of our common stock under the October 21, 2023 share repurchase program. Under the 2023 program, shares may be purchased on the open market, in privately negotiated transactions, under accelerated share repurchase programs, and under plans complying with Rules 10b5-1 and 10b-18 under the Securities Exchange Act of 1934, as amended. We may also reacquire shares outside of the program in connection with the surrender of shares to cover taxes on vesting of restricted stock. Our ability to repurchase shares is subject to applicable law.

Our share repurchases were as follows for the years ended December 31:

(dollars in millions; shares in thousands)	2025		2024		2023	
	\$	Shares	\$	Shares	\$	Shares
Shares of common stock repurchased ⁽¹⁾	\$ 50	396	\$ 186	1,781	\$ 12,870	141,696
ASR Tranche 1 settlement - shares received ⁽²⁾	—	—	—	391	—	—
ASR Tranche 2 settlement - financing cash paid ^{(2) (3)}	—	—	258	—	—	—
Total shares of common stock repurchased	\$ 50	396	\$ 444	2,172	\$ 12,870	141,696

(1) Relates to share repurchases that were settled in cash during the year.

(2) Includes the settlement of the ASR first and second tranches in the third quarter of 2024.

(3) Excludes the change in fair value of the stock price from trade date to settlement date of \$3 million, which is classified as an operating cash flow in our Consolidated Statement of Cash Flows.

Pursuant to the ASR agreements entered into in 2023, the shares associated with the remaining portion of the aggregate purchase price have been settled over two tranches. In July 2024, the first tranche was settled upon final delivery to us of approximately 0.4 million shares of common stock. In September 2024, with respect to the second tranche, we owed approximately 2.2 million shares of common stock that we elected to cash settle for \$261 million. The cash payment required as a result of the second tranche settlement was due to the significant increase in the price of our common stock during the ASR term. The final average price under the ASR was \$94.28 per share.

On February 6, 2026, the Board of Directors declared a dividend of \$0.68 per share payable March 19, 2026 to shareowners of record at the close of business on February 20, 2026.

CRITICAL ACCOUNTING ESTIMATES

Preparation of our financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. Management believes the most complex and sensitive judgments, because of their significance to the Consolidated Financial Statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. The most significant areas involving management judgments and estimates are described below. Actual results in these areas could differ from management's estimates.

Long-Term Contract Accounting. We recognize revenue on an over-time basis for substantially all defense contracts and certain long-term aerospace aftermarket contracts. We measure progress toward completion of these contracts on a percentage-of-completion basis, generally using costs incurred to date relative to total estimated costs at completion. Contract costs are incurred over a period of time, which can be several years, and the estimation of these costs requires management's judgment. We review our Estimates at Completion (EACs) at least annually or when a change in circumstances warrants a modification to a previous estimate. For significant contracts, we review our EACs more frequently. Due to the nature of the work required to be performed on many of the Company's performance obligations, the estimation of total revenue and cost at completion is

complex, subject to many inputs, and requires significant judgment by management on a contract by contract basis. As part of this process, management reviews information including, but not limited to, any outstanding key contract matters, progress towards completion and the related program schedule, identified risks and opportunities, and the related changes in estimates of revenues and costs. The risks and opportunities relate to management's judgment about the ability and cost to achieve the schedule, consideration of customer-directed delays or reductions in scheduled deliveries, technical requirements, customer activity levels, such as flight hours or aircraft landings, and related variable consideration. Management must make assumptions and estimates regarding contract revenues and costs, including estimates of labor productivity and availability, the complexity and scope of the work to be performed, the availability and cost of materials including any impact from changing costs or inflation, the length of time to complete the performance obligation, execution by our subcontractors, the availability and timing of funding from our customer, overhead cost rates, and current and past maintenance cost and frequency driven by estimated aircraft and engine utilization and estimated useful lives of components, among others. In particular, fixed-price development programs involve significant management judgment, as development contracts by nature have elements that have not been done before and thus, are highly subject to future unexpected cost changes. Cost estimates may also include the estimated cost of satisfying our industrial cooperation agreements, sometimes in the form of either offset obligations or in-country industrial participation (ICIP) agreements, required under certain contracts. These obligations may or may not be distinct depending on their nature. If cash is paid to a customer to satisfy our offset obligations, it is recorded as a reduction in the transaction price. Changes in estimates of net sales, cost of sales, and the related impact to operating profit on contracts recognized over time are recognized on a cumulative catch-up basis, which recognizes the cumulative effect of the profit changes on current and prior periods based on a performance obligation's percentage-of-completion in the current period. A significant change in one or more of these estimates could affect the profitability of one or more of our performance obligations. Our EAC adjustments also include the establishment of, and changes to, loss provisions for our contracts accounted for on a percentage-of-completion basis.

Net EAC adjustments had the following impact on our operating results:

<i>(dollars in millions, except per share amounts)</i>	2025	2024	2023
Total net sales	\$ (208)	\$ (144)	\$ (452)
Operating profit	(386)	(473)	(648)
Net income attributable to common shareowners ⁽¹⁾	(305)	(374)	(512)
Diluted earnings per share attributable to common shareowners ⁽¹⁾	\$ (0.22)	\$ (0.28)	\$ (0.36)

(1) Amounts reflect a U.S. statutory tax rate of 21%, which approximates our tax rate on our EAC adjustments.

In addition to the amounts included in the table above, during the fourth quarter of 2024, as a result of obtaining critical licenses and further regulatory approvals, we restarted work under certain contracts with a Middle East customer and began recognizing revenue on these contracts. As a result, Raytheon recognized a net operating profit benefit of \$0.1 billion primarily related to reserve and contract loss provision adjustments. Additionally, during the second quarter of 2024, Raytheon recognized a \$0.6 billion charge related to the impact of the Raytheon Contract Termination. The charge included the write-off of remaining contract assets and the estimated settlement with the customer. The contract termination was completed and customer settlement occurred during the fourth quarter of 2024, in line with previously accrued amounts.

Costs incurred for engineering and development of certain aerospace products under contracts with customers are capitalized as contract fulfillment costs, to the extent recoverable from the associated contract margin and customer funding, and subsequently amortized as the products are delivered to the customer. The estimation of contract costs, and margin, considered as part of this recoverability assessment requires significant judgment. We regularly assess capitalized contract fulfillment costs for impairment. In 2024, we recognized impairment charges at Collins of approximately \$0.2 billion due to a contract cancellation and \$0.1 billion as a result of the impact of initiating alternative titanium sources. See "Note 1: Basis of Presentation and Summary of Accounting Principles" within Item 8 of this Form 10-K for further discussion.

Income Taxes. Management believes that our earnings during the periods when the temporary differences become deductible will be sufficient to realize the related future income tax benefits, which may be realized over an extended period of time. For those jurisdictions where the expiration date of tax carryforwards or the projected operating results indicate that realization is not likely, a valuation allowance is provided.

In assessing the need for a valuation allowance, we consider available positive and negative evidence including past operating results, projections of future taxable income, the feasibility of ongoing tax planning strategies, and the realizability of tax loss carryforwards. Our projections of future taxable income include estimates and assumptions regarding our volume, pricing, and costs, as well as the timing and amount of reversals of taxable temporary differences. Valuation allowances related to deferred tax assets can be affected by changes to tax laws, changes to statutory tax rates, and future taxable income levels. In the event we were to determine that we would not be able to realize all or a portion of our deferred tax assets in the future, we would

reduce such amounts through an increase to tax expense in the period in which that determination is made or when tax law changes are enacted. Conversely, if we were to determine that we would be able to realize our deferred tax assets in the future in excess of the net carrying amounts, we would decrease the recorded valuation allowance through a decrease to tax expense in the period in which that determination is made.

In the ordinary course of business there is inherent uncertainty in quantifying our income tax positions. Significant judgment is required when assessing our income tax positions and in determining our tax expense and benefits. Management assesses our tax positions based on an evaluation of the facts, circumstances, applicable tax laws, including regulations, case law, and other interpretive guidance, as well as any other relevant information. Adjustments to our tax positions are made as new information becomes available or when our assessments change. See “Note 1: Basis of Presentation and Summary of Accounting Principles” and “Note 12: Income Taxes” within Item 8 of this Form 10-K for further discussion.

Goodwill and Intangible Assets. The assets and liabilities of acquired businesses are recorded under the acquisition method of accounting at their estimated fair values at the dates of acquisition. Goodwill represents costs in excess of fair values assigned to the underlying identifiable net assets of acquired businesses. Intangible assets acquired in business combinations consist of patents, trademarks/tradenames, developed technology, customer relationships, and other intangible assets. The fair value for acquired customer relationship intangibles is determined as of the acquisition date based on estimates and judgments regarding expectations for the future after-tax cash flows arising from the follow-on revenue from customer relationships that existed on the acquisition date over their estimated lives, including the probability of expected future contract renewals and revenue, less a contributory assets charge, all of which is discounted to present value. The fair value of the trademark and tradename intangible assets are determined utilizing the relief from royalty method which is a form of the income approach. Under this method, a royalty rate based on observed market royalties is applied to projected revenue supporting the tradename and discounted to present value using an appropriate discount rate. See “Note 1: Basis of Presentation and Summary of Accounting Principles” within Item 8 of this Form 10-K for further details.

Also included within intangible assets are exclusivity assets, which are payments made to secure certain contractual rights to provide products on new commercial aerospace platforms. At December 31, 2025, our exclusivity assets, net of accumulated amortization, were approximately \$3.7 billion, and our remaining estimated commitments, net of collaborator share, were approximately \$5.5 billion. We assess the recoverability of these intangibles, which is dependent upon our assumptions around the future success and profitability of the underlying aircraft platforms, including the associated aftermarket revenue streams, and the related future cash flows.

Goodwill and intangible assets deemed to have indefinite lives are not amortized, but are subject to impairment testing annually, or more frequently if events or changes in circumstances indicate the asset might be impaired. The impairment test compares carrying values of the reporting units and indefinite-lived intangible assets to their estimated fair values. If the carrying value exceeds the fair value, then the carrying value is reduced to fair value. In testing our reporting units and indefinite-lived intangible assets for impairment, we may perform both qualitative and quantitative assessments. For the quantitative assessments that are performed for goodwill, we primarily utilize a combination of discounted cash flows and market-based valuation methodologies. For the quantitative assessments of indefinite-lived intangible assets, fair value is primarily based on the relief from royalty method. These quantitative assessments incorporate significant assumptions that include sales growth rates, projected operating profit, terminal growth rates, discount rates, royalty rates, and comparable multiples from publicly traded companies in our industry. Such assumptions are subject to variability from year to year and are directly impacted by, among other things, global market conditions.

We completed our annual goodwill impairment testing as of October 1, 2025 and determined that no adjustments to the carrying value of goodwill were necessary. We assessed all of our reporting units using qualitative factors to determine whether it was more likely than not that any individual reporting unit’s fair value is less than its carrying value (step 0) and determined that no further testing was required.

The Company continuously monitors and evaluates relevant events and circumstances that could unfavorably impact our significant assumptions used in testing goodwill, including changes to U.S. treasury rates and equity risk premiums, tax rates, recent market valuations from transactions by comparable companies, volatility in the Company’s market capitalization, and general industry, market, and macro-economic conditions. It is possible that future changes in such circumstances, or in the inputs and assumptions used in estimating the fair value of our reporting units, could require the Company to record a non-cash impairment charge.

We also completed our annual indefinite-lived intangible assets impairment testing using a qualitative approach as of October 1, 2025 and determined that no adjustments to the carrying value of these assets were necessary. As noted above, our indefinite-lived intangible assets impairment analysis involves significant assumptions that are subject to variability. Material changes in these assumptions could occur and result in impairments in future periods.

Contingent Liabilities. As described in “Note 17: Commitments and Contingencies” within Item 8 of this Form 10-K, contractual, regulatory, and other matters in the normal course of business may arise that subject us to claims or litigation, including with respect to matters relating to technical issues on programs, government contracts, performance and operating cost guarantees, employee benefit plans, legal, and environmental, health, and safety matters. In particular, the design, development, production, and support of aerospace technologies is inherently complex and subject to risk. Technical issues associated with these technologies may arise in the normal course and may result in financial impacts, including increased warranty provisions, customer contract settlements, and changes in contract performance estimates. These impacts could be material to the Company’s results of operations, financial condition, and liquidity. Additionally, we have significant contracts with the U.S. government, subject to government oversight and audit, which may require significant adjustment of contract prices. We accrue for liabilities associated with these matters when it is probable that a liability has been incurred and the amount can be reasonably estimated. Estimating our liability based on both the likelihood of any adverse judgments or outcomes, and the costs associated with these matters, requires significant judgment. The inherent uncertainty related to the outcome of these matters could result in amounts materially different from any provisions made with respect to their resolution.

In 2023, Pratt & Whitney determined that a rare condition in powder metal used to manufacture certain engine parts requires accelerated inspection of the PW1100 GTF fleet, which powers the A320neo. This determination was made pursuant to Pratt & Whitney’s safety management system.

On August 4, 2023, Pratt & Whitney issued a special instruction (SI) to operators of PW1100 GTF powered A320neo aircraft, which required accelerated inspections and engine removals covering an initial subset of operational engines, no later than September 15, 2023. During the third quarter of 2023, through its safety management system, Pratt & Whitney continued its engineering and industrial assessment, which resulted in an updated fleet management plan for the remaining PW1100 fleet. This updated plan requires a combination of part inspections and retirements for some high pressure turbine and high pressure compressor parts made from affected raw material. Guidance to affected operators was released via service bulletins (SB) and SI in November 2023, and this guidance has been reflected in airworthiness directives issued by the Federal Aviation Administration (FAA). Consistent with previous information, the actions are resulting in significant incremental shop visits.

As a result of this matter, Pratt & Whitney expects aircraft on ground levels for the PW1100 powered A320neo fleet to remain elevated through 2026. As a result of anticipated increased aircraft on ground levels and expected compensation to customers for this disruption, as well as incremental maintenance costs resulting from increased inspections and shop visits, Pratt & Whitney recorded a pre-tax operating profit charge in the third quarter of 2023 of \$2.9 billion, reflecting Pratt & Whitney’s net 51% program share of the PW1100 program. This amount reflected our best estimate of expected customer compensation for the estimated duration of the disruption as well as the EAC adjustment impact of this matter to Pratt & Whitney’s long-term maintenance contracts. The incremental costs to the business’s long-term maintenance contracts include the estimated cost of additional inspections, replacement of parts, and other related impacts.

The charge recorded in the third quarter of 2023 resulted in a net increase in Other accrued liabilities of \$2.8 billion, which principally related to our 51% share of an accrual for expected customer compensation. At December 31, 2025 and 2024, we had other accrued liabilities of \$0.7 billion and \$1.7 billion, respectively, primarily related to expected compensation to customers. The decrease in the accrual in 2025 and 2024 was primarily due to customer compensation in the form of credits issued and cash paid to customers during the period.

Other engine models within Pratt & Whitney’s fleet contain parts manufactured with affected powder metal, but we do not currently believe there will be any resultant significant financial impact with respect to these other engine models at this time. The financial impact of the powder metal issue is based on historical experience and is subject to various assumptions and judgments, most notably, the number and expected timing of shop visits, inspection results and scope of work to be performed, turnaround time, availability of parts, available capacity at overhaul facilities, and outcomes of negotiations with impacted customers. While these assumptions reflect our best estimates at this time, they are subject to variability. Potential changes to these assumptions and actual incurred costs could significantly affect the estimates inherent in our financial statements and could have a material effect on the Company’s results of operations for the periods in which they are recognized.

Employee Benefit Plans. We sponsor domestic and foreign defined benefit pension and PRB plans. Assumptions used to calculate our funded status are determined based on company data and appropriate market indicators. They are evaluated annually at December 31 and when significant events require a mid-year remeasurement. A change in any of these assumptions

or actual experience that differs from these assumptions are subject to recognition in pension and postretirement net periodic benefit (income) expense reported in the Consolidated Financial Statements.

Assumptions used in the accounting for these employee benefit plans require judgment. Major assumptions include the discount rate and expected return on planned assets (EROA). Other assumptions include actuarial and demographic assumptions including mortality rates, retirement age, and rate of increase in employee compensation levels.

The weighted-average discount rates used to measure pension and PRB liabilities are generally based on yield curves developed using high-quality corporate bonds which are subject to macroeconomic factors, as well as plan specific expected cash flows. For our significant plans, we utilize a full yield curve approach in the estimation of the service cost and interest cost components of net periodic pension income by applying the specific spot rates along the yield curve used in determination of the benefit obligation to the relevant discounted projected cash flows.

The following table shows the sensitivity of our pension and PRB plan liabilities and net periodic benefit income to a 25 basis point change in the discount rates for benefit obligations, interest cost, and service cost as of December 31, 2025:

<i>(dollars in millions)</i>	Increase in Discount Rate of 25 bps	Decrease in Discount Rate of 25 bps
Projected benefit obligation increase (decrease)	\$ (975)	\$ 1,017
Net periodic benefit income increase (decrease)	(39)	42

The discount rate sensitivities assume no change in the shape of the yield curve that will be applied to the projected cash outflows for future benefit payments in order to calculate interest and service cost. A flattening of the yield curve results in a narrowing of the spread between interest and obligation discount rates and would decrease our net periodic benefit income. Conversely, a steepening of the yield curve would result in an increase in the spread between interest and obligation discount rates and would increase our net periodic benefit income.

The EROA is the average rate of earnings expected over the long-term on assets invested to fund anticipated future benefit payment obligations. In determining the EROA assumption, we consider the target asset allocation of plan assets, as well as economic and other indicators of future performance. We consult with and consider the opinions of financial and other professionals in determining the appropriate capital market assumptions. Return projections are validated using a simulation model that incorporates yield curves, credit spreads, and risk premiums to project long-term prospective returns. Differences between actual asset returns in a given year and the EROA do not necessarily indicate a change in the assumption is required, as the EROA represents the expected average returns over a long-term horizon.

Net periodic benefit income is also sensitive to changes in the EROA. An increase or decrease of 25 basis points in the EROA would have increased or decreased our 2025 net periodic benefit income by approximately \$130 million.

Refer to “Note 10: Employee Benefit Plans” within Item 8 of this Form 10-K for discussion of current and prior year discount rate and EROA assumptions.

ACCOUNTING STANDARDS

For a discussion of recent accounting pronouncements, see the Accounting Pronouncements section in “Note 1: Basis of Presentation and Summary of Accounting Principles” within Item 8 of this Form 10-K.

COMMITMENTS AND CONTINGENCIES

Refer to “Note 17: Commitments and Contingencies” within Item 8 of this Form 10-K for discussion on contractual commitments and contingencies.

GOVERNMENT MATTERS

As described above in “Critical Accounting Estimates—Contingent Liabilities,” our contracts with the U.S. government are subject to audits. Such audits may recommend that certain contract prices should be reduced to comply with various government regulations, or that certain payments be delayed or withheld. We are also the subject of one or more investigations and legal proceedings initiated by the U.S. government with respect to government contract matters. In addition, as described in “Note 1: Basis of Presentation and Summary of Accounting Principles” within Item 8 of this Form 10-K, in 2024, the Company entered into a deferred prosecution agreement (DPA) with the Department of Justice (DOJ) and the Company settled an administrative proceeding with the SEC (the SEC Administrative Order) to resolve the previously disclosed criminal and civil government investigations into payments made by Raytheon Company and its joint venture, Thales-Raytheon Systems (TRS) since 2012, in connection with certain Middle East contracts. The Company also entered into a DPA and a FCA settlement

agreement with the DOJ to resolve previously disclosed criminal and civil government investigations into defective pricing claims for certain legacy Raytheon Company contracts entered into between 2011 and 2013 and in 2017. Under these DPAs and the SEC Administrative Order, Raytheon Company and the Company are required to undertake certain cooperation and disclosure obligations (for a term commencing on the effective date of DPA-1 and the SEC Administrative Order, as applicable, and ending three years from the date on which Raytheon Company and the Company engage an independent compliance monitor satisfactory to the DOJ and SEC). A single independent compliance monitor was selected to oversee Raytheon Company's and the Company's compliance with their respective obligations under the DPAs and the SEC Administrative Order, and that monitor is expected to be in place by the end of the first quarter. In 2024, the Company also resolved certain voluntarily disclosed export controls violations primarily identified in connection with the integration of Rockwell Collins and, to a lesser extent, Raytheon Company, including certain violations that were resolved pursuant to a Consent Agreement (CA) with the U.S. Department of State (DOS). The CA, which has a three-year term, requires the Company to implement remedial compliance measures and to conduct an external audit of the Company's ITAR compliance program. The CA also requires appointment of an external, independent Special Compliance Officer (SCO). The Company appointed its SCO on September 27, 2024. See "Note 17: Commitments and Contingencies" within Item 8 of this Form 10-K for further discussion of these and other government matters.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary market exposures are to fluctuations in foreign currency exchange rates and interest rates as it relates to our market risk sensitive instruments, which are primarily cash, debt, and derivative instruments. To quantify our market risk exposure, we perform a sensitivity analysis based on hypothetical changes in foreign currency exchange rates and interest rates. Refer to "Note 1: Basis of Presentation and Summary of Accounting Principles," "Note 9: Borrowings and Lines of Credit," and "Note 13: Financial Instruments" within Item 8 of this Form 10-K for additional discussion of foreign currency exchange, interest rates, and financial instruments.

Foreign Currency Exchange Rate Risk. We are subject to foreign currency exchange rate risk relating to receipts from customers and payments to suppliers in foreign currencies and to various internal or external financing arrangements. We use foreign currency forward contracts to hedge the price risk associated with firmly committed and forecasted foreign denominated payments and receipts related to our ongoing business and financing. We actively manage foreign currency exposures that are associated with committed foreign currency purchases and sales, and other assets and liabilities created in the normal course of business at the operating unit level. More than insignificant exposures that cannot be naturally offset within or among operating units are hedged with foreign currency derivatives. The Company also uses net investment hedging to hedge the foreign currency risk of our net investment in foreign operations against adverse movements in exchange rates against the U.S. Dollar. Foreign exchange exposures arising from intercompany loan and deposit transactions are also hedged regularly. The present value of aggregate notional principal of our outstanding foreign currency hedges was \$26 billion and \$17 billion at December 31, 2025 and 2024, respectively. Foreign currency forward contracts are sensitive to changes in foreign currency exchange rates. A 10% unfavorable exchange rate movement in our portfolio of foreign currency contracts would have resulted in an increase in unrealized losses of \$0.9 billion and \$1.0 billion at December 31, 2025 and 2024, respectively. Such losses or gains would be offset by corresponding gains or losses in the remeasurement of the underlying transactions and balances being hedged. We believe these foreign currency forward exchange contracts and the offsetting underlying commitments, when taken together, do not create material market risk.

Our sales are typically denominated in U.S. Dollars. However, for our non-U.S. based entities, including Pratt & Whitney Canada, a substantial portion of their costs are incurred in local currencies. Consequently, there is a foreign currency exchange impact and risk to operational results as U.S. Dollars must be converted to local currencies such as the Canadian Dollar in order to meet local currency cost obligations. Additionally, we transact business in various foreign currencies which exposes our cash flows and earnings to changes in foreign currency exchange rates. In order to minimize the exposure that exists from changes in the exchange rate of the U.S. Dollar against these other currencies, we hedge a certain portion of sales to secure the rates at which U.S. Dollars will be converted. At Pratt & Whitney Canada and Collins Aerospace, firm and forecasted sales for both original equipment and spare parts are hedged at varying amounts on the U.S. Dollar sales exposure as represented by the excess of U.S. Dollar sales over U.S. Dollar denominated purchases. At Raytheon, portions of the cost to deliver a program may be denominated in a currency other than the currency of sale, and forecasts of such costs are frequently hedged to reduce foreign exchange exposures that can impact the cost of delivery of such programs. Where sales of a Raytheon program are denominated in a currency other than the functional currency of the contracting affiliate, forecasted sales for that program may be hedged to minimize the resulting foreign exchange exposure for that affiliate. Hedging gains and losses resulting from movements in foreign currency exchange rates are partially offset by the foreign currency translation impacts that are generated on the translation of local currency operating results into U.S. Dollars for reporting purposes. While the objective of the hedging program is to minimize the foreign currency exchange impact on operating results, there are typically variances

between the hedging gains or losses and the translational impact due to the length of hedging contracts, changes in the sales profile, volatility in the exchange rates, and other such operational considerations.

Interest Rate Risk. We have financial instruments that are subject to interest rate risk, principally fixed-rate debt obligations. A 100 basis point unfavorable interest rate movement would have had an approximate \$3 billion impact on the fair value of our fixed-rate debt at both December 31, 2025 and 2024. The investors in our fixed-rate debt obligations generally do not have the right to demand we pay off these obligations prior to maturity. Therefore, we believe our exposure to interest rate risk on our fixed-rate debt is not material. We also have variable-rate debt, including \$0.9 billion of term loans outstanding, which is affected by changes in market interest rates. A 100 basis point unfavorable interest rate movement on variable debt would not be expected to have a material effect on our operations or cash flows. From time to time, we may hedge to floating rates using interest rate swaps. Currently, we do not hold any derivative contracts that hedge our interest exposures, but may consider such strategies in the future.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of RTX Corporation (RTX) is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States of America. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Management has assessed the effectiveness of RTX's internal control over financial reporting as of December 31, 2025. In making its assessment, management has utilized the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in its *Internal Control—Integrated Framework*, released in 2013. Management concluded that based on its assessment, RTX's internal control over financial reporting was effective as of December 31, 2025. The effectiveness of RTX's internal control over financial reporting, as of December 31, 2025, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Senior Vice President and Controller

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareowners and Board of Directors of RTX Corporation

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of RTX Corporation and its subsidiaries (the “Company”) as of December 31, 2025 and 2024, and the related consolidated statements of operations, of comprehensive income, of changes in equity and of cash flows for each of the three years in the period ended December 31, 2025, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company’s internal control over financial reporting as of December 31, 2025, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2025 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2025, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company’s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company’s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Revenue Recognition - Contract Estimates at Completion

As described in Note 1 to the consolidated financial statements, the majority of the Company's revenues of \$88.6 billion for the year ended December 31, 2025, are from long-term contracts associated with the design, development, manufacture or modification of complex aerospace or defense equipment or related services. The Collins and Pratt & Whitney segments primarily serve commercial and government customers in both the original equipment manufacturer and aftermarket parts and services markets of the aerospace industry, while the Raytheon segment primarily provides products and services to government customers in the defense industry. For certain long-term aftermarket contracts, revenue is recognized over the contract period, and the Company generally accounts for such contracts as a series of daily performance obligations to stand ready to provide spare parts, product maintenance and aftermarket services. Substantially all of the defense business revenue is recognized over time because of the continuous transfer of control to customers. For performance obligations satisfied over time, revenue is recognized on a percentage-of-completion basis generally using costs incurred to date relative to total estimated costs at completion to measure progress. Incurred costs represent work performed, which correspond with and best depict transfer of control to the customer. Management reviews the estimated costs at completion at least annually or when a change in circumstances warrants a modification to a previous estimate. Due to the nature of the work required to be performed on many of the Company's performance obligations, the estimation of total revenue and cost at completion is complex, subject to many inputs and requires significant judgment by management on a contract-by-contract basis. As part of this process, management reviews information including, but not limited to, any outstanding key contract matters, progress towards completion and the related program schedule, identified risks and opportunities, and the related changes in estimates of revenues and costs. The risks and opportunities relate to management's judgment about the ability and cost to achieve the schedule, consideration of customer-directed delays or reductions in scheduled deliveries, technical requirements, customer activity levels, such as flight hours or aircraft landings, and related variable consideration. Management must make assumptions and estimates regarding contract revenues and costs, including estimates of labor productivity and availability, the complexity and scope of the work to be performed, the availability and cost of materials, including any impact from changing costs or inflation, the length of time to complete the performance obligation, execution by its subcontractors, the availability and timing of funding from the customer, overhead cost rates, and current and past maintenance cost and frequency driven by estimated aircraft and engine utilization and estimated useful lives of components, among others. Changes in estimates of net sales, cost of sales and the related impact to operating profit on contracts recognized over time are recognized on a cumulative catch-up basis, which recognizes the cumulative effect of the profit changes on current and prior periods based on a performance obligation's percentage of completion in the current period. A significant change in one or more of these estimates could affect the profitability of one or more of the performance obligations.

The principal considerations for our determination that performing procedures relating to revenue recognition - contract estimates at completion is a critical audit matter are (i) the significant judgment by management in developing the estimates of total revenue and total costs at completion, including significant judgments and assumptions on a contract-by-contract basis, and (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating audit evidence related to management's estimates of total revenue and total costs at completion for contracts.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the revenue recognition process, including controls over the estimates of total revenue and total costs at completion. These procedures also included, among others, testing management's process for developing the estimated total revenue and total costs at completion, including evaluating on a test basis the reasonableness of certain significant judgments and inputs considered by management specific to each contract or performance obligation. Evaluating the significant judgments and assumptions related to the estimates of total revenue and total costs at completion on a contract-by-contract basis involved evaluating whether the significant judgments and assumptions used were reasonable considering: (i) management's historical

forecasting accuracy, (ii) evidence to support the aforementioned inputs relevant to an individual contract, (iii) the consistent application of accounting policies, and (iv) the timely identification of circumstances which may warrant a modification to a previous estimate.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1: BASIS OF PRESENTATION AND SUMMARY OF ACCOUNTING PRINCIPLES

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. Actual results could differ from those estimates.

Unless the context otherwise requires, the terms “we,” “our,” “us,” “the Company,” and “RTX” mean RTX Corporation and its subsidiaries.

We reclassified certain immaterial prior period amounts within our Consolidated Statement of Cash Flows and Consolidated Statement of Changes in Equity related to our share-based 401(k) matching contributions to conform to our current period presentation.

Legal Matters. As previously disclosed, in 2024 the Company resolved several outstanding legal matters, herein referred to as “Resolution of Certain Legal Matters.” See “Note 17: Commitments and Contingencies” for additional information.

Russia Sanctions. In response to Russia’s invasion of Ukraine, the U.S. government and the governments of various jurisdictions in which we operate, have imposed broad economic sanctions and export controls targeting specific industries, entities, and individuals in Russia. The Russian government has implemented similar counter-sanctions and export controls targeting specific industries, entities, and individuals in the U.S. and other jurisdictions in which we operate, including certain members of the Company’s management team and Board of Directors. These government measures, among other limitations, restrict transactions involving various Russian banks and financial institutions and impose enhanced export controls limiting transfers of various goods, software, and technologies to and from Russia, including broadened export controls specifically targeting the aerospace sector. These measures have adversely affected, and could continue to adversely affect, the Company and/or our supply chain, business partners, or customers. As a result of the Canadian government’s imposition of sanctions in February 2024, including those imposed on U.S.- and German-based Russian-owned entities from which we source titanium for use in our Canadian operations, we recorded charges of \$175 million in the first quarter of 2024 within our Collins Aerospace (Collins) segment. These charges are primarily related to the recognition of unfavorable purchase commitments and an impairment of contract fulfillment costs that are no longer recoverable as a result of initiating alternative titanium sources. We continue to monitor developments, including additional sanctions and other measures, that could adversely affect the Company and/or our supply chain, business partners, or customers.

Pratt & Whitney Powder Metal Matter. In 2023, Pratt & Whitney determined that a rare condition in powder metal used to manufacture certain engine parts requires accelerated inspection of the PW1100G-JM (PW1100) Geared Turbofan (GTF) fleet, which powers the A320neo family of aircraft (A320neo) (herein referred to as the “Powder Metal Matter”). See “Note 17: Commitments and Contingencies” for additional information.

Summary of Accounting Principles. The following represents the significant accounting principles of RTX Corporation.

Consolidation and Classification. The Consolidated Financial Statements include the accounts of RTX Corporation, and all wholly owned, majority-owned, and otherwise controlled domestic and foreign subsidiaries. All intercompany transactions have been eliminated. For our consolidated non-wholly owned subsidiaries, a noncontrolling interest is recognized to reflect the portion of income and equity that is not attributable to us. For classification of certain current assets and liabilities, the duration of our contracts or programs is utilized to define our operating cycle, which is generally longer than one year. Included within our current assets and liabilities are Contract assets and Contract liabilities related to our development and aftermarket arrangements, which can generally span up to twenty years.

Use of Estimates. Our Consolidated Financial Statements are based on the application of U.S. Generally Accepted Accounting Principles (GAAP), which require us to make estimates and assumptions about future events that affect the amounts reported in our Consolidated Financial Statements and the accompanying notes. Actual results could differ from those estimates, and any such differences may be material to our Consolidated Financial Statements. Estimates and assumptions are reviewed periodically and the effects of changes, if any, are reflected in our Consolidated Financial Statements in the period they are determined.

Cash and Cash Equivalents. Cash and cash equivalents includes cash on hand, demand deposits, and short-term cash investments that are highly liquid in nature and have original maturities of three months or less. The estimated fair value of Cash and cash equivalents approximates the carrying value due to their short maturities.

Accounts Receivable. Accounts receivable are stated at the net amount expected to be collected. Accounts receivable related to the commercial aerospace industry was approximately 79% of Accounts receivable, net at December 31, 2025 and 2024. We are exposed to credit losses primarily on our accounts receivable and contract assets related to our sales of products and services to commercial customers. The allowance for expected credit losses is established to provide for the expected lifetime credit

losses by evaluating factors such as customer creditworthiness, historical payment and loss experiences, current economic conditions, including geographic and political risk, and the age and status of outstanding receivables. In certain circumstances, we may be able to develop reasonable and supportable forecasts over the contractual term of the financial asset. For periods beyond which we are able to make or obtain reasonable and supportable forecasts, we revert to historical loss experience and information.

We determine credit ratings for each customer in our portfolio based upon public information and information obtained directly from our customers. We conduct a review of customer credit ratings, published historical credit default rates for different rating categories, and multiple third-party aircraft value publications as a basis to validate the reasonableness of the allowance for expected credit losses on a quarterly basis, or when events and circumstances warrant. A credit limit is established for each customer based on the outcome of this review and consideration of the other factors discussed above. In certain cases, we may require collateral or prepayment to mitigate credit risk.

Expected credit losses are written off in the period in which the financial asset is no longer collectible.

Unbilled receivables represent revenues that are not currently billable to the customer under the terms of the contract and include unbilled amounts under commercial contracts where payment is solely subject to the passage of time. These items are expected to be billed and collected in the normal course of business. Accounts receivable, net as of December 31, 2025 and 2024 includes unbilled receivables of \$411 million and \$374 million, respectively, which primarily includes unbilled receivables with commercial aerospace customers. Other unbilled receivables where payment is subject to factors beyond just the passage of time are included in Contract assets, net in the Consolidated Balance Sheet.

Contract Assets and Liabilities. Contract assets and liabilities represent the difference in the timing of revenue recognition from receipt of cash from our customers. Contract assets reflect revenue recognized and performance obligations satisfied or partially satisfied in advance of customer billing.

Contract liabilities relate to payments received in advance of the satisfaction of performance under the contract. We receive payments from customers based on the terms established in our contracts.

Contract assets and contract liabilities are generally classified as current as our operating cycle is generally longer than one year. See “Note 6: Contract Assets and Liabilities” for further discussion of contract assets and liabilities.

As described in more detail above in “Accounts Receivable,” we are exposed to credit losses on our Contract assets related to our sales of products and services to commercial customers and regularly assess our allowance for expected credit losses as it relates to our contract assets.

Inventory. Inventory is stated at the lower of cost or estimated realizable value and is primarily based on first-in, first-out (FIFO) or average cost methods.

Valuation reserves for excess, obsolete, and slow-moving inventory are estimated by comparing the inventory levels of individual parts to both future sales forecasts or production requirements and historical usage rates in order to identify inventory where the resale value or replacement value is less than inventoriable cost. Other factors that management considers in determining the adequacy of these reserves include whether individual inventory parts meet current specifications and can be substituted for a part currently being sold or used as a service part, overall market conditions, and other inventory management initiatives. Manufacturing costs are allocated to current production contracts.

Investments. Investments in entities we do not control are presented in Other assets in our Consolidated Balance Sheet. For investments in which we have significant influence, we apply the equity method of accounting. Under this method, we record our proportionate share of the investee’s net earnings or losses. If we determine that a decline in the value of an equity-method investment is other than temporary, we recognize an impairment loss in current-period earnings. Transactions with equity-method investees, which are considered related parties, were not material for the periods presented.

We also make strategic investments in companies that we believe are advancing or developing new technologies applicable to our business. These investments are primarily in early-stage entities and may be in the form of convertible debt or equity investments. Most of these investments are in equity securities without readily determinable fair values. These securities are measured at cost with adjustments recorded for observable price changes under the measurement alternative. We evaluate these investments for indicators of impairment each reporting period.

Income and losses from these investments are included in Other income (expense), net in our Consolidated Statement of Operations, as the activities of the investees are closely aligned with our operations.

Customer Financing Assets. Customer financing assets (CFA) relate to our commercial aerospace businesses in which we provide financing to airline customers. Our financing predominantly relates to leased engines, often provided through the customers’ aftermarket maintenance coverage, and to a lesser extent, notes and lease receivables. In certain limited

circumstances, we pay deposits on behalf of our airline customers to secure production slots with the airframers, and such pre-delivery payments are included in Accounts receivable, net, if current, and Customer financing assets, if non-current, in our Consolidated Balance Sheet. Any unfunded pre-delivery payments are included within our commercial aerospace financing commitments as further discussed in “Note 17: Commitments and Contingencies.” Interest income from notes and financing leases and rental income from operating lease assets is generally included in Other income (expense), net in the Consolidated Statement of Operations, while gains or losses on sales of operating lease assets are included in Products sales and Cost of sales. The current portion of these financing arrangements are aggregated in Accounts receivable, net and the non-current portion of these financing arrangements are aggregated in Customer financing assets in the Consolidated Balance Sheet. The increases and decreases in CFA from funding, receipts, and certain other activity, are generally reflected as Investing Activities in the Consolidated Statement of Cash Flows. Leased assets are valued at cost and reviewed for impairment when circumstances indicate that the related carrying amounts may not be recoverable. Notes and lease receivables are valued at the net amount expected to be collected. For notes and lease receivables, we determine a specific reserve for exposure based on the difference between the carrying value of the receivable and the estimated fair value of the related collateral in connection with the evaluation of credit risk and collectability. As of December 31, 2025 and 2024, the reserves related to CFA were not material. At December 31, 2025 and 2024, we did not have any material balances that are considered to be delinquent, on non-accrual status, past due 90 days or more, or considered to be impaired.

Fixed Assets, Net. Fixed assets, net, are stated at cost less accumulated depreciation. Major improvements are capitalized while expenditures for maintenance, repairs, and minor improvements are expensed. For asset sales or retirements, the assets and related accumulated depreciation and amortization are eliminated from the accounts. Gains and losses on sales of our Fixed assets, net, are generally recorded in Other income (expense), net.

Business Combinations. Once a business is acquired, the fair value of the identifiable assets acquired and liabilities assumed is determined with the excess cost recorded to goodwill. A preliminary fair value is determined once a business is acquired, with the final determination of the fair value being completed no later than one year from the date of acquisition.

In connection with the acquisitions of Rockwell Collins in 2018 and Goodrich in 2012, and to a lesser extent the acquisition of Raytheon Company in 2020, we recorded assumed liabilities related to customer contractual obligations on certain contracts with economic returns that were lower than what could be realized in market transactions as of the acquisition date. We measured these assumed liabilities based on the estimated cash flows of the programs plus a reasonable contracting profit margin required to transfer the contracts to market participants. These liabilities are being amortized in accordance with the underlying pattern of obligations, as reflected by the expenses incurred on the contracts. The balance of the contractual obligations was \$576 million and \$654 million at December 31, 2025 and 2024, respectively. Total consumption of the contractual obligations for the years ended December 31, 2025, 2024, and 2023 was \$78 million, \$81 million, and \$83 million, respectively, with future consumption expected to be as follows: \$69 million in 2026, \$81 million in 2027, \$84 million in 2028, \$82 million in 2029, \$74 million in 2030, and \$186 million thereafter.

Goodwill and Intangible Assets. Goodwill represents costs in excess of fair values assigned to the underlying net assets of acquired businesses. Goodwill and intangible assets deemed to have indefinite lives are not amortized, but are subject to impairment testing annually, or more frequently if events or changes in circumstances indicate the asset might be impaired. The goodwill impairment test compares carrying values of the reporting units to their estimated fair values. If the carrying value exceeds the fair value then the carrying value is reduced to fair value. In evaluating our reporting units and indefinite-lived intangible assets for impairment, we may perform both qualitative and quantitative assessments. For the quantitative assessments that are performed, fair value is primarily based on market-based valuation methods, income-based methods using a discounted cash flow model, relief from royalty methods, or a combination of each. These assessments utilize significant assumptions including sales growth rates, projected operating profit, terminal growth rates, discount rates, royalty rates, and comparable multiples from publicly-traded companies in our industry. Such assumptions are subject to variability from year to year and are directly impacted by, among other things, global market conditions. Finite-lived intangible assets are tested for impairment when events occur that indicate that the net book value will not be recovered over future cash flows.

Intangible assets consist of patents, trademarks/tradenames, customer relationships, exclusivity assets, developed technology, and other intangible assets, including collaboration assets. Acquired intangible assets are recognized at fair value in purchase accounting. Finite-lived intangible assets are amortized primarily to Cost of sales over the applicable useful lives. Exclusivity assets are commercial aerospace payments made to secure certain contractual rights to provide product on new aircraft platforms. We classify amortization of such payments as a reduction of sales. Such payments are capitalized when there are distinct rights obtained and there are sufficient incremental cash flows to support the recoverability of the assets established. Otherwise, the applicable portion of the payments are expensed. In addition, in connection with our 2012 agreement to acquire Rolls-Royce’s ownership and collaboration interests in International Aero Engines AG (IAE), additional payments are due to Rolls-Royce contingent upon each hour flown through June 2027 by the V2500-powered aircraft in service as of the acquisition date. These flight hour payments are being capitalized as collaboration assets and amortized to Cost of sales.

Useful lives of finite-lived intangible assets are estimated based upon the nature of the intangible asset and how the intangible asset is used. These intangible assets are amortized based on the pattern in which the economic benefits of the intangible assets are consumed, as represented by the underlying cash flows, which may result in an amortization method other than straight-line. For both our commercial aerospace collaboration assets and exclusivity arrangements, the pattern of economic benefit generally results in no amortization during the development period with amortization beginning as programs enter full rate production and aftermarket cycles. If a pattern of economic benefit cannot be reliably determined or if straight-line amortization approximates the pattern of economic benefit, a straight-line amortization method may be used. The range of estimated useful lives is as follows:

	Years
Collaboration assets	9 to 30
Customer relationships and related programs	3 to 25
Developed technology	3 to 25
Patents and trademarks	5 to 30
Exclusivity assets	5 to 25

Leases. As a lessee, we record a right-of-use asset and a lease liability on the Consolidated Balance Sheet for leases with terms longer than 12 months. Leases are classified as either finance or operating, with classification affecting the pattern of expense recognition in the Consolidated Statement of Operations.

We enter into lease agreements for the use of real estate space, vehicles, IT equipment, and certain other equipment, including engines, under both operating and finance leases. We determine if an arrangement contains a lease at inception. Operating leases are included in Operating lease right-of-use assets and Operating lease liabilities, non-current on our Consolidated Balance Sheet. The current portion of our operating lease liabilities is included in Other accrued liabilities on our Consolidated Balance Sheet. Finance leases are not considered significant to our Consolidated Balance Sheet or Consolidated Statement of Operations.

Right-of-use assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Lease right-of-use assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As most of our leases do not provide an implicit rate, we use our incremental borrowing rate based on the information available at commencement date in determining the present value of lease payments, and use the implicit rate when readily determinable. We determine our incremental borrowing rate through market sources including relevant industry rates. Our lease right-of-use assets also include any initial direct costs and lease prepayments made at or before the commencement date and are reduced for any lease incentives received at or before the commencement date. Certain of our leases include variable payments, which may vary based upon changes in facts or circumstances after the start of the lease. We exclude variable payments from lease right-of-use assets and lease liabilities, to the extent such payments are not considered fixed, and instead, expense variable payments as incurred. Variable lease expense and lease expense for short duration contracts are not a material component of lease expense. Some of our leases include the option to extend or terminate the lease. We include these options in the recognition of our right-of-use assets and lease liabilities when it is reasonably certain that we will exercise the option. Lease expense is generally recognized on a straight-line basis over the lease term.

We act as a lessor, primarily for commercial aerospace engines for a short term during maintenance events. The majority of these leases are classified as operating leases. These leases are not significant to our Consolidated Balance Sheet or Consolidated Statement of Operations.

Other Long-Lived Assets. We evaluate the potential impairment of other long-lived assets whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. If the carrying value of other long-lived assets held and used exceeds the sum of the undiscounted expected future cash flows, the carrying value is written down to fair value. In order for long-lived assets to be considered held for disposal, we must have committed to a plan to dispose of the assets. Once deemed held for disposal, the assets are stated at the lower of the carrying amount or fair value.

Income Taxes. Future income taxes represent the tax effects of transactions which are reported in different periods for tax and financial reporting purposes. These amounts consist of the tax effects of temporary differences between the tax and financial reporting balance sheets and tax carryforwards. Future income tax benefits and payables within the same tax-paying component of a particular jurisdiction are offset for presentation in the Consolidated Balance Sheet. In the ordinary course of business there is inherent uncertainty in quantifying our income tax positions. We assess our income tax positions and record tax benefits for all years subject to examination based upon management's evaluation of the facts, circumstances, and information available at the reporting date. For those tax positions where it is more-likely-than-not that a tax benefit will be sustained, we have recorded

the largest amount of tax benefit with a greater than 50% likelihood of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where it is not more-likely-than-not that a tax benefit will be sustained, no tax benefit has been recognized in the financial statements. Where applicable, associated interest expense has also been recognized. We recognize accrued interest related to unrecognized tax benefits in interest expense. Penalties, if incurred, would be recognized as a component of income tax expense. State income tax amounts are included in income tax expense.

We have elected to account for tax on Global Intangible Low-Taxed Income (GILTI) as a period cost, as incurred.

Revenue Recognition. A majority of our revenues are from long-term contracts associated with the design, development, manufacture, or modification of complex aerospace or defense equipment or related services. Collins and Pratt & Whitney primarily serve commercial and government customers in both the original equipment manufacturer (OEM) and aftermarket parts and services markets of the aerospace industry, while Raytheon primarily provides products and services to government customers in the defense industry.

We account for a contract when it has approval and commitment from both parties, the rights of the parties are identified, payment terms are identified, the contract has commercial substance, and collectability of consideration is probable. For certain contracts that meet the foregoing requirements, primarily contracts that are directly with a foreign government, we are required to obtain certain regulatory approvals. In these cases, we recognize revenue when obtaining regulatory approvals is considered probable based on all known facts and circumstances. A performance obligation is a promise in a contract with a customer to transfer a distinct good or service to the customer. Some of our contracts with customers contain a single performance obligation, while others contain multiple performance obligations, most commonly when a contract contains multiple distinct units (such as engines or certain aerospace components), or spans multiple phases of the product life-cycle such as production, maintenance, and support. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when or as the performance obligation is satisfied. When there are multiple performance obligations within a contract, we allocate the transaction price to each performance obligation based on its standalone selling price when available. If standalone selling price is not available, we estimate the standalone selling price of each performance obligation, which is generally based on an expected cost-plus-a-margin approach.

We consider the contractual consideration payable by the customer and assess variable consideration that may affect the total transaction price, including contractual discounts, contract incentive payments, estimates of award fees, flight hours, aircraft landings or other customer usage activities on long-term maintenance contracts, and other sources of variable consideration, when determining the transaction price of each contract. We account for consideration payable to a customer as a reduction of revenue. Consideration payable to a customer may include cash amounts we are obligated to pay or expect to pay a customer, as well as credits or other items that can be applied against amounts owed to us. In our Collins and Pratt & Whitney businesses, we may offer customer incentives to purchase our products, which may result in payments made to those customers.

When reasonably able to estimate, we include variable consideration in the transaction price at the most likely amount to which we expect to be entitled. We include estimated amounts in the transaction price to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is resolved. These estimates are based on historical experience, anticipated performance, and our best judgment at the time. We also consider whether our contracts contain a significant financing component, which they generally do not.

Timing of the satisfaction of performance obligations varies across our businesses due to our diverse product and service mix, customer base, and contractual terms.

Performance obligations are satisfied as of a point-in-time for certain aerospace components, engines, and spare parts. Revenue is recognized when control of the product transfers to the customer, generally upon product shipment. Since billing also typically occurs upon product shipment, we generally do not have Contract assets or Contract liabilities balances related to point-in-time sales.

Performance obligations are satisfied over time if the customer receives the benefits as we perform work, if the customer controls the asset as it is being produced (continuous transfer of control), or if the product being produced for the customer has no alternative use and we have a contractual right to payment for performance to date. We recognize revenue on an over-time basis for substantially all defense contracts and certain long-term aerospace OEM and aftermarket contracts.

Substantially all of our defense business revenue, which primarily relates to our Raytheon segment, and to a lesser extent Pratt & Whitney and Collins, is recognized over time because of the continuous transfer of control to our customers. For performance obligations satisfied over time, revenue is recognized on a percentage-of-completion basis generally using costs incurred to date relative to total estimated costs at completion to measure progress. Incurred costs represent work performed, which correspond with and best depict transfer of control to the customer. Contract costs can include labor, materials, subcontractors' costs, or other direct costs and indirect costs. Our contracts with the U.S. government are typically subject to

the Federal Acquisition Regulation (FAR) and are priced based on estimated or actual costs of producing goods or providing services. The FAR provides guidance on the types of costs that are allowable in establishing prices for goods and services provided under U.S. government contracts. The pricing for non-U.S. government contracts is based on the specific negotiations with each customer. Under the typical payment terms of our U.S. government fixed-price contracts, the customer pays us either performance-based payments (PBPs) or progress payments. PBPs are interim payments equal to a negotiated percentage of the contract price based on quantifiable measures of performance or on the achievement of specified events or milestones. Progress payments are interim payments up to 80-90% of costs incurred as the work progresses. Because the customer retains a portion of the contract price until completion of the contract, our U.S. government fixed-price contracts generally result in revenue recognized in excess of billings which we present as Contract assets on the Consolidated Balance Sheet. For our U.S. government cost-type contracts, the customer generally pays us for our costs incurred within a short period of time. For non-U.S. government contracts, we typically receive interim payments as work progresses, although for some contracts, we may be entitled to receive an advance payment. Such advances are not considered a significant financing component because they are used to meet working capital demands that can be higher in the early stages of a contract and to protect us from the other party failing to adequately complete some or all of its obligations under the contract. We recognize a liability for advance payments in excess of revenue recognized and present it as Contract liabilities on the Consolidated Balance Sheet.

For certain of our long-term aftermarket contracts, revenue is recognized over the contract period. We generally account for such contracts as a series of daily performance obligations to stand ready to provide spare parts, product maintenance, and aftermarket services. These arrangements include the sale of spare parts with integral services to our customers, and are generally classified as Services sales, with the corresponding costs classified in Cost of sales - services, within the Consolidated Statement of Operations. Revenue is primarily recognized on a percentage-of-completion basis using costs incurred to date relative to total estimated costs at completion to measure progress, as sufficient historical evidence indicates that the cost of performing services under the contract is incurred on an other-than-straight-line basis. For some of our long-term aftermarket contracts, we receive payment prior to delivery of products and services, resulting in a contract liability balance, while for others, we deliver products or services in advance of payment, resulting in a contract asset balance.

Contracts are often modified to account for changes in contract specifications or requirements. We consider contract modifications to exist when the modification either creates new or changes existing enforceable rights and obligations. Contract modifications for goods or services that are not distinct are accounted for as part of the existing contract either on a cumulative catch-up basis or prospective basis depending on the nature of the modification.

Loss provisions on contracts are recognized to the extent that estimated contract costs exceed the estimated consideration from the products or services contemplated under the contractual arrangement. For new commitments, we generally record loss provisions at contract signing except for certain contracts under which losses are recorded upon receipt of the purchase order that obligates us to perform. For existing commitments, anticipated losses on contractual arrangements are recognized in the period in which losses become evident. In estimating losses, products contemplated under contractual arrangements include firm quantities of product sold under contract and, in the commercial engine and wheels and brakes businesses, future highly-probable sales of replacement parts required by regulation that are expected to be sold subsequently for incorporation into the original equipment. In our commercial engine and wheels and brakes businesses, when the OEM product is sold for a loss, but the combined OEM and aftermarket arrangement for each individual sales campaign is profitable, we record OEM product losses at the time of product delivery.

We review our Estimates at Completion (EACs) at least annually or when a change in circumstances warrants a modification to a previous estimate. For significant contracts, we review our EACs more frequently. Due to the nature of the work required to be performed on many of the Company's performance obligations, the estimation of total revenue and cost at completion is complex, subject to many inputs, and requires significant judgment by management on a contract by contract basis. As part of this process, management reviews information including, but not limited to, any outstanding key contract matters, progress towards completion and the related program schedule, identified risks and opportunities, and the related changes in estimates of revenues and costs. The risks and opportunities relate to management's judgment about the ability and cost to achieve the schedule, consideration of customer-directed delays or reductions in scheduled deliveries, technical requirements, customer activity levels, such as flight hours or aircraft landings, and related variable consideration. Management must make assumptions and estimates regarding contract revenues and costs, including estimates of labor productivity and availability, the complexity and scope of the work to be performed, the availability and cost of materials including any impact from changing costs or inflation, the length of time to complete the performance obligation, execution by our subcontractors, the availability and timing of funding from our customer, overhead cost rates, and current and past maintenance cost and frequency driven by estimated aircraft and engine utilization and estimated useful lives of components, among others. In particular, fixed-price development programs involve significant management judgment, as development contracts by nature have elements that have not been done before and thus, are highly subject to future unexpected cost changes. Cost estimates may also include the estimated cost of satisfying our industrial cooperation agreements, sometimes in the form of either offset obligations or in-country industrial

participation (ICIP) agreements, required under certain contracts. These obligations may or may not be distinct depending on their nature. If cash is paid to a customer to satisfy our offset obligations, it is recorded as a reduction in the transaction price.

Changes in estimates of net sales, cost of sales, and the related impact to operating profit on contracts recognized over time are recognized on a cumulative catch-up basis, which recognizes the cumulative effect of the profit changes on current and prior periods based on a performance obligation's percentage-of-completion in the current period. A significant change in one or more of these estimates could affect the profitability of one or more of our performance obligations. Our EAC adjustments also include the establishment of, and changes to, loss provisions for our contracts accounted for on a percentage-of-completion basis.

Net EAC adjustments had the following impact on our operating results:

<i>(dollars in millions, except per share amounts)</i>	2025	2024	2023
Total net sales	\$ (208)	\$ (144)	\$ (452)
Operating profit	(386)	(473)	(648)
Net income attributable to common shareowners ⁽¹⁾	(305)	(374)	(512)
Diluted earnings per share attributable to common shareowners ⁽¹⁾	\$ (0.22)	\$ (0.28)	\$ (0.36)

(1) Amounts reflect a U.S. statutory tax rate of 21%, which approximates our tax rate on our EAC adjustments.

In addition to the amounts included in the table above, during the fourth quarter of 2024, as a result of obtaining critical licenses and further regulatory approvals, we restarted work under certain contracts with a Middle East customer and began recognizing revenue on these contracts. As a result, Raytheon recognized a net operating profit benefit of \$0.1 billion primarily related to reserve and contract loss provision adjustments. In addition to the amounts included in the table above, during the second quarter of 2024, Raytheon initiated the termination of a fixed price development contract with a foreign customer, herein referred to as "Raytheon Contract Termination," and recognized a \$0.6 billion charge related to the impact of the termination. The charge included the write-off of remaining contract assets and the estimated settlement with the customer. The contract termination was completed and customer settlement occurred during the fourth quarter of 2024, in line with previously accrued amounts.

In our Collins and Pratt & Whitney businesses, we incur contract fulfillment costs for engineering and development of aerospace products directly related to existing or anticipated contracts with customers. Such costs generate or enhance our ability to satisfy our performance obligations under these contracts. We capitalize these costs as contract fulfillment costs to the extent the costs are recoverable from the associated contract margin and customer funding, and subsequently amortize the costs to Cost of sales as the related performance obligations are satisfied. In instances where intellectual property does not transfer to the customer, we generally defer the customer funding of product engineering and development and recognize revenue when the related performance obligations are satisfied. Capitalized contract fulfillment costs were \$2.7 billion and \$2.5 billion as of December 31, 2025 and 2024, respectively, and are classified in Other assets, current in our Consolidated Balance Sheet and are included in Other current assets in our Consolidated Statement of Cash Flows. We regularly assess capitalized contract fulfillment costs for impairment. In 2024, we recognized impairment charges at Collins of approximately \$0.2 billion due to a contract cancellation and \$0.1 billion as a result of the impact of initiating alternative titanium sources. See "Russia Sanctions" above for further information regarding initiating alternative titanium sources.

In view of the risks and costs associated with developing new engines and the large up-front investments required that often require returns generated over the full estimated life of the engine, Pratt & Whitney has entered into certain collaboration arrangements in which sales, costs, and risks are shared. Sales generated from engine programs, spare parts sales, and aftermarket business under these collaboration arrangements are recorded consistent with our revenue recognition policies in our Consolidated Financial Statements. Amounts attributable to our collaborators for their share of sales are recorded as cost of sales in our Consolidated Financial Statements based upon the terms and nature of the arrangement. Costs associated with engine programs under collaborative arrangements are expensed as incurred. Under these arrangements, collaborators contribute their program share of engine parts, incur their own production costs, and make certain payments for shared or joint program costs. The reimbursement from collaborators of their share of program costs is recorded as a reduction of the related expense item at that time. As of December 31, 2025, the collaborators' interests in all commercial engine programs ranged from 13% to 49%, inclusive of a portion of Pratt & Whitney's interests held by other participants. Pratt & Whitney is the principal participant in all existing collaborative arrangements, with the exception of the Engine Alliance (EA), a joint venture with GE Aviation, which provides aftermarket support, spare parts, and service for the GP7000 engine for the Airbus A380 aircraft. There are no individually significant collaborative arrangements, and none of the collaborators individually have more than a 25% share in an individual program where Pratt & Whitney is the principal participant. The following table illustrates the

Consolidated Statement of Operations classification and amounts attributable to transactions arising from the collaborative arrangements between participants for each period presented.

<i>(dollars in millions)</i>	2025	2024	2023
Collaborator share of sales ⁽¹⁾ :			
Cost of sales - products	\$ 3,819	\$ 3,348	\$ (181)
Cost of sales - services	3,446	2,659	2,151
Collaborator share of program costs (reimbursement of expenses incurred):			
Cost of sales - products	(272)	(194)	(205)
Research and development	(182)	(213)	(208)
Selling, general, and administrative	(121)	(110)	(114)

(1) 2023 total cost of sales includes a net reduction of \$2.6 billion related to our collaborators' share of the Powder Metal Matter.

Remaining Performance Obligations (RPO). RPO represents the aggregate amount of total contract transaction price that is unsatisfied or partially unsatisfied. Total RPO was \$268 billion as of December 31, 2025. Of the total RPO as of December 31, 2025, we expect approximately 25% will be recognized as revenue over the next 12 months. Approximately 50% of our RPO relates to long-term commercial aerospace maintenance contracts at Pratt & Whitney, which are generally expected to be realized over a span of up to 20 years.

Research and Development. Company-sponsored research and development costs, including those costs related to the Company's portion in connection with cost-sharing arrangements, are charged to expense as incurred and recovery on these cost-sharing arrangements is recorded as a reduction to research and development expense as earned. Customer-sponsored research and development projects performed under contracts with customers are accounted for as contract costs and reported as cost of sales on the related revenue-generating contracts.

Foreign Exchange. We conduct business in many different currencies and, accordingly, are subject to the inherent risks associated with foreign exchange rate movements. The financial position and results of operations of many of our foreign subsidiaries are often measured using the local currency as the functional currency. Foreign currency denominated assets and liabilities are translated into U.S. Dollars at the exchange rates existing at the respective balance sheet dates, and income and expense items are translated at the average exchange rates during the respective periods. The aggregate effects of translating the balance sheets of these subsidiaries are deferred as a separate component of Accumulated other comprehensive loss in Shareowners' equity on our Consolidated Balance Sheet. Foreign exchange transaction gains and losses are recorded in Other income (expense), net in our Consolidated Statement of Operations.

Derivatives and Hedging Activity. We use derivative instruments, including swaps, forward contracts, and options, to help manage certain foreign currency, and from time to time to help manage interest rate and commodity price exposures. Derivative instruments are viewed as risk management tools by us and are not used for trading or speculative purposes. By their nature, all financial instruments involve market and credit risks. We enter into derivative and other financial instruments with major investment grade financial institutions and have policies to monitor the credit risk of those counterparties. We limit counterparty exposure and concentration of risk by diversifying counterparties. While there can be no assurance, we do not anticipate any material non-performance by any of these counterparties. We enter into transactions that are subject to enforceable master netting arrangements or similar agreements with various counterparties. While we have rights to offset multiple contracts with a single counterparty in an event of default, those obligations remain separate and distinct otherwise, and, as a result, the fair value of the derivative instruments in a loss position is not offset against the fair value of derivative instruments in a gain position in our financial statements.

Derivatives used for hedging purposes may be designated and effective as a hedge of the identified risk exposure at the inception of the contract. All derivative instruments are recorded on the balance sheet at fair value. Derivatives used to hedge foreign currency denominated balance sheet items are reported directly in earnings along with offsetting transaction gains and losses on the items being hedged. Derivatives are also used to hedge foreign currency translation risk arising from the net investment in certain foreign operations. Derivatives used to hedge forecasted cash flows associated with foreign currency commitments or forecasted commodity purchases may be accounted for as cash flow hedges, as deemed appropriate. Changes in the fair value of derivatives that are designated and qualify as a hedge of the net investment in foreign operations, to the extent they are included in the assessment of effectiveness, are recorded in Foreign currency translation adjustments within Other comprehensive income (loss) (OCI) and are deferred until disposal of the underlying investment. Gains and losses representing components excluded from the assessment of effectiveness for net investment hedges are recognized on a straight-line basis in Other income (expense), net over the term of the hedges. To the extent that a previously-designated hedging

transaction for cash flow hedges or net investment hedges are no longer an effective hedge, any ineffectiveness measured in the hedging relationship is recorded currently in earnings in the period it occurs.

To the extent the hedge accounting criteria are not met, the foreign currency forward contracts are utilized as economic hedges and changes in the fair value of these contracts are recorded currently in earnings in the period in which they occur. Additional information pertaining to foreign currency forward contracts and net investment hedging is included in “Note 13: Financial Instruments.”

Environmental. Environmental investigatory, remediation, operating, and maintenance costs are accrued when it is probable that a liability has been incurred and the amount can be reasonably estimated. The most likely cost to be incurred is accrued based on an evaluation of currently-available facts with respect to each individual site, including existing technology, current laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, the minimum is accrued. For sites with multiple responsible parties, we consider our likely proportionate share of the anticipated remediation costs and the ability of the other parties to fulfill their obligations in establishing a provision for those costs. Liabilities with fixed or reliably determinable future cash payments are discounted. A portion of these costs is eligible for future recovery through the pricing of our products and services to the U.S. government. We regularly assess the probability of recovery of these costs, which requires us to make assumptions about the extent of cost recovery under our contracts and the amount of future contract activity with the U.S. government. We consider such recovery probable based on government contracting regulations and our history of receiving reimbursement for such costs, and accordingly have recorded the future recovery of these costs from the U.S. government within Other assets, current in the Consolidated Balance Sheet. Accrued environmental liabilities are not reduced by potential insurance reimbursements or potential recoveries from pursuing other parties. We also lease certain government-owned properties and generally are not liable for remediation of preexisting environmental contamination at these sites. As a result, we generally do not provide for these costs in our Consolidated Financial Statements. See “Note 17: Commitments and Contingencies” for additional details on the environmental remediation activities.

Pension and Postretirement Obligations. U.S. GAAP requires balance sheet recognition of the overfunded or underfunded status of pension and postretirement benefit (PRB) plans. Funded status is measured at least annually in the fourth quarter and represents the difference between the plans’ projected benefit obligation (PBO) and the fair market value of the plans’ assets.

Changes to our pension and PRB plans’ funded status can result from company actions, such as contributions, changes in plan provisions, or by gains and losses. Gains and losses are primarily a result of changes in assumptions and actual experience that differs from these assumptions. Major assumptions include the discount rate and expected return on plan assets (EROA). Other assumptions include actuarial and demographic assumptions including mortality rates, retirement age, and rate of increase in employee compensation levels. These gains or losses are recorded in Other comprehensive loss, net of tax, until they are amortized as a component of net periodic benefit (income) expense.

A calculated “market-related value” of our plan assets is generally used to develop the amount of deferred asset gains or losses to be amortized. The market-related value of assets is generally equal to the fair value of assets adjusted to reflect the recognition, and subsequent amortization, of the difference between actual and expected asset returns over a five-year period. The market-related value of assets is used to calculate the expected return on assets included in the net periodic benefit (income) expense.

The Company has elected to use the “corridor” approach in the amortization of gains and losses, which limits the expense recognition to the net outstanding gains and losses in excess of the greater of 10% of the PBO or 10% of the market-related value of assets. Gains and losses exceeding the corridor are amortized in net periodic benefit (income) expense over either the projected average remaining employee service period or the projected average remaining lifetime of inactive participants depending on the plan.

Net periodic benefit (income) expense is classified between operating and non-operating, whereby only the service cost component is included in operating profit and the remaining components are included in Non-service pension income.

Product Performance Obligations. We extend performance and operating cost guarantees beyond our normal service and warranty policies for extended periods on some of our products, particularly commercial aircraft engines. Liability under such guarantees is based upon future product performance and durability. We accrue for such costs that are probable and can be reasonably estimated. In addition, we incur discretionary costs to service our products in connection with product performance issues. The costs associated with these product performance and operating cost guarantees require estimates over the full terms of the agreements, and require management to consider factors such as the extent of future maintenance requirements, interval between flight and repair time, and the future cost of material and labor to perform the services. These cost estimates are largely based upon historical experience. See “Note 16: Guarantees” for further discussion.

Government Grants. We may receive grants from various federal, state, local, and foreign governments in exchange for compliance with certain conditions relating to our activities in a specific jurisdiction. Grants are often structured to encourage investment, job creation, job retention, employee training, and other related activities. We recognize government grants when there is reasonable assurance that the Company will comply with the conditions of the grant and the grant is received or is probable of receipt and the amount is determinable. Government grants are recorded as a reduction to the related expense or asset to which the grant relates or recorded in Other income (expense), net in our Consolidated Statement of Operations. Government grant transactions are not material to our financial position, results of operations, or liquidity.

Accounting Pronouncements. In December 2025, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) 2025-10; Accounting for Government Grants Received by Business Entities, which provides guidance on how companies should recognize, measure, and present government grants received. The new standard is effective for annual and interim reporting periods beginning after December 15, 2028. The standard allows for a modified prospective, modified retrospective, or retrospective transition. Early adoption is permitted. We are currently evaluating the impact of adopting this new pronouncement.

In September 2025, the FASB issued ASU 2025-06, Targeted Improvements to the Accounting for Internal-Use Software, which better aligns the accounting guidance to how software is developed by eliminating project stages from capitalization criteria. The new standard is effective for annual reporting periods beginning after December 15, 2027 and interim periods within those annual reporting periods. The standard allows for prospective, modified, or retrospective transition. Early adoption is permitted. We are currently evaluating the impact of adopting this new pronouncement.

In November 2024, the FASB issued ASU 2024-03, Disaggregation of Income Statement Expenses, which requires a tabular disclosure of the amounts of specified natural expense categories included in each relevant expense caption. Additionally, the amendments require the disclosure of the total amount of selling expenses and, in annual reporting periods, an entity's definition of selling expenses. The new standard is effective for annual reporting periods beginning after December 15, 2026, and interim periods within fiscal years beginning after December 15, 2027, on a prospective basis. Early adoption is permitted. We are currently evaluating the impact on our disclosures of adopting this new pronouncement.

In December 2023, the FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures, to enhance income tax reporting disclosures and require disclosure of specific categories in the tabular rate reconciliation. We adopted this standard for the annual period ending December 31, 2025 on a prospective basis. We updated our income tax disclosures to comply with the requirements. See "Note 12: Income Taxes." The adoption of the standard did not have an impact on our financial position, results of operations, or liquidity.

Other new pronouncements issued but not effective until after December 31, 2025 are not expected to have a material impact on our results of operations, financial condition, or liquidity.

NOTE 2: ACQUISITIONS AND DISPOSITIONS

Dispositions. On July 21, 2025, we completed the sale of the actuation and flight control business within our Collins segment for gross proceeds of \$1.8 billion. Cash received of \$1.6 billion, net of cash transferred, included amounts attributable to continuing service agreements supporting the buyer post-closing. The sale resulted in a pre-tax gain of \$0.2 billion, which was recorded in Other income (expense), net within the Consolidated Statement of Operations.

On October 6, 2025, we completed the sale of the Simmonds Precision Products business within our Collins segment for gross proceeds of approximately \$0.8 billion, resulting in an aggregate pre-tax gain of \$0.1 billion, recognized in Other income (expense), net within the Consolidated Statement of Operations.

On March 29, 2024, we completed the sale of our Cybersecurity, Intelligence and Services (CIS) business within our Raytheon segment for proceeds of approximately \$1.3 billion in cash, resulting in an aggregate pre-tax gain, net of transaction and other related costs, of \$0.4 billion, primarily recognized in Other income (expense), net within the Consolidated Statement of Operations.

On October 31, 2024, we completed the sale of our Goodrich Hoist & Winch business within our Collins segment for proceeds of approximately \$0.5 billion in cash, resulting in a pre-tax gain, net of transaction and other related costs, of \$0.1 billion, primarily recognized in Other income (expense), net within the Consolidated Statement of Operations.

NOTE 3: GOODWILL AND INTANGIBLE ASSETS

Goodwill. Changes in our goodwill balances for the year ended December 31, 2025 were as follows:

<i>(dollars in millions)</i>	Balance as of December 31, 2024	Acquisitions and Divestitures	Foreign Currency Translation and Other	Balance as of December 31, 2025
Collins Aerospace	\$ 32,223	\$ (255)	\$ 808	\$ 32,776
Pratt & Whitney	1,563	—	—	1,563
Raytheon	18,986	—	1	18,987
Total Segments	52,772	(255)	809	53,326
Eliminations and other	17	—	—	17
Total	\$ 52,789	\$ (255)	\$ 809	\$ 53,343

The Company reviews goodwill for impairment annually or more frequently if events or changes in circumstances indicate the asset might be impaired.

We completed our annual goodwill impairment testing as of October 1, 2025 and determined that no adjustments to the carrying value of goodwill were necessary. We assessed all of our reporting units using qualitative factors to determine whether it was more likely than not that any individual reporting unit's fair value is less than its carrying value (step 0) and determined that no further testing was required.

Intangible Assets. Identifiable intangible assets are comprised of the following:

<i>(dollars in millions)</i>	2025		2024	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Amortized:				
Collaboration assets	\$ 6,234	\$ (2,374)	\$ 6,159	\$ (1,996)
Exclusivity assets	3,980	(258)	3,692	(361)
Developed technology and other	1,192	(758)	1,197	(698)
Customer relationships	29,338	(13,989)	29,388	(12,401)
	40,744	(17,379)	40,436	(15,456)
Indefinite-lived:				
Trademarks and other	8,480	—	8,463	—
Total	\$ 49,224	\$ (17,379)	\$ 48,899	\$ (15,456)

We also completed our annual indefinite-lived intangible assets impairment testing using a qualitative approach as of October 1, 2025 and determined that no adjustments to the carrying value of these assets were necessary.

Amortization of intangible assets was \$2.1 billion, \$2.2 billion, and \$2.1 billion in 2025, 2024, and 2023, respectively. The following is the expected amortization of intangible assets for 2026 through 2030:

<i>(dollars in millions)</i>	2026	2027	2028	2029	2030
Amortization expense	\$1,992	\$1,896	\$1,795	\$1,637	\$1,628

NOTE 4: EARNINGS PER SHARE

<i>(dollars in millions, except per share amounts; shares in millions)</i>	2025	2024	2023
Net income attributable to common shareowners	\$ 6,732	\$ 4,774	\$ 3,195
Basic weighted average number of shares outstanding	1,341.4	1,332.1	1,426.0
Stock awards and equity units (share equivalent)	15.0	11.5	9.4
Diluted weighted average number of shares outstanding	1,356.4	1,343.6	1,435.4
Earnings Per Share attributable to common shareowners:			
Basic	\$ 5.02	\$ 3.58	\$ 2.24
Diluted	4.96	3.55	2.23

The computation of diluted earnings per share (EPS) excludes the effect of the potential exercise of stock awards, including stock appreciation rights and stock options, when the average market price of the common stock is lower than the exercise price of the related stock awards during the period because the effect would be anti-dilutive. In addition, the computation of diluted EPS excludes the effect of the potential release or exercise of stock awards when the awards' assumed proceeds exceed the average market price of the common shares during the period. For 2025, 2024, and 2023, there were 1.4 million, 4.8 million, and 9.6 million stock awards excluded from the computation, respectively.

NOTE 5: ACCOUNTS RECEIVABLE, NET

Accounts receivable, net consisted of the following:

<i>(dollars in millions)</i>	2025	2024
U.S. government contracts (including foreign military sales)	\$ 1,775	\$ 1,132
Other customers	13,266	10,133
Allowance for expected credit losses	(340)	(289)
Total accounts receivable, net	\$ 14,701	\$ 10,976

The changes in the allowance for expected credit losses related to accounts receivable were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Balance as of January 1	\$ 289	\$ 316	\$ 452
Current period provision, net of recoveries	64	(14)	(92)
Write-offs	(12)	(7)	(42)
Other, net	(1)	(6)	(2)
Balance as of December 31	\$ 340	\$ 289	\$ 316

NOTE 6: CONTRACT ASSETS AND LIABILITIES

Contract assets reflect revenue recognized and performance obligations satisfied in advance of customer billings. Contract liabilities relate to payments received in advance of the satisfaction of performance under the contract. We receive payments from customers based on the terms established in our contracts. Total contract assets and contract liabilities as of December 31, 2025 and 2024 were as follows:

<i>(dollars in millions)</i>	2025	2024
Contract assets, net	\$ 17,092	\$ 14,570
Contract liabilities	(21,615)	(18,616)
Net contract liabilities	\$ (4,523)	\$ (4,046)

Contract assets, net increased \$2.5 billion during 2025 primarily due to sales in excess of billings on certain contracts at Pratt & Whitney, partially offset by an increase in the allowance for expected credit losses due to a customer bankruptcy recorded at Pratt & Whitney in the second quarter of 2025. Contract liabilities increased \$3.0 billion during 2025 primarily due to billings in excess of sales on certain contracts at Pratt & Whitney and Raytheon.

In 2025, 2024, and 2023, we recognized revenue of \$8.1 billion, \$7.2 billion, and \$5.3 billion related to our Contract liabilities at January 1, 2025, January 1, 2024, and January 1, 2023, respectively.

Contract assets, net consisted of the following at December 31:

<i>(dollars in millions)</i>	2025	2024
Revenue recognized in advance of customer billings	\$ 35,023	\$ 30,226
Progress payments	(17,931)	(15,656)
Total contract assets, net	\$ 17,092	\$ 14,570

For U.S. government contracts that provide progress payments, the U.S. government has title to the asset related to unbilled amounts.

The changes in the allowance for expected credit losses related to contract assets were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Balance as of January 1	\$ 491	\$ 197	\$ 319
Current period provision, changes in estimates, and recoveries, net	185	294	210
Write-offs and other	—	—	(332)
Balance as of December 31	\$ 676	\$ 491	\$ 197

NOTE 7: INVENTORY, NET

<i>(dollars in millions)</i>	2025	2024
Raw materials	\$ 4,673	\$ 4,164
Work-in-process	4,554	4,493
Finished goods	4,137	4,111
Total inventory, net	\$ 13,364	\$ 12,768

Raw materials, work-in-process, and finished goods are net of total valuation reserves of \$2.3 billion and \$2.1 billion as of December 31, 2025 and 2024, respectively.

NOTE 8: FIXED ASSETS, NET

Fixed assets, net, consisted of the following:

<i>(dollars in millions)</i>	Estimated Useful Lives	2025	2024
Land		\$ 710	\$ 695
Buildings and improvements	10-45 years	9,188	8,615
Machinery, tools, and equipment	3-20 years	21,572	19,738
Assets under construction		3,865	3,735
Fixed assets, gross		35,335	32,783
Accumulated depreciation		(18,467)	(16,694)
Fixed assets, net		\$ 16,868	\$ 16,089

Leasehold improvements are amortized over the lesser of the remaining lease term or the estimated useful life of the improvement.

Depreciation expense related to Fixed assets, net is recorded predominantly utilizing the straight-line method and was \$1.9 billion in 2025 and \$1.8 billion in 2024 and 2023.

NOTE 9: BORROWINGS AND LINES OF CREDIT

As of December 31, 2025, we had a revolving credit agreement with various banks permitting aggregate borrowings of up to \$5.0 billion, which expires in August 2028. As of December 31, 2025, there were no borrowings outstanding under this agreement. In addition, at December 31, 2025, approximately \$0.6 billion was available under short-term lines of credit primarily with global banks at our international subsidiaries.

From time to time, we use commercial paper borrowings for general corporate purposes, including the funding of potential acquisitions, pension contributions, debt refinancing, dividend payments, and repurchases of our common stock. The commercial paper notes have original maturities of not more than 364 days from the date of issuance. As of December 31, 2025, our maximum commercial paper borrowing limit was \$5.0 billion as the commercial paper is backed by our \$5.0 billion revolving credit agreement. At December 31, 2025 and 2024, we had no commercial paper borrowings outstanding. During 2025 and 2024, we had no new borrowings or repayments of commercial paper with maturities greater than 90 days. During 2023, we had no new borrowings, and \$0.2 billion of repayments of commercial paper with maturities greater than 90 days.

On October 24, 2023, we entered into a senior unsecured bridge credit agreement (Bridge Loan) with various banks permitting aggregate borrowings of up to \$10.0 billion, to fund an accelerated share repurchase (ASR) and pay related fees and expenses. The \$10.0 billion Bridge Loan was paid in full and terminated in the fourth quarter of 2023 upon receipt of proceeds from the \$4.0 billion term loan facilities, the \$6.0 billion of long-term debt issuances, and cash on hand.

During 2025 and 2024, we made the following repayments of long-term debt:

Date	Description of Notes	Aggregate Principal Balance (in millions)
December 17, 2025	3 Month SOFR plus 1.225% Term Loan due 2026	\$ 1,100
August 18, 2025	3.950% notes due 2025	1,500
May 7, 2025	3 Month SOFR plus 1.225% term loan due 2025	750
December 24, 2024	3 Month SOFR plus 1.225% term loan due 2025	500
December 15, 2024	3.150% notes due 2024	300
May 7, 2024	3 Month SOFR plus 1.225% term loan due 2025	250
April 17, 2024	3 Month SOFR plus 1.225% term loan due 2025	250
April 4, 2024	3 Month SOFR plus 1.225% term loan due 2025	250
March 15, 2024	3.200% notes due 2024	950

Long-term debt consisted of the following as of December 31:

(dollars in millions)	2025	2024

Other (fair market value adjustments, (discounts)/premiums, and debt issuance costs)	(77)	(68)
Total long-term debt	37,700	41,078
Less: current portion	3,412	2,352
Long-term debt, net of current portion	\$ 34,288	\$ 38,726

(1) We may redeem these notes, in whole or in part, at our option pursuant to their terms prior to the applicable maturity date.

The weighted-average interest rate related to total debt was 4.5% at December 31, 2025 and 2024.

The average maturity of our long-term debt at December 31, 2025 is approximately 12 years. The schedule of principal payments required on long-term debt for the next five years and thereafter is:

<i>(in millions)</i>	
2026	\$ 3,412
2027	2,928
2028	3,490
2029	922
2030	1,593
Thereafter	25,432
Total	\$ 37,777

NOTE 10: EMPLOYEE BENEFIT PLANS

We sponsor various domestic and foreign employee benefit plans, which are discussed below.

Employee Savings Plans. We sponsor various employee savings plans. Our contributions to employer sponsored defined contribution plans were \$1.4 billion, \$1.4 billion, and \$1.3 billion for 2025, 2024, and 2023, respectively.

Our domestic employee savings plan uses an Employee Stock Ownership Plan (ESOP) for certain employer matching contributions. Prior to the third quarter of 2024, the ESOP held stock that was purchased using external borrowings. As ESOP debt service payments were made, common stock was released from an unallocated ESOP account. ESOP debt was either prepaid or re-amortized to either increase or decrease the number of shares released so that the value of released shares equaled the value of plan benefit. It was also the Company's option to contribute additional common stock or cash to the ESOP. Shares of common stock were allocated to participants' ESOP accounts at fair value on the date earned. Cash dividends on unallocated common stock held by the ESOP were used for debt service payments. Cash dividends on allocated shares are either reinvested or paid directly in cash to the participant, according to the participant's election. Participants chose to have their ESOP dividends reinvested or distributed to their accounts in cash. Common stock allocated to ESOP participants was included in the average number of common shares outstanding for both basic and diluted EPS. At December 31, 2024, all 23 million common shares related to this leveraged ESOP have been allocated to employees.

During the third quarter of 2024, remaining unallocated ESOP shares were fully allocated to participant accounts through matching contributions, and we began funding the ESOP match in shares on a non-leveraged basis. Under the new non-leveraged basis, treasury shares are utilized to fund the matching contributions, and participants receive units from the ESOP in the amount of their matching contribution at fair value on the date earned. Once shares are contributed to the participants' ESOP accounts, they have a right to dividend payments and are included in the average number of common shares outstanding for both basic and diluted EPS. In the fourth quarter of 2024, we expanded the funding of our matching contributions in shares under the ESOP to additional participants who previously received matching contributions in cash.

In 2025 and 2024, we used the ESOP to make matching contributions of \$0.6 billion and \$0.4 billion, respectively, which was equivalent to 4 million and 3 million shares, respectively.

Pension and Postretirement Plans. We sponsor both funded and unfunded domestic and foreign defined benefit pension plans that cover a large number of our employees. Our largest plans are generally closed to new participants. We also sponsor both funded and unfunded PRB plans that provide health care and life insurance benefits to eligible retirees. Our plans use a December 31 measurement date consistent with our fiscal year.

At December 31, 2023, we merged our remaining Raytheon Company domestic defined benefit pension plans into the RTX Consolidated Pension Plan (the Plan). This plan merger did not impact participants' benefit formulas.

In December 2025, we completed a buy-out conversion of a group annuity contract previously purchased by the Plan from The Prudential Insurance Company of America (Prudential) transferring approximately \$2.3 billion of gross pension obligations from the Plan to Prudential. In connection with the contract purchase, Fiduciary Counselors Inc. acted as independent fiduciary for the Plan. Upon completion of the buy-out conversion, Prudential assumed the obligation and administrative responsibility for retirement benefits owed to approximately 60,000 Plan retirees and beneficiaries, which represents approximately one-third of retirees and beneficiaries in the Plan. The transaction resulted in no change to the amounts of benefits payable and did not diminish the Plan's funded status. In connection with the transaction, we recognized a one-time, non-cash pension settlement charge of \$0.3 billion in the fourth quarter of 2025, recorded in Non-service pension income, within the Consolidated Statement of Operations.

(dollars in millions)	Pension	
	2025	2024
Change in Benefit Obligation:		
Beginning balance	\$ 46,322	\$ 49,592
Service cost	169	189
Interest cost	2,343	2,385
Actuarial loss (gain)	1,253	(2,013)
Total benefits paid ⁽¹⁾	(3,530)	(3,633)
Net settlement, curtailment, and special termination benefits	(2,479)	9
Plan amendments	100	36
Business combinations and divestitures	1	(23)
Other ⁽²⁾	275	(220)
Ending balance	\$ 44,454	\$ 46,322
Change in Plan Assets:		
Beginning balance	\$ 46,414	\$ 48,945
Actual return on plan assets	4,237	1,092
Employer contributions ⁽¹⁾	210	235
Total benefits paid ⁽¹⁾	(3,530)	(3,633)
Settlements	(2,479)	(3)
Other ⁽²⁾	262	(222)
Ending balance	\$ 45,114	\$ 46,414

(1) Includes benefit payments paid directly by the company.

(2) The amount included in Other primarily reflects the impact of foreign exchange translation, primarily for plans in the United Kingdom and Canada, and participant contributions.

(dollars in millions)	Pension		PRB	
	2025	2024	2025	2024
Funded Status:				
Fair value of plan assets	\$ 45,114	\$ 46,414	\$ 330	\$ 314
Benefit obligations	(44,454)	(46,322)	(890)	(898)
Funded status of plan	\$ 660	\$ 92	\$ (560)	\$ (584)
Amounts Recognized in the Consolidated Balance Sheet Consist of:				
Non-current assets	\$ 2,339	\$ 1,819	\$ —	\$ —
Current liabilities	(169)	(195)	(59)	(61)
Non-current liabilities	(1,510)	(1,532)	(501)	(523)
Net amount recognized	\$ 660	\$ 92	\$ (560)	\$ (584)
Amounts Recognized in Accumulated Other Comprehensive Loss Consist of:				
Net actuarial loss (gain)	\$ 5,431	\$ 4,926	\$ (232)	\$ (296)
Prior service credit	(822)	(1,044)	—	(1)
Net amount recognized	\$ 4,609	\$ 3,882	\$ (232)	\$ (297)

The majority of our pension obligations relate to our U.S. Internal Revenue Service (IRS) qualified pension plans, which comprise 86% of our pension PBO as of both December 31, 2025 and 2024. Our nonqualified domestic pension plans, which provide supplementary benefits to certain employees in excess of the IRS qualified plan limits, comprise 3% of our pension PBO as of both December 31, 2025 and 2024. Our international plans comprise 11% of our pension PBO as of both December 31, 2025 and 2024.

In addition to the pension and PRB non-current liabilities shown above, Future pension and postretirement benefit obligations on the Consolidated Balance Sheet includes other immaterial pension and PRB-related liabilities.

Information for pension plans with accumulated benefit obligations in excess of plan assets:

<i>(dollars in millions)</i>	2025	2024
Projected benefit obligation	\$ 3,311	\$ 3,260
Accumulated benefit obligation	3,284	3,239
Fair value of plan assets	1,634	1,537

The accumulated benefit obligation for all defined benefit pension plans was \$44.2 billion and \$46.1 billion at December 31, 2025 and 2024, respectively.

Information for pension plans with projected benefit obligations in excess of plan assets:

<i>(dollars in millions)</i>	2025	2024
Projected benefit obligation	\$ 3,406	\$ 3,298
Accumulated benefit obligation	3,368	3,272
Fair value of plan assets	1,726	1,571

The components of the net periodic pension income are as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Operating expense			
Service cost	\$ 169	\$ 189	\$ 222
Non-operating expense			
Interest cost	2,343	2,385	2,507
Expected return on plan assets	(3,682)	(3,747)	(3,753)
Amortization of prior service credit	(140)	(170)	(158)
Recognized actuarial net loss (gain)	21	20	(378)
Net settlement, curtailment, and special termination benefits loss	275	13	6
Non-service pension income	(1,183)	(1,499)	(1,776)
Total net periodic pension income	\$ (1,014)	\$ (1,310)	\$ (1,554)

Other changes in pension plan assets and benefit obligations recognized in other comprehensive loss in 2025 and 2024 are as follows:

<i>(dollars in millions)</i>	2025	2024
Net actuarial loss arising during the period	\$ 698	\$ 642
Amortization of actuarial loss	(21)	(20)
Current year prior service cost	100	36
Amortization of prior service credit	140	170
Net settlement and curtailment	(275)	(12)
Other ⁽¹⁾	85	1
Total recognized in other comprehensive loss	727	817
Net recognized in net periodic pension income and other comprehensive loss	\$ (287)	\$ (493)

(1) The amount included in Other primarily reflects the impact of foreign exchange translation, primarily for plans in the United Kingdom and Canada.

The Actuarial loss arising in 2025 was primarily due to a decrease in discount rates during 2025, partially offset by actual asset returns greater than our expected return on assets.

The Actuarial loss arising in 2024 was primarily due to actual asset returns less than our expected return on assets, partially offset by an increase in discount rates during 2024.

The table below reflects the total benefit payments expected to be paid from the pension plans or from corporate assets.

<i>(dollars in millions)</i>	Pension
2026	\$ 3,906
2027	3,470
2028	3,428
2029	3,427
2030	3,410
2031-2035	16,229

Assumptions used in determining the pension benefit obligation and net periodic pension income are presented in the following table as weighted-averages:

	Pension Benefit Obligation		Net Periodic Pension Income		
	2025	2024	2025	2024	2023
Discount rate					
PBO	5.3 %	5.6 %	5.6 %	5.1 %	5.5 %
Interest cost ⁽¹⁾	N/A	N/A	5.3 %	5.0 %	5.3 %
Service cost ⁽¹⁾	N/A	N/A	5.6 %	5.0 %	5.4 %
Salary scale	4.4 %	4.4 %	4.4 %	4.4 %	4.4 %
Expected return on plan assets	N/A	N/A	7.1 %	7.1 %	7.1 %
Interest crediting rate	5.0 %	5.0 %	5.0 %	5.0 %	4.4 %

(1) The discount rates used to measure the service cost and interest cost applies to our significant plans. The PBO discount rate is used for the service cost and interest cost measurements for non-significant plans.

The weighted-average discount rates used to measure pension liabilities are generally based on yield curves developed using high-quality corporate bonds as well as plan specific expected cash flows. For our significant plans, we utilize a full yield curve approach in the estimation of the service cost and interest cost components of net periodic pension income by applying the specific spot rates along the yield curve used in determination of the benefit obligation to the relevant discounted projected cash flows.

In determining the EROA assumption, we consider the target asset allocation of plan assets, as well as economic and other indicators of future performance. We consult with and consider the opinions of financial and other professionals in determining the appropriate capital market assumptions. Return projections are validated using a simulation model that incorporates yield curves, credit spreads, and risk premiums to project long-term prospective returns.

Other assumptions include actuarial and demographic assumptions including mortality rates and retirement age.

Plan Assets. The plans' investment management objectives include providing the liquidity and asset levels needed to meet current and future benefit payments, while maintaining a prudent degree of portfolio diversification considering interest rate risk and market volatility. Globally, on average, investment strategies generally target a mix of 26% to 46% of growth seeking assets and 54% to 74% of income generating and hedging assets using a wide set of diversified asset types, fund strategies, and investment managers. The growth seeking allocation consists of global public equities in developed and emerging countries, private equity, and real estate. Investments in private equity are primarily via limited partnership interests in buy-out strategies. The real estate strategy is principally concentrated in directly held U.S. core investments with some smaller investments in international, value-added, and opportunistic strategies. Within the income generating assets, the fixed income portfolio consists of mainly government and broadly diversified high quality corporate bonds.

The plans have continued pension risk management techniques designed to reduce their interest rate risk. Specifically, the plans have incorporated liability hedging programs that include the adoption of a risk reduction objective as part of the long-term investment strategy. Under this objective the interest rate hedge is intended to increase as funded status improves. The hedging programs incorporate a range of assets and investment tools, each with varying interest rate sensitivities. The investment portfolios currently hedge approximately 80% of the pension plan liabilities' interest-rate sensitivity, with the exact level varying based on the plan's funded status. The hedging assets portfolio also includes an enhanced alpha strategy that invests in equity, fixed income, derivatives, and foreign currency.

The fair values of pension plan assets at December 31, 2025 and 2024 by asset category are as follows:

<i>(dollars in millions)</i>	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Not Subject to Leveling ⁽⁷⁾	Total

Total at December 31, 2024					\$ 46,414

(1) Represents commingled funds that invest primarily in common stocks.

(2) Represents limited partnership investments with general partners that primarily invest in equity and debt.

(3) Represents investments in real estate including commingled funds and directly held properties.

(4) Primarily represents insurance contracts.

(5) Represents short-term commercial paper, bonds, and other cash or cash-like instruments.

(6) Represents receivables, payables, and certain individually immaterial international plan assets that are not leveled.

(7) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented for the total pension benefits plan assets.

Derivatives in the plan are primarily used to manage risk and gain asset class exposure while still maintaining liquidity. Derivative instruments mainly consist of equity futures, interest rate futures, interest rate swaps, and currency forward

contracts. The fair market value of the plans' derivatives through direct or separate account investments was approximately (\$8) million and (\$120) million as of December 31, 2025 and 2024, respectively.

We review our assets at least quarterly to ensure we are within the targeted asset allocation ranges and, if necessary, asset balances are adjusted back within target allocations. We employ a broadly diversified investment manager structure that includes diversification by active and passive management, style, capitalization, country, sector, industry, and number of investment managers. With the exception of certain cash investment vehicles, no individual investment represented more than 5% of the plan assets as of December 31, 2025.

The fair value measurement of plan assets using significant unobservable inputs (Level 3) changed due to the following:

(dollars in millions)

Balance, December 31, 2023	\$	1,467
Realized losses		(136)
Unrealized gains relating to instruments still held in the reporting period		27
Purchases, sales, and settlements, net		123
Balance, December 31, 2024		1,481
Realized gains		4
Unrealized (losses) relating to instruments still held in the reporting period		(66)
Purchases, sales, and settlements, net		(170)
Balance, December 31, 2025	\$	1,249

Quoted market prices are used to value investments when available. Investments in securities traded on exchanges, including listed futures and options, are valued at the last reported sale prices on the last business day of the year or, if not available, the last reported bid prices. Fixed income securities are primarily measured using a market approach pricing methodology, where observable prices are obtained by market transactions involving identical or comparable securities of issuers with similar credit ratings. Mortgages have been valued on the basis of their future principal and interest payments discounted at prevailing interest rates for similar investments. Investment contracts are valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations. Real estate investments are valued on a quarterly basis using discounted cash flow models which consider long-term lease estimates, future rental receipts, and estimated residual values. Valuation estimates are supplemented by third-party appraisals on an annual basis.

The fair market value of assets related to our PRB benefits was \$0.3 billion as of December 31, 2025 and 2024, respectively. The assets are primarily invested in mutual funds held within Voluntary Employees' Beneficiary Association (VEBA) trusts and are valued using quoted prices in active markets (Level 1).

We have set aside assets in separate trusts, which we expect to be used to pay for certain nonqualified defined benefit and defined contribution plan obligations in excess of qualified plan limits. These assets are included in Other assets in our Consolidated Balance Sheet. The fair value of marketable securities held in trusts as of December 31 was as follows:

<i>(dollars in millions)</i>	2025	2024
Marketable securities held in trusts	\$ 750	\$ 786

NOTE 11: LEASES

We enter into lease agreements for the use of real estate space, vehicles, IT equipment, and certain other equipment, including engines, under both operating and finance leases. The majority of our lease agreements are accounted for as operating leases. Operating lease expense was \$495 million, \$422 million, and \$463 million for 2025, 2024, and 2023, respectively. Finance leases are not considered significant to our Consolidated Balance Sheet, Consolidated Statement of Operations, or Consolidated Statement of Cash Flows.

Leases under which we are the lessor are generally short-term leases that support our commercial aerospace customers during engine maintenance events. Our commercial aerospace customers have varying forms of aftermarket maintenance coverage that often provide a level of support for leased engines as part of the revenue arrangement. As such, leases where we are the lessor are not considered significant to our Consolidated Balance Sheet, Consolidated Statement of Operations, or Consolidated Statement of Cash Flows.

In 2025, 2024, and 2023, we entered into sale and leaseback transactions for the sale of new engines and related maintenance. We subsequently lease back the engines sold for a limited timeframe and account for them as operating leases. The proceeds

received as a result of sales of new engines are classified primarily in Other operating activities, net within our Consolidated Statement of Cash Flows. The net gains as a result of these transactions were not material.

Supplemental cash flow information related to operating leases were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Operating cash flows used in the measurement of operating lease liabilities	\$ 466	\$ 417	\$ 421
Operating lease right-of-use assets obtained in exchange for operating lease obligations	429	707	373

Future lease payments related to our operating lease liabilities as of December 31, 2025 are as follows:

<i>(dollars in millions)</i>	
2026	\$ 492
2027	419
2028	339
2029	228
2030	197
Thereafter	754
Total undiscounted lease payments	2,429
Less imputed interest	(377)
Total discounted lease payments	\$ 2,052

Our lease liabilities recognized in our Consolidated Balance Sheet were as follows as of December 31:

<i>(dollars in millions)</i>	2025	2024
Operating lease liabilities, current (included in Other accrued liabilities)	\$ 450	\$ 367
Operating lease liabilities, non-current	1,602	1,632
Total operating lease liabilities	\$ 2,052	\$ 1,999

The weighted-average remaining lease term related to our operating leases was 9 years and 10 years as of December 31, 2025 and 2024, respectively. The weighted-average discount rate related to our operating leases was 4.3% as of December 31, 2025 and 2024.

NOTE 12: INCOME TAXES

Income Before Income Taxes. The sources of income before income taxes are:

<i>(dollars in millions)</i>	2025	2024	2023
United States ⁽¹⁾	\$ 5,126	\$ 3,016	\$ 938
Foreign	3,607	3,178	2,898
Income before income taxes	\$ 8,733	\$ 6,194	\$ 3,836

(1) 2023 includes the impacts of the Powder Metal Matter.

Provision for Income Taxes. The income tax expense for the years ended December 31 are as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Current:			
United States:			
Federal	\$ 59	\$ 443	\$ 213
State	99	179	70
Foreign	717	606	575
	875	1,228	858
Future:			
United States:			
Federal	706	(13)	(411)
State	71	71	(53)
Foreign	12	(105)	62
	789	(47)	(402)
Income tax expense	\$ 1,664	\$ 1,181	\$ 456

Prior to 2022, research and experimental expenditures were generally deductible in the period incurred. A provision enacted in the Tax Cuts and Jobs Act of 2017 (TCJA) related to the capitalization of research and experimental expenditures for tax purposes became effective on January 1, 2022. In September and December 2023, the IRS issued interim guidance, retroactive to 2022, clarifying the capitalization requirements for certain types of research and experimental expenditures, which resulted in fewer costs being subject to capitalization. On July 4, 2025, “An Act to Provide for Reconciliation Pursuant to Title II of the H. Con. Res. 14” (the Act) was enacted. The Act allows for the immediate deductibility of research and experimental expenditures performed in the United States and certain U.S. territories. These legislative changes have impacted our federal and state current and deferred income tax provisions in the above table.

Reconciliation of Effective Income Tax Rate. The Company adopted ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures, prospectively as of January 1, 2025. Differences between effective income tax rates and the statutory U.S. federal income tax rate are as follows:

<i>(dollars in millions)</i>	2025	
	Amount	Rate
Statutory U.S. Federal Income Tax Rate	\$ 1,834	21.0 %
State and Local Income Tax, net of federal income tax effect ⁽¹⁾	168	1.9
Foreign Tax Effects	(17)	(0.2)
Effect of Cross-Border Tax Laws	96	1.1
U.S. Federal Research and development tax credit	(182)	(2.1)
Nontaxable or Nondeductible Items	51	0.6
Worldwide Changes in Prior Year Unrecognized Tax Benefits ⁽²⁾	(83)	(0.9)
Other ⁽³⁾	(203)	(2.3)
Effective income tax rate	\$ 1,664	19.1 %

(1) State and local taxes include current and deferred income taxes exclusive of changes in prior year uncertain tax positions.

(2) Includes Federal, State, and Foreign income tax effects related to prior year uncertain tax positions.

(3) Includes Federal income tax benefits related to legal entity reorganizations.

<i>(dollars in millions)</i>	2024		2023	
	Amount	Rate	Amount	Rate
Statutory U.S. federal income tax rate	\$ 1,301	21.0 %	\$ 805	21.0 %
Tax on international activities	6	0.1	(27)	(0.7)
Disposals of businesses	126	2.0	—	—
U.S. research and development credit	(188)	(3.0)	(168)	(4.4)
U.S. federal audit settlements and statute lapse	(277)	(4.5)	(59)	(1.5)
State income tax, net	187	3.0	17	0.4
Foreign Derived Intangible Income	(126)	(2.0)	(142)	(3.7)
Non-deductible legal charges ⁽¹⁾	148	2.4	5	0.1
Other	4	0.1	25	0.7
Effective income tax rate	\$ 1,181	19.1 %	\$ 456	11.9 %

(1) 2024 includes the impact of certain non-deductible legal charges related to the Resolution of Certain Legal Matters. See “Note 17: Commitments and Contingencies” for additional information.

Although the 2025 and 2024 effective tax rates are the same, the 2025 effective rate reflects a lower U.S. tax benefit associated with Foreign Derived Intangible Income resulting from the Act. Both periods include tax benefits associated with certain legal entity reorganizations and the tax effects of dispositions.

The 2024 effective tax rate includes tax benefits of \$0.3 billion resulting from the conclusion of the examination phases of the U.S. federal income tax audits for RTX 2017 and 2018 tax years and Rockwell Collins 2016, 2017, and 2018 tax years. Also included in the 2024 effective tax rate is a \$0.2 billion tax charge related to U.S. federal income taxes owed by the Company resulting from a favorable non-U.S. tax ruling Otis received in 2024. The ruling Otis received reduces U.S. foreign tax credits previously claimed by the Company in pre-separation tax years. This item is subject to a tax matters agreement entered into with Carrier and Otis in connection with the separations of those businesses in 2020. Accordingly, the Company recorded a pre-tax benefit of \$0.2 billion for a portion of the indemnity owed by Otis to the Company for the reduction in foreign taxes in the pre-separation years. Additionally, the Company is indemnified by Otis for the associated interest related to the Otis non-US ruling.

The 2023 effective tax rate includes a deferred tax benefit of \$0.7 billion associated with the \$2.9 billion Powder Metal Matter pre-tax charge.

Income Taxes Paid. We made net income tax payments of \$1.6 billion in 2025, further disaggregated as follows:

<i>(dollars in millions)</i>	2025
Federal ⁽¹⁾	\$ 856
State	102
Foreign ⁽²⁾	649
Total income taxes paid (net of refunds)	\$ 1,607

(1) Includes Internal Revenue Code Section 965 installment payments

(2) Foreign payments are spread across various jurisdictions, none of which are individually significant

Deferred Tax Assets and Liabilities. The tax effects of temporary differences and tax carryforwards which gave rise to future income tax benefits and payables at December 31, 2025 and 2024 are as follows:

<i>(dollars in millions)</i>	2025	2024
Future income tax benefits:		
Insurance and employee benefits	\$ 865	\$ 897
Warranty provisions	226	221
Capitalization of research and experimental expenditures	1,839	2,208
Other basis differences	982	1,060
Powder Metal Matter	226	455
Tax loss and other carryforwards	1,094	1,055
Tax credit carryforwards	963	800
Valuation allowances	(1,431)	(1,439)
Total future income tax benefits	\$ 4,764	\$ 5,257
Future income taxes payable:		
Goodwill and Intangible assets	\$ 5,399	\$ 5,675
Fixed assets	1,712	1,614
Inventory and contract balances	572	193
Other basis differences	629	627
Total future income tax payable	\$ 8,312	\$ 8,109

Valuation allowances have been established primarily for tax credit carryforwards, tax loss carryforwards, and certain temporary differences to reduce the future income tax benefits to expected realizable amounts.

Changes to valuation allowances consisted of the following:

<i>(dollars in millions)</i>	2025	2024	2023
Balance at January 1	\$ 1,439	\$ 1,465	\$ 842
Additions charged to income tax expense	68	228	170
Reductions credited to income tax expense	(67)	(239)	(58)
Other adjustments ⁽¹⁾	(9)	(15)	511
Balance at December 31	\$ 1,431	\$ 1,439	\$ 1,465

(1) 2023 includes the addition of the indefinite-lived tax loss carryforwards now disclosed in connection with Organisation for Economic Co-operation and Development (OECD) Pillar Two.

Tax Credit, Loss and Other Carryforwards. At December 31, 2025, tax credit carryforwards, principally state and foreign, and tax loss carryforwards, principally state and foreign, were as follows:

<i>(dollars in millions)</i>	Tax Credit Carryforwards	Tax Loss and Other Carryforwards
Expiration period:		
2026-2030	\$ 56	\$ 295
2031-2035	52	90
2036-2045	156	1,714
Indefinite	699	3,773
Total	\$ 963	\$ 5,872

The Company intends to repatriate certain undistributed earnings of its international subsidiaries that have been previously taxed in the U.S. As such, we recorded the taxes associated with the future remittance of these earnings. For the remainder of the Company's undistributed international earnings, unless tax effective to repatriate, the Company will continue to permanently reinvest these earnings. It is not practicable to estimate the amount of tax that might be payable on the remaining amounts.

Unrecognized Tax Benefits. In the ordinary course of business, there is inherent uncertainty in quantifying our income tax positions. We assess our income tax positions and record tax benefits for all years subject to examination based upon management's evaluation of the facts, circumstances, and information available at the reporting date. At December 31, 2025, we had gross tax-effected unrecognized tax benefits of \$1,227 million, of which \$1,218 million, if recognized, would impact the effective tax rate. A reconciliation of the beginning and ending amounts of unrecognized tax benefits and interest expense related to unrecognized tax benefits for the years ended December 31, 2025, 2024, and 2023 is as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Balance at January 1	\$ 1,263	\$ 1,442	\$ 1,515
Additions for tax positions related to the current year	125	84	89
Additions for tax positions of prior years	19	164	5
Reductions for tax positions of prior years	(47)	(13)	(141)
Settlements	(133)	(414)	(26)
Balance at December 31	\$ 1,227	\$ 1,263	\$ 1,442
Gross interest expense related to unrecognized tax benefits	\$ 68	\$ 127	\$ 62
Total accrued interest balance at December 31	256	255	233

We conduct business globally and, as a result, RTX or one or more of our subsidiaries files income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. In the normal course of business, we are subject to examination by taxing authorities throughout the world, including such major jurisdictions as Canada, China, France, Germany, India, Poland, Saudi Arabia, Singapore, Switzerland, the United Kingdom, and the United States. With few exceptions, we are no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations for years before 2014.

In connection with certain Internal Revenue Service (IRS) audits, the Company has previously filed protests with respect to certain IRS proposed adjustments for RTX (formerly United Technologies Corporation) tax years 2017 and 2018, pre-acquisition Rockwell Collins tax years 2016, 2017, and 2018, and pre-merger Raytheon Company tax years 2017, 2018, and 2019 as well as certain refund claims of Raytheon Company for tax years 2014, 2015, and 2016 filed prior to the Raytheon merger. The Company is in the process of disputing these adjustments at the Appeals Division of the IRS. The Company expects resolution at the Appeals Division for the RTX and Rockwell tax years within the next twelve months. The timing of any resolution at the Appeals Division for the Raytheon Company tax years is uncertain.

During the quarter ended March 31, 2025, the Company received an unfavorable decision from the Appeals Committee of the Kingdom of Saudi Arabia (KSA) General Secretariat of the Tax Committees (GSTC) assessing taxes and delay fines. The Company appealed this decision and on December 2, 2025, the GSTC issued a final decision with respect to income tax and withholding tax assessments substantially reversing its prior assessment.

NOTE 13: FINANCIAL INSTRUMENTS

We enter into derivative instruments primarily for risk management purposes, including derivatives designated as hedging instruments and those utilized as economic hedges. We operate internationally and in the normal course of business, are exposed to fluctuations in interest rates, foreign exchange rates, and commodity prices. These fluctuations can increase the costs of financing, investing, and operating the business. We have used derivative instruments, including swaps, forward contracts, and options, to manage certain foreign currency, interest rate, and commodity price exposures.

The present value of the aggregate notional principal of our outstanding foreign currency hedges was \$26 billion and \$17 billion at December 31, 2025 and 2024, respectively.

The following table summarizes the fair value and presentation in the Consolidated Balance Sheet for derivative instruments as of December 31:

<i>(dollars in millions)</i>	Balance Sheet Location	2025	2024
Derivatives designated as hedging instruments:			
Foreign exchange contracts	Other assets, current	\$ 357	\$ 177
	Other accrued liabilities	254	350
Derivatives not designated as hedging instruments:			
Foreign exchange contracts	Other assets, current	\$ 79	\$ 10
	Other accrued liabilities	11	101

At December 31, 2025, all derivative contracts accounted for as cash flow hedges will mature by May 2036. Cash receipts or payments on derivatives designated as cash flow hedges are recorded in Other operating activities, net within the Consolidated Statement of Cash Flows. The Company utilizes the critical terms match method for cash flow hedges in assessing derivatives for hedge effectiveness. Gains or losses attributable to cash flow hedging contract activity are primarily recorded as a component of Products sales when reclassified from Accumulated other comprehensive loss.

The Company enters into forward exchange contracts to partially hedge its net investment in certain foreign subsidiaries denominated in EUR and CAD. The Company assesses the effectiveness of its net investment hedges using the spot method. Cash receipts or payments on derivatives designated as net investment hedges are recorded as investing cash flows within the Consolidated Statement of Cash Flows.

As of December 31, 2024, we had €320 million of our €500 million principal value of euro-denominated long-term debt designated as a net investment hedge against our investments in European businesses. After March 31, 2025, this was no longer designated as a net investment hedge and subsequent effects are reflected within Other income (expense), net.

The effect of cash flow hedging relationships on Accumulated other comprehensive loss and on the Consolidated Statement of Operations in 2025 and 2024 are presented in “Note 18: Equity.” The hedged items and derivatives designated as hedging instruments are highly effective.

The effect of derivatives not designated as hedging instruments and related items is included within Other income (expense), net, on the Consolidated Statement of Operations and is not significant. Cash receipts or payments related to the settlement of derivatives not designated as hedging instruments are recorded as investing cash flows within the Consolidated Statement of Cash Flows.

NOTE 14: FAIR VALUE MEASUREMENTS

The following tables provide the valuation hierarchy classification of assets and liabilities that are carried at fair value and measured on a recurring basis in our Consolidated Balance Sheet:

<i>(dollars in millions)</i>	December 31, 2025			
	Total	Level 1	Level 2	Level 3
Recurring fair value measurements:				
Marketable securities held in trusts	\$ 750	\$ 676	\$ 74	\$ —
Derivative assets	436	—	436	—
Derivative liabilities	265	—	265	—

<i>(dollars in millions)</i>	December 31, 2024			
	Total	Level 1	Level 2	Level 3
Recurring fair value measurements:				
Marketable securities held in trusts	\$ 786	\$ 721	\$ 65	\$ —
Derivative assets	187	—	187	—
Derivative liabilities	451	—	451	—

Valuation Techniques. Our derivative assets and liabilities include foreign exchange contracts that are measured at fair value using internal models based on observable market inputs such as forward rates, interest rates, our own credit risk, and our counterparties’ credit risks.

As of December 31, 2025, there has not been any significant impact to the fair value of our derivative liabilities due to our own credit risk. Similarly, there has not been any significant adverse impact to our derivative assets based on our evaluation of our counterparties' credit risks.

The following table provides carrying amounts and fair values of financial instruments that are not carried at fair value in our Consolidated Balance Sheet at December 31:

<i>(dollars in millions)</i>	2025		2024	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt (excluding finance leases)	\$ 37,627	\$ 35,733	\$ 40,991	\$ 37,956

The following tables provide the valuation hierarchy classification of assets and liabilities that are not carried at fair value in our Consolidated Balance Sheet at December 31:

<i>(dollars in millions)</i>	2025			
	Total	Level 1	Level 2	Level 3
Long-term debt (excluding finance leases)	\$ 35,733	\$ —	\$ 34,800	\$ 933

<i>(dollars in millions)</i>	2024			
	Total	Level 1	Level 2	Level 3
Long-term debt (excluding finance leases)	\$ 37,956	\$ —	\$ 35,180	\$ 2,776

The fair value of our Short-term borrowings approximates the carrying value due to their short-term nature and is classified as level 3 within the fair value hierarchy.

NOTE 15: VARIABLE INTEREST ENTITIES

Pratt & Whitney holds a 61% program share interest in the International Aero Engines AG (IAE) collaboration with MTU Aero Engines AG (MTU) and Japanese Aero Engines Corporation (JAEC), and a 49.5% ownership interest in IAE. IAE's business purpose is to coordinate the design, development, manufacturing, and product support of the V2500 engine program through involvement with the collaborators. Additionally, Pratt & Whitney, JAEC, and MTU are participants in the International Aero Engines, LLC (IAE LLC) collaboration, whose business purpose is to coordinate the design, development, manufacturing, and product support for the PW1100G-JM engine for the Airbus A320neo family of aircraft. Pratt & Whitney holds a 59% program share interest and a 59% ownership interest in IAE LLC. IAE and IAE LLC retain limited equity with the primary economics of the programs passed to the participants. As such, we have determined that IAE and IAE LLC are variable interest entities with Pratt & Whitney as the primary beneficiary. IAE and IAE LLC have, therefore, been consolidated. Other collaborators participate in Pratt & Whitney's program share interest in IAE and IAE LLC. Pratt & Whitney's net program share interest in IAE and IAE LLC, after considering its sub-collaborator share, is 57% and 51%, respectively. The carrying amounts and classification of assets and liabilities for variable interest entities in our Consolidated Balance Sheet as of December 31, 2025 and 2024 are as follows:

<i>(dollars in millions)</i>	2025	2024
Current assets	\$ 14,703	\$ 10,315
Non-current assets	1,191	1,060
Total assets	\$ 15,894	\$ 11,375
Current liabilities	\$ 16,265	\$ 13,595
Non-current liabilities	116	140
Total liabilities	\$ 16,381	\$ 13,735

NOTE 16: GUARANTEES

We extend a variety of financial, market value, and product performance guarantees to third parties. These instruments expire on various dates through 2062. Additional guarantees of project performance for which there is no stated value also remain

outstanding. A portion of our third party guarantees are subject to indemnification for our benefit for any liabilities that could arise. As of December 31, 2025 and 2024, the following financial guarantees were outstanding:

	December 31, 2025		December 31, 2024	
	Maximum Potential Payment	Carrying Amount of Liability	Maximum Potential Payment	Carrying Amount of Liability
<i>(dollars in millions)</i>				
Commercial aerospace financing arrangements	\$ 106	\$ —	\$ 274	\$ —
Third party guarantees	248	—	79	1

We have made residual value and other guarantees related to various commercial aerospace customer financing arrangements. The estimated fair market values of the guaranteed assets equal or exceed the value of the related guarantees, net of existing reserves. Collaboration partners' share of these financing guarantees was \$0.1 billion at December 31, 2025 and 2024.

We also have obligations arising from sales of certain businesses and assets, including those from representations and warranties and related indemnities for environmental, health and safety, tax, and employment matters. The maximum potential payment related to these obligations is not a specified amount, as a number of the obligations do not contain financial caps. The carrying amount of liabilities related to these obligations were \$0.1 billion at December 31, 2025 and 2024. These primarily relate to environmental liabilities, which are included in our total environmental liabilities as further discussed in "Note 17: Commitments and Contingencies."

We accrue for costs associated with guarantees when it is probable that a liability has been incurred and the amount can be reasonably estimated. The most likely cost to be incurred is accrued based on an evaluation of currently available facts, and where no amount within a range of estimates is more likely, the minimum is accrued.

We also provide service and warranty policies on our products and extend performance and operating cost guarantees beyond our normal service and warranty policies on some of our products, particularly commercial aircraft engines. In addition, we incur discretionary costs to service our products in connection with specific product performance issues. Liabilities for performance and operating cost guarantees are based upon future product performance and durability, and are largely estimated based upon historical experience. Adjustments are made to accruals as claims data and historical experience warrant.

The changes in the carrying amount of service and product warranties and product performance guarantees for the years ended December 31 were as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Balance as of January 1	\$ 993	\$ 1,091	\$ 1,109
Warranties and performance guarantees issued	294	216	305
Settlements	(261)	(247)	(308)
Other	9	(67)	(15)
Balance as of December 31	\$ 1,035	\$ 993	\$ 1,091

Product and service guarantees incurred in connection with long-term production contracts and certain aftermarket arrangements are generally accounted for within the contract estimates at completion.

NOTE 17: COMMITMENTS AND CONTINGENCIES

Except as otherwise noted, while we are unable to predict the final outcome, based on information currently available, we do not believe that resolution of any of the following matters will have a material adverse effect upon our competitive position, results of operations, financial condition, or liquidity.

Environmental. Our operations are subject to environmental regulation by federal, state, and local authorities in the United States and regulatory authorities with jurisdiction over our foreign operations. We have accrued for the costs of environmental remediation activities, including but not limited to investigatory, remediation, operating and maintenance costs, and performance guarantees, and periodically reassess these amounts. We do not expect any additional liability to have a material adverse effect on our results of operations, financial condition, or liquidity. As of both December 31, 2025 and 2024, we had \$0.8 billion reserved for environmental remediation. Additional information pertaining to environmental matters is included in "Note 1: Basis of Presentation and Summary of Accounting Principles."

Commercial Aerospace Financing and Other Commitments. We had commercial aerospace financing commitments and other contractual commitments of approximately \$13 billion and \$14 billion as of December 31, 2025 and 2024, respectively, on a gross basis before reduction for our collaboration partners' share. Aircraft financing commitments, in the form of debt or

lease financing, are provided to certain commercial aerospace customers. The extent to which the financing commitments will be utilized is not currently known, since customers may be able to obtain more favorable terms from other financing sources. We may also arrange for third-party investors to assume a portion of these commitments. The majority of financing commitments are collateralized arrangements. We may also pay deposits on behalf of our customers to secure production slots with the airframers (pre-delivery payments). Our financing commitments with customers are contingent upon maintenance of certain levels of financial condition by our customers. Associated risks on these commitments are mitigated due to the fact that interest rates are variable during the commitment term and are set at the date of funding based on current market conditions, the fair value of the underlying collateral, and the creditworthiness of our customers. As a result, the fair value of these financing commitments is expected to equal the amounts funded.

We also have other contractual commitments to make payments to secure certain contractual rights to provide product on new aircraft platforms. The estimated amount and timing of these payments, which are generally based on future sales or engine flight hours, are reflected in “Other commercial aerospace commitments” in the table below. Payments made on these contractual commitments are included within intangible assets as exclusivity assets and are amortized over the term of underlying economic benefit. We have entered into certain collaboration arrangements, which may include participation by our collaboration partners in these commitments. In addition, in connection with our 2012 agreement to acquire Rolls-Royce’s ownership and collaboration interests in IAE, additional payments are due to Rolls-Royce contingent upon each hour flown through June 2027 by the V2500-powered aircraft in service as of the acquisition date. These flight hour payments, which are considered in “Other commercial aerospace commitments” below, will be capitalized as collaboration intangible assets as payments are made.

The following is the expected maturity of our commercial aerospace industry commitments as of December 31, 2025:

<i>(dollars in millions)</i>	Committed	2026	2027	2028	2029	2030	Thereafter
Commercial aerospace financing commitments	\$ 3,874	\$ 1,687	\$ 1,357	\$ 830	\$ —	\$ —	\$ —
Other commercial aerospace commitments	9,242	752	628	660	645	511	6,046
Collaboration partners’ share	(5,325)	(1,018)	(854)	(655)	(273)	(215)	(2,310)
Total commercial aerospace commitments	\$ 7,791	\$ 1,421	\$ 1,131	\$ 835	\$ 372	\$ 296	\$ 3,736

Other Financing Arrangements. We have entered into standby letters of credit and surety bonds with financial institutions to meet various bid, performance, warranty, retention, guarantee, and advance payment obligations for us or our affiliates. We enter into these agreements to assist certain affiliates in obtaining financing on more favorable terms, making bids on contracts and performing their contractual and other obligations. The stated values of these letters of credit agreements and surety bonds totaled \$4.2 billion as of December 31, 2025.

Offset / Industrial Participation Obligations. We have entered into industrial cooperation agreements, sometimes in the form of either offset agreements or ICIP agreements, as a condition to obtaining orders for our products and services from certain customers in foreign countries. At December 31, 2025, the aggregate amount of these agreements, both agreed to and anticipated to be agreed to, had an outstanding notional value of approximately \$13 billion. These agreements are designed to return economic value to the foreign country by requiring us to engage in activities supporting local defense or commercial industries, promoting a balance of trade, developing in-country technology capabilities, or addressing other local development priorities. Offset agreements may be satisfied through activities that do not require a direct cash payment, including transferring technology, providing manufacturing, training, and other consulting support to in-country projects, and the purchase by third parties (e.g., our vendors) of supplies from in-country vendors. These agreements may also be satisfied through our use of cash for activities such as subcontracting with local partners, purchasing supplies from in-country vendors, providing financial support for in-country projects, and making investments in local ventures. Such activities may also vary by country depending upon requirements as dictated by their governments. We typically do not commit to offset agreements until orders for our products or services are definitive. The amounts ultimately applied against our offset agreements are based on negotiations with the customers and typically require cash outlays that represent only a fraction of the notional value in the offset agreements. Offset programs usually extend over several or more years and may provide for penalties in the event we fail to perform in accordance with offset requirements. Historically, we have not been required to pay any penalties of significance.

Government Oversight. In the ordinary course of business, the Company and its subsidiaries and our properties are subject to regulatory and governmental examinations, information gathering requests, inquiries, investigations, and threatened legal actions and proceedings. For example, we are now, and believe that, in light of the current U.S. government contracting and overall enforcement environment, we will continue to be the subject of one or more U.S. government investigations. Our contracts with the U.S. government are also subject to audits. Agencies that oversee contract performance include: the Defense

Contract Audit Agency (DCAA), the Defense Contract Management Agency (DCMA), the Inspectors General of the U.S. Department of War (DoW) (formerly referred to as the U.S. Department of Defense), and other departments and agencies, the Government Accountability Office (GAO), the Department of Justice (DOJ), and Congressional Committees. Other areas of our business operations may also be subject to audit and investigation by these and other agencies. From time to time, agencies investigate or conduct audits to determine whether our operations are being conducted in accordance with applicable requirements. Such investigations and audits may be initiated due to a number of reasons, including as a result of a whistleblower complaint. Such investigations and audits could result in administrative, civil, or criminal liabilities, including the imposition of repayment obligations, fines, treble or other damages, forfeitures, disgorgement, restitution, or penalties, the suspension of government export licenses, and/or suspension or debarment from future U.S. government contracting. They could also result in deferred prosecution agreements, administrative orders, consent agreements, guilty plea agreements, and/or imposition of an independent compliance monitor. U.S. government investigations often take years to complete. In particular, in 2024 the Company entered into a deferred prosecution agreement (DPA) (DPA-1) with the DOJ and the Company settled an administrative proceeding with the Securities and Exchange Commission (SEC) (the SEC Administrative Order) to resolve the previously disclosed criminal and civil government investigations into payments made by Raytheon Company and its joint venture, Thales-Raytheon Systems (TRS), in connection with certain Middle East contracts since 2012 (Thales-Raytheon Systems and Related Matters). The Company also entered into a DPA (DPA-2) and a False Claims Act (FCA) settlement agreement with the DOJ to resolve previously disclosed criminal and civil government investigations into defective pricing claims for certain legacy Raytheon Company contracts entered into between 2011 and 2013 and in 2017 (DOJ Investigation and Contract Pricing Disputes).

Under these DPAs and the SEC Administrative Order, Raytheon Company and the Company are required to undertake certain cooperation and disclosure obligations (for a term commencing on the effective date of DPA-1 and the SEC Administrative Order, as applicable, and ending three years from the date on which Raytheon Company and the Company engage an independent compliance monitor satisfactory to the DOJ and SEC). A single independent compliance monitor was selected to oversee Raytheon Company's and the Company's compliance with their respective obligations under the DPAs and the SEC Administrative Order, and that monitor is expected to be in place by the end of the first quarter. In 2024, the Company also resolved certain voluntarily disclosed export controls violations primarily identified in connection with the integration of Rockwell Collins and, to a lesser extent, Raytheon Company, including certain violations that were resolved pursuant to a Consent Agreement (CA) with the Department of State (DOS). The CA, which has a three-year term, requires the Company to implement remedial compliance measures and to conduct an external audit of the Company's International Traffic in Arms Regulations (ITAR) compliance program. The CA also requires appointment of an external, independent Special Compliance Officer (SCO). The Company appointed its SCO on September 27, 2024. As noted above, the U.S. government reserves the right to suspend or debar a contractor from receiving new government contracts for fraudulent, criminal, or other seriously improper conduct. The U.S. government could also void any contracts found to be tainted by fraud. Like many defense contractors, we have received audit reports recommending the reduction of certain contract prices because, for example, cost or pricing data or cost accounting practices used to price and negotiate those contracts may not have conformed to government regulations. Some of these audit reports recommend that certain payments be repaid, delayed, or withheld, and may involve substantial amounts. We have made voluntary refunds in those cases we believe appropriate, have settled some allegations and, in some cases, continue to negotiate and/or litigate. The Company may be, and in some cases has been, required to make payments into escrow of disputed liabilities while the related litigation is pending. If the litigation is resolved in the Company's favor, any such payments will be returned to the Company with interest. Our final allowable incurred costs for each year are also subject to audit and have, from time to time, resulted in disputes between us and the U.S. government, with litigation resulting at the Court of Federal Claims (COFC) or the Armed Services Board of Contract Appeals (ASBCA), or their related courts of appeals. In addition, the DOJ has, from time to time, convened grand juries to investigate possible irregularities by us. We also provide products and services to customers outside of the U.S., and those sales are subject to local government laws, regulations, and procurement policies and practices. Our compliance with such local government regulations or any applicable U.S. government regulations (e.g., Arms Export Control Act (AECA), Export Administration Regulations (EAR), Foreign Corrupt Practices Act (FCPA), and ITAR) may also be investigated or audited. In addition, we accrue for liabilities associated with those matters that are probable and can be reasonably estimated. The most likely liability amount to be incurred is accrued based upon a range of estimates. Where no amount within a range of estimates is more likely, then we accrue the minimum amount. Other than as specifically disclosed in this Form 10-K, we do not expect these audits, investigations or disputes to have a material effect on our results of operations, financial condition, or liquidity, either individually or in the aggregate.

Pratt & Whitney Powder Metal Matter. In 2023, Pratt & Whitney determined that a rare condition in powder metal used to manufacture certain engine parts requires accelerated inspection of the PW1100 GTF fleet, which powers the A320neo. This determination was made pursuant to Pratt & Whitney's safety management system.

On August 4, 2023, Pratt & Whitney issued a special instruction (SI) to operators of PW1100 GTF powered A320neo aircraft, which required accelerated inspections and engine removals covering an initial subset of operational engines, no later than

September 15, 2023. During the third quarter of 2023, through its safety management system, Pratt & Whitney continued its engineering and industrial assessment, which resulted in an updated fleet management plan for the remaining PW1100 fleet. This updated plan requires a combination of part inspections and retirements for some high pressure turbine and high pressure compressor parts made from affected raw material. Guidance to affected operators was released via service bulletins (SB) and SI in November 2023, and this guidance has been reflected in airworthiness directives issued by the Federal Aviation Administration (FAA). Consistent with previous information, the actions are resulting in significant incremental shop visits.

As a result of this matter, Pratt & Whitney expects aircraft on ground levels for the PW1100 powered A320neo fleet to remain elevated through 2026. As a result of anticipated increased aircraft on ground levels and expected compensation to customers for this disruption, as well as incremental maintenance costs resulting from increased inspections and shop visits, Pratt & Whitney recorded a pre-tax operating profit charge in the third quarter of 2023 of \$2.9 billion, reflecting Pratt & Whitney's net 51% program share of the PW1100 program. This amount reflected our best estimate of expected customer compensation for the estimated duration of the disruption as well as the EAC adjustment impact of this matter to Pratt & Whitney's long-term maintenance contracts. The incremental costs to the business's long-term maintenance contracts include the estimated cost of additional inspections, replacement of parts, and other related impacts.

The charge recorded in the third quarter of 2023 resulted in a net increase in Other accrued liabilities of \$2.8 billion, which principally related to our 51% share of an accrual for expected customer compensation. At December 31, 2025 and 2024, we had other accrued liabilities of \$0.7 billion and \$1.7 billion, respectively, related to expected compensation to customers. The decrease in the accrual in 2025 and 2024 was primarily due to customer compensation in the form of credits issued and cash paid to customers during the period.

Other engine models within Pratt & Whitney's fleet contain parts manufactured with affected powder metal, but we do not currently believe there will be any resultant significant financial impact with respect to these other engine models at this time. The financial impact of the powder metal issue is based on historical experience and is subject to various assumptions and judgments, most notably, the number and expected timing of shop visits, inspection results and scope of work to be performed, turnaround time, availability of parts, available capacity at overhaul facilities, and outcomes of negotiations with impacted customers. While these assumptions reflect our best estimates at this time, they are subject to variability. Potential changes to these assumptions and actual incurred costs could significantly affect the estimates inherent in our financial statements and could have a material effect on the Company's results of operations for the periods in which they are recognized.

Legal Proceedings. The Company and its subsidiaries are subject to various contract pricing disputes, government investigations, and litigation matters across jurisdictions, updates to certain of which are set forth below.

Cost Accounting Standards Claims

As previously disclosed, in April 2019, a Divisional Administrative Contracting Officer (DACO) of the United States DCMA asserted a claim against Pratt & Whitney to recover alleged overpayments of approximately \$1.7 billion plus interest (\$1.5 billion at December 31, 2025). The claim is based on Pratt & Whitney's alleged noncompliance with Cost Accounting Standards (CAS) from January 1, 2007 to March 31, 2019, due to its method of allocating independent research and development costs to government contracts. Pratt & Whitney believes that the claim is without merit and filed an appeal to the ASBCA on June 7, 2019. On September 30, 2024, a DCMA DACO issued a second claim against Pratt & Whitney that similarly alleges that Pratt & Whitney was noncompliant with CAS due to its method of allocating independent research and development costs to government contracts from April 1, 2019 to December 31, 2023. The second claim demands payment of \$1.1 billion plus interest (\$410 million at December 31, 2025). Pratt & Whitney believes the second claim is without merit and filed an appeal to the ASBCA on October 15, 2024.

As previously disclosed, in December 2013, a DCMA DACO asserted a claim against Pratt & Whitney to recover alleged overpayments of approximately \$177 million plus interest (\$209 million at December 31, 2025). The claim is based on Pratt & Whitney's alleged noncompliance with CAS from January 1, 2005 to December 31, 2012, due to its method of determining the cost of collaborator parts used in the calculation of material overhead costs for government contracts. In 2014, Pratt & Whitney filed an appeal to the ASBCA. An evidentiary hearing was held and completed in June 2019. On November 22, 2021, the ASBCA issued its written decision sustaining in part and denying in part Pratt & Whitney's appeal. The ASBCA rejected the DCMA's asserted measure of the cost of collaborator parts, and ruled substantially in Pratt & Whitney's favor on other liability issues. The ASBCA remanded the appeal to the parties for resolution of damages issues, which could require further proceedings at the ASBCA. On December 23, 2021, the DCMA filed a motion with the ASBCA seeking partial reconsideration of the November 22, 2021 decision. The motion for reconsideration was denied on August 29, 2022. On December 23, 2022, the government filed an appeal to the United States Court of Appeals for the Federal Circuit (CAFC). On December 5, 2025, the CAFC issued an opinion which dismissed in part the government's appeal for lack of jurisdiction, reversed in part the ASBCA's November 22, 2021 decision with respect to the enforceability of a provision within a 2006 agreement between DCMA and Pratt & Whitney, and remanded the case to the ASBCA for further proceedings. We continue to believe that the

ASBCA's rejection of the DCMA's asserted measure of the cost of collaborator parts is well supported in fact and law. In December 2018, a DCMA DACO issued a second claim against Pratt & Whitney that similarly alleges that its method of determining the cost of collaborator parts does not comply with the CAS for calendar years 2013 through 2017. This second claim, which asserts the same measure of the cost of collaborator parts rejected by the ASBCA's November 22, 2021 decision, demands payment of \$269 million plus interest (\$187 million at December 31, 2025). Pratt & Whitney appealed this second claim to the ASBCA in January 2019. In December 2023, a DCMA DACO issued a third claim against Pratt & Whitney that similarly alleges that its method of determining the cost of collaborator parts does not comply with the CAS for calendar years 2018 through 2022. This third claim, which asserts the same measure of the cost of collaborator parts rejected by the ASBCA's prior decision, demands payment of \$277 million plus interest (\$105 million at December 31, 2025). Pratt & Whitney appealed this third claim to the ASBCA at the end of December 2023. Although subject to further litigation at the ASBCA and potentially further appellate proceedings, we continue to believe that the November 22, 2021 decision in the first claim will apply with equal legal effect to the second and third claims. Accordingly, we believe that the amounts demanded by the DCMA as set forth in the three claims are without legal basis and that any damages owed to the U.S. government for the three claims will not have a material adverse effect on our results of operations, financial condition, or liquidity.

Thales-Raytheon Systems and Related Matters

As previously disclosed, on October 15, 2024, Raytheon Company entered into DPA-1 with the DOJ and on October 16, 2024, the Company became subject to an administrative order issued by the SEC (the SEC Administrative Order) to resolve the previously disclosed criminal and civil government investigations into payments made by Raytheon Company and its joint venture, TRS, since 2012 in connection with certain Middle East contracts. Pursuant to DPA-1, among other terms, the DOJ will defer, for a period of three years, criminal prosecution of Raytheon Company related to one count of conspiracy to violate the anti-bribery provisions of the FCPA and one count of conspiracy to violate the AECA by failing to make related disclosures of certain payments that qualified as fees, commissions and/or political contributions under Part 130 of ITAR. If Raytheon Company and the Company fully comply with all of their respective obligations under DPA-1 during its three-year term (commencing on the effective date of DPA-1 and ending three years from the date on which the monitor is engaged), the DOJ will move for dismissal with prejudice of the deferred charges against Raytheon Company. Under DPA-1, the SEC Administrative Order, and DPA-2 discussed in "DOJ Investigation and Contract Pricing Disputes" below, Raytheon Company and the Company are required to undertake certain cooperation and disclosure obligations (for a term commencing on the effective date of DPA-1 and the SEC Administrative Order, as applicable, and ending three years from the date on which Raytheon Company and the Company engage an independent compliance monitor satisfactory to the DOJ and SEC). A single independent compliance monitor was selected to oversee Raytheon Company's and the Company's compliance with their respective obligations under DPA-1, the SEC Administrative Order, and DPA-2 discussed in "DOJ Investigation and Contract Pricing Disputes" below, and that monitor is expected to be in place by the end of the first quarter. During the fourth quarter of 2024, the Company paid \$384 million in the aggregate for DPA-1 and the SEC Administrative Order which was consistent with amounts accrued. The Company does not believe that these matters will have a material adverse effect on our results of operations, financial condition, or liquidity.

DOJ Investigation and Contract Pricing Disputes

As previously disclosed, on October 16, 2024, Raytheon Company entered into DPA-2 and a FCA settlement agreement with the DOJ to resolve previously disclosed criminal and civil government investigations into defective pricing claims for certain legacy Raytheon Company contracts entered into between 2011 and 2013 and in 2017. Pursuant to DPA-2, among other terms, the DOJ will defer, for a period of three years, criminal prosecution of Raytheon Company related to two counts of major fraud against the United States by Raytheon Company involving two legacy contracts. If Raytheon Company and the Company fully comply with all of their respective obligations in DPA-2 during its three-year term (commencing on the effective date of DPA-1 and ending three years from the date on which the monitor is engaged), the DOJ will move for dismissal with prejudice of the deferred charges against Raytheon Company. Under DPA-2 as well as DPA-1 and the SEC Administrative Order discussed in "Thales-Raytheon Systems and Related Matters" above, Raytheon Company and the Company are required to undertake certain cooperation and disclosure obligations (for a term commencing on the effective date of DPA-1 and the SEC Administrative Order, as applicable, and ending three years from the date on which Raytheon Company and the Company engage an independent compliance monitor satisfactory to the DOJ and SEC). A single independent compliance monitor was selected to oversee Raytheon Company's and the Company's compliance with their respective obligations under DPA-2 as well as DPA-1 and the SEC Administrative Order discussed in "Thales-Raytheon Systems and Related Matters" above, and that monitor is expected to be in place by the end of the first quarter. During the fourth quarter of 2024, the Company paid \$580 million in the aggregate for DPA-2 and the FCA Settlement Agreement which was consistent with amounts accrued plus interest. The Company does not believe that these matters will have a material adverse effect on our results of operations, financial condition, or liquidity.

Trade Compliance Matters

From time to time, we identify, investigate, remediate, and voluntarily disclose violations or potential violations of the ITAR and EAR to the relevant regulators. In May 2024, the DOS Office of Defense Trade Controls Compliance (DTCC) informed the Company of its intent to seek administrative penalties for alleged violations of the AECA and the ITAR. The DTCC informed us that it considers certain of our voluntary disclosures, primarily identified in connection with the integration of Rockwell Collins and, to a lesser extent, Raytheon Company, filed since 2019 to reflect deficiencies warranting a civil penalty. On August 29, 2024, the Company entered into a CA with the DOS to resolve these matters. The CA settles certain AECA and ITAR compliance matters with the DTCC and the Directorate of Defense Trade Controls. The CA has a three-year term and provides for: (i) a civil penalty of \$200 million, \$100 million of which is suspended on the condition that such amount is applied to DTCC-approved remedial compliance measures; (ii) the appointment of an external Special Compliance Officer (SCO) to oversee compliance with the CA, the AECA, and the ITAR; (iii) an external audit of the Company's AECA and ITAR compliance program; and (iv) implementation of additional remedial compliance measures related to AECA and ITAR compliance. The \$100 million portion of the settlement that is not subject to suspension, which was accrued by the Company in the second quarter of 2024, will be paid in installments, with \$34 million paid in September 2024, \$33 million paid in August 2025, and \$33 million due by August 29, 2026. As previously disclosed, the Company has determined that there is a probable risk of liability for potential penalties related to other export compliance matters which have been voluntarily disclosed to the cognizant regulators, but which are not subject to the CA. We have accrued \$218 million in the aggregate as of December 31, 2025 for these matters and the matters being resolved pursuant to the CA. We are currently unable to estimate the timing or outcome of the other voluntarily disclosed export compliance matters that are not subject to the CA. However, the Company does not believe these matters will have a material adverse effect on our results of operations, financial condition, or liquidity.

Powder Metal Disclosure Litigation and SEC Investigation

Following the Company's disclosures of a rare condition in powder metal used to manufacture certain Pratt & Whitney engine parts, two sets of civil actions were filed against RTX. First, two putative federal securities class action lawsuits were filed in the United States District Court for the District of Connecticut against the Company and certain current and former executives of the Company. The lawsuits allege that defendants violated federal securities laws by making material misstatements and omitting material facts relating to Pratt & Whitney's GTF engine fleet, including the impact of the powder metal issue on the fleet, in various regulatory filings. The lawsuits were consolidated, and on September 12, 2025, the Court granted the defendants' motion to dismiss the consolidated case. On October 14, 2025, plaintiffs filed a Notice of Appeal to the United States Court of Appeals for the Second Circuit. Second, multiple shareholder derivative lawsuits have been filed against current and former officers and directors of the Company in the United States District Court for the District of Delaware. The complaints in these actions allege that the defendants caused the Company to make materially false and misleading statements relating to Pratt & Whitney's GTF engines, and failed to maintain an adequate system of oversight, disclosure controls and procedures, and internal controls over financial reporting. Based on the information available to date, we do not believe that either matter will have a material adverse effect on our results of operations, financial condition, or liquidity.

The Company has received subpoenas from the SEC seeking engineering, operational, organizational, accounting, and financial documents and witness testimony in connection with an investigation relating to the Company's disclosures in 2023 of issues arising from Pratt & Whitney's use of powder metal in manufacturing various engine parts, its identification of certain risks associated with those manufacturing processes, and corrective actions identified by Pratt & Whitney to mitigate those risks. The Company is continuing to cooperate with the SEC's ongoing investigation. At this time, we are unable to predict the timing or outcome of this SEC investigation.

Where appropriate, we have recorded loss contingency accruals for the above-referenced matters. Unless noted above, loss contingency accruals are immaterial individually or in the aggregate.

Other. As described in "Note 16: Guarantees," we extend performance and operating cost guarantees beyond our normal warranty and service policies for extended periods on some of our products. We have accrued our estimate of the liability that may result under these guarantees and for service costs that are probable and can be reasonably estimated.

We also have other commitments and contingent liabilities related to legal proceedings, self-insurance programs, and matters arising out of the normal course of business. We accrue contingencies based upon a range of possible outcomes. If no amount within this range is a better estimate than any other, then we accrue the minimum amount.

In the ordinary course of business, the Company and its subsidiaries are also routinely defendants in, parties to, or otherwise subject to many pending and threatened legal actions, claims, disputes, and proceedings. These matters are often based on alleged violations of contract, product liability, warranty, regulatory, environmental, health and safety, employment, intellectual property, tax, and other laws. In some instances, claims for substantial monetary damages are asserted against the Company and

its subsidiaries and could result in fines, penalties, compensatory or treble damages, or non-monetary relief. We do not believe that these matters will have a material adverse effect upon our results of operations, financial condition, or liquidity.

NOTE 18: EQUITY

Accelerated Share Repurchases. On October 24, 2023, we entered into accelerated share repurchase (ASR) agreements with certain financial institution counterparties to repurchase shares of our common stock for an aggregate purchase price of \$10 billion. The ASR agreements provided for the repurchase of our common stock based on the average of the daily volume-weighted average prices of our common stock during the term of such ASR agreements, less a discount and subject to adjustments pursuant to the terms and conditions of the ASR agreements. Pursuant to the ASR agreements, we made aggregate payments of \$10 billion on October 26, 2023, and received initial deliveries of approximately 108.4 million shares of our common stock at a price of \$78.38 per share, which, on that date, represented approximately 85% of the shares expected to be repurchased. The aggregate purchase price was recorded as a reduction to Shareowners' equity, consisting of an \$8.5 billion increase in Treasury stock and a \$1.5 billion decrease in Common stock. We funded the payments with borrowings under a bridge credit agreement, which was repaid with the proceeds from term loan facilities, proceeds from issuances of long-term debt in the fourth quarter of 2023, and cash on hand. See "Note 9: Borrowings and Lines of Credit" for additional information.

The shares associated with the remaining portion of the aggregate purchase price have been settled over two tranches. In July 2024, the first tranche was settled upon final delivery to us of 0.4 million shares of common stock. In September 2024, with respect to the second tranche, we owed 2.2 million shares of common stock that we elected to cash settle for \$261 million. The cash payment required as a result of the second tranche settlement was due to the significant increase in the price of our common stock during the ASR term. The final average price under the ASR was \$94.28 per share.

Accumulated Other Comprehensive Loss. A summary of the changes in each component of Accumulated other comprehensive loss, net of tax is provided below:

<i>(dollars in millions)</i>	Foreign Currency Translation ⁽¹⁾	Defined Benefit Pension and Postretirement Plans	Unrealized Hedging (Losses) Gains	Accumulated Other Comprehensive Loss
Balance at December 31, 2022	\$ (1,005)	\$ (782)	\$ (231)	\$ (2,018)
Other comprehensive income (loss) before reclassifications, net	562	(1,041)	278	(201)
Amounts reclassified, pre-tax	—	(568)	80	(488)
Tax benefit (expense)	3	365	(80)	288
Balance at December 31, 2023	\$ (440)	\$ (2,026)	\$ 47	\$ (2,419)
Other comprehensive income (loss) before reclassifications, net	(506)	(674)	(291)	(1,471)

Tax benefit (expense)	(3)	194	54	245
Balance at December 31, 2024	\$ (949)	\$ (2,679)	\$ (127)	\$ (3,755)
Other comprehensive income (loss) before reclassifications, net	1,454	(910)	278	822
Amounts reclassified, pre-tax	(18)	118	6	106
Tax benefit (expense)	5	167	(63)	109
Balance at December 31, 2025	\$ 492	\$ (3,304)	\$ 94	\$ (2,718)

(1) The amount of foreign currency translation recognized in Other Comprehensive Income (loss) (OCI) includes gains (losses) relating to net investment hedges, as further discussed in "Note 13: Financial Instruments".

Amounts reclassified that relate to our defined benefit pension and postretirement plans include the amortization of prior service costs and actuarial net gains or losses recognized during each period presented. During the fourth quarter of 2025, an actuarial loss of \$0.3 billion (\$0.2 billion after tax) was recognized in connection with a settlement resulting from the annuity buy-out conversion. These costs are recorded as components of net periodic benefit (income) expense for each period presented. See "Note 10: Employee Benefit Plans" for additional details.

NOTE 19: STOCK-BASED COMPENSATION

RTX's long-term incentive plans authorize various types of market and performance-based incentive awards that may be granted to officers and key employees. The RTX Corporation Long-Term Incentive Plan (LTIP), was last amended on October 29, 2025. A total of 231 million shares have been authorized for issuance pursuant to awards under the LTIP including shares assumed from predecessor plans and adjustments associated with the separation of Carrier and Otis. As of December 31, 2025, approximately 101 million shares remain available for awards under the LTIP. The LTIP does not contain aggregate annual award limits, however, it sets an annual award limit per participant. The LTIP will expire after all authorized shares have been awarded or on May 2, 2034, whichever is sooner.

Under the LTIP, the exercise price of awards is set on the grant date and may not be less than the fair market value per share on that date. Generally, stock appreciation rights (SARs) and stock options have a term of ten years and a three-year vesting period, subject to limited exceptions. In the event of retirement, annual stock appreciation rights, stock options, and restricted stock units (RSUs) held for more than one year may become vested and exercisable, subject to certain terms and conditions. LTIP awards with performance-based vesting generally have a minimum three-year vesting period and vest based on actual performance against pre-established metrics. In the event of retirement, performance-based awards held for more than one year, remain eligible to vest based on actual performance relative to performance goals.

We measure the cost of share-based payments for restricted share units, stock options, stock appreciation rights, and awards with market-based conditions at fair value on the grant date. For awards that include performance conditions, compensation expense is recorded based on the estimated number of awards that are expected to vest at the end of the performance period. The cost of all share-based payments are recognized in the Consolidated Statement of Operations, net of expected forfeitures, as follows:

<i>(dollars in millions)</i>	2025	2024	2023
Total compensation cost recognized	\$ 519	\$ 437	\$ 425

The cash received and the related tax benefit realized on exercised stock options for 2025, 2024 and 2023 were not material. Additionally, the future income tax benefit recognized and the tax benefits realized on vesting of performance share units (PSU's), restricted stock awards and RSUs were not material for the respective periods.

At December 31, 2025, there was \$340 million of total unrecognized compensation cost related to non-vested equity awards granted under long-term incentive plans. This cost is expected to be recognized ratably over a weighted-average period of 2.3 years.

A summary of the transactions under our long-term incentive plans for the year ended December 31, 2025 follows.

<i>(shares and units in thousands)</i>	Stock Options		Stock Appreciation Rights		Performance Share Units		Restricted Stock and RSUs	
	Shares	Average Price ⁽¹⁾	Shares	Average Price ⁽¹⁾	Units	Average Price ⁽²⁾	Units	Average Price ⁽²⁾
Outstanding at:								
December 31, 2024	1,255	\$ 83.18	25,746	\$ 84.13	2,701	\$ 95.26	8,903	\$ 94.32
Granted ⁽³⁾	74	128.78	1,777	128.78	830	136.65	2,832	132.59
Exercised / earned ⁽³⁾	(348)	78.37	(8,031)	80.26	(945)	100.31	(3,054)	97.02
Cancelled	(5)	128.78	(225)	102.38	(73)	111.22	(327)	111.46
December 31, 2025	976	\$ 88.11	19,267	\$ 89.65	2,513	\$ 106.57	8,354	\$ 105.50

(1) Weighted-average exercise price per share.

(2) Weighted-average grant date fair value per share.

(3) Performance Share Units includes an adjustment for actual performance achieved on the 2022 award of 86 thousand units.

The weighted-average grant date fair value of stock options and stock appreciation rights granted during 2025, 2024, and 2023 was \$36.37, \$21.72, and \$24.66, respectively. The weighted-average grant date fair value of PSU's, which vest upon achieving certain performance metrics, granted during 2025, 2024, and 2023 was \$136.10, \$93.48, and \$96.39, respectively. The total fair value of awards vested during 2025, 2024, and 2023 was \$437 million, \$447 million, and \$273 million, respectively. The total intrinsic value (which is the amount by which the stock price exceeded the exercise price on the date of exercise) of stock options and stock appreciation rights exercised during 2025, 2024, and 2023 was \$553 million, \$245 million, and \$46 million, respectively. The total intrinsic value (which is the stock price at vesting multiplied by the number of underlying shares) of PSU's and other restricted awards vested was \$520 million, \$506 million, and \$263 million during 2025, 2024, and 2023, respectively.

The following table summarizes information about equity awards outstanding that are vested and expected to vest as well as equity awards outstanding that are exercisable at December 31, 2025:

(shares in thousands; aggregate intrinsic value in millions)	Equity Awards Vested and Expected to Vest				Equity Awards That Are Exercisable			
	Awards	Average Price	Aggregate Intrinsic Value	Remaining Term ⁽³⁾	Awards	Average Price	Aggregate Intrinsic Value	Remaining Term ⁽³⁾
Stock Options ⁽¹⁾	973	\$ 88.04	\$ 93	4.89	726	\$ 82.84	\$ 73	3.81
Stock Appreciation Rights ⁽¹⁾	19,175	89.53	1,800	5.23	13,098	83.07	1,314	3.92
Performance Share Units ⁽²⁾	2,476	106.37	454	1.04				
Restricted Stock and RSUs ⁽²⁾	8,060	105.28	1,478	1.49				

(1) Average price is weighted-average exercise price per share.

(2) Average price is weighted-average grant date fair value per share.

(3) Weighted-average contractual remaining term in years.

The fair value of each option award is estimated on the date of grant using a binomial lattice model. The following table indicates the assumptions used in estimating fair value for awards granted during 2025, 2024, and 2023. Lattice-based option models incorporate ranges of assumptions for inputs; those ranges are as follows:

	2025	2024	2023
Expected volatility	25.9%	24.7%	26.2%
Weighted-average volatility	26 %	25 %	26 %
Expected term (in years)	7.0	6.9	6.7
Expected dividend yield	2.0 %	2.6 %	2.3 %
Risk-free rate	4.1% - 4.4%	4.1% - 5.4%	3.6% - 4.8%

Expected volatilities are based on the returns of our stock, including implied volatilities from traded options on our stock for the binomial lattice model. We use historical data to estimate equity award exercise and employee termination behavior within the valuation model. The expected term represents an estimate of the period of time equity awards are expected to remain outstanding. The risk-free rate is based on the term structure of interest rates at the time of equity award grant.

NOTE 20: SEGMENT FINANCIAL DATA

Our operations, for the periods presented herein, are classified into three principal segments: Collins Aerospace (Collins), Pratt & Whitney, and Raytheon. Our segments are generally based on the management structure of the businesses and the grouping of similar operating companies, where each management organization has general operating autonomy over diversified products and services.

Collins Aerospace is a leading global provider of technologically advanced aerospace and defense products. Collins' solutions include aftermarket services for civil and military aircraft manufacturers, commercial airlines, and regional, business, and general aviation, as well as for defense and commercial space operations. Aftermarket services include spare parts, overhaul and repair, engineering and technical support, training and fleet management solutions, asset management services, and information management services. Collins designs, manufactures, and supplies electric power generation, management and distribution systems, environmental control systems, flight control systems, air data and aircraft sensing systems, engine control systems, engine components, engine nacelle systems, including thrust reversers and mounting pylons, interior and exterior aircraft lighting, aircraft cargo systems, evacuation systems, landing systems (including landing gear, wheels, and braking systems), communication, navigation, surveillance systems, fire and ice detection and protection systems, integrated avionics, and propeller systems. Collins also designs, manufactures, and supports complete cabin interiors, including seating, oxygen systems, food and beverage preparation, storage and galley systems, lavatory, and wastewater management systems. Collins' solutions support human space exploration with environmental control and power systems and extravehicular activity suits. Collins also provides connected aviation solutions and services through worldwide voice and data communication networks, airport systems and integrations, and air traffic management solutions. Collins supports government and defense customer missions by providing systems solutions for connected battlespace, test and training range systems, crew escape systems, and simulation and training.

Pratt & Whitney is among the world's leading suppliers of aircraft engines for commercial, military, business jet, and general aviation customers. Pratt & Whitney designs, manufactures, and services large engines for widebody, narrowbody, and large regional aircraft for commercial customers and for fighter, bomber, tanker, and transport aircraft for military customers. Pratt & Whitney also designs, manufactures, and services small engines powering regional airlines, general and business aviation, and

helicopters. Pratt & Whitney produces, sells, and services military and commercial auxiliary power units. Pratt & Whitney provides fleet management services and aftermarket maintenance, repair, and overhaul services in all of these product segments.

Raytheon is a leading provider of defensive and offensive threat detection, tracking and mitigation capabilities for U.S. and foreign government and commercial customers. Raytheon designs, develops, and provides advanced capabilities in integrated air and missile defense, smart weapons, missiles, advanced sensors and radars, interceptors, space-based systems, hypersonics, and missile defense across land, air, sea, and space. Raytheon provides air-to-air and air-to-ground sensors, command and control and weapons including the Advanced Medium Range Air-to-Air Missile (AMRAAM), StormBreaker smart weapon, Long Range Stand Off Weapon (LRSO), and the Early Warning Radar. Raytheon also provides advanced naval sensors, command and control and weapons including classified naval radars, the Next Generation Jammer (NGJ), shipboard missiles including the Tomahawk and Standard Missile 6 (SM-6), air-to-air missiles such as the AIM-9X SIDEWINDER missile, and integrated systems such as the SPY-6 radar. In addition, Raytheon provides advanced systems and products that span layered land and integrated air and missile defense, including the Patriot air and missile defense system, the Lower Tier Air and Missile Defense Sensor (LTAMDS), the National Advanced Surface-to-Air Missile System (NASAMS), Javelin, Excalibur, Stinger, and High-Energy Lasers. Raytheon also provides technologically advanced sensors, satellites, and interceptors, including the AN/TPY-2 radar, and Standard Missile 3 (SM-3). Raytheon delivers integrated space solutions including sensors, mission orchestration, satellite control, and software. Raytheon also focuses on the development and early introduction of next-generation technologies and systems, including hypersonics, counter-hypersonics, next-generation radars, sensor experimentation, and electro-optical/infrared (EO/IR) advancements, and aligns products that use shared technologies, including fire control radars, surveillance radars, EO/IR, space-qualified satellite components, and electronics.

Segment Information. RTX's chief operating decision maker (CODM) is our Chairman and Chief Executive Officer. The CODM uses segment operating profit as a profitability measure to assess actual and forecasted segment performance to make decisions regarding incentive compensation and the allocation of capital and other investments. Total net sales and operating profit (loss) by segment include inter-segment sales which are generally recorded at cost-plus a specified fee or at a negotiated fixed price. These pricing arrangements may result in margins different than what the purchasing segment realizes on the ultimate third-party sales.

We present a FAS/CAS operating adjustment outside of segment results, which represents the difference between the service cost component of our pension and PRB expense under the Financial Accounting Standards (FAS) requirements of U.S. GAAP and our pension and PRB expense under U.S. government Cost Accounting Standards (CAS) primarily related to our Raytheon segment. While the ultimate liability for pension and PRB costs under FAS and CAS is similar, the pattern of cost recognition is different. Over time, we generally expect to recover the related Raytheon pension and PRB liabilities through the pricing of our products and services to the U.S. government. Collins and Pratt & Whitney generally record pension and PRB expense on a FAS basis.

Acquisition accounting adjustments include the amortization of acquired intangible assets related to acquisitions, the amortization of the property, plant, and equipment fair value adjustment acquired through acquisitions, the amortization of customer contractual obligations related to loss-making or below-market contracts acquired, and goodwill impairment, if applicable. These adjustments are not considered part of management's evaluation of segment results.

Segment information for the years ended December 31 are as follows:

<i>(dollars in millions)</i>	2025				
	Net Sales	Research and Development	Other Segment Items ⁽¹⁾	Operating Profit (Loss)	Operating Profit (Loss) Margins
Collins Aerospace	\$ 30,196	\$ (1,301)	\$ (23,972)	\$ 4,923	16.3 %

(1) Total assets include acquired intangible assets and the property, plant, and equipment fair value adjustment. Related amortization expense is included in Acquisition accounting adjustments.

Geographic External Sales by Origin and Long-Lived Assets. Geographic external sales are attributed to the geographic regions based on their location of origin. U.S. external sales include export sales to commercial customers outside the U.S., as well as sales to the U.S. government, commercial and affiliated customers, which are known to be for resale to customers outside the U.S. Long-lived assets are Fixed assets, net attributed to the specific geographic regions.

<i>(dollars in millions)</i>	External Net Sales			Long-Lived Assets	
	2025	2024	2023	2025	2024
United States ⁽¹⁾	\$ 74,778	\$ 67,701	\$ 57,539	\$ 13,791	\$ 13,041
International

Asia Pacific	2,864	2,587	2,182	899	834
Middle East and North Africa	348	486	492	101	98
Other regions	5,175	4,471	3,858	942	927
Consolidated	\$ 88,603	\$ 80,738	\$ 68,920	\$ 16,868	\$ 16,089

(1) 2023 external net sales includes the reduction in sales from the Powder Metal Matter.

Disaggregation of Revenue. We also disaggregate our contracts from customers by geographic region based on customer location, by type of customer, and by sales type. Our geographic region based on customer location uses end user customer location where known or practical to determine, or in instances where the end user customer is not known or not practical to determine, uses “ship to” location as the customer location. In addition, for our Raytheon segment, we disaggregate our contracts from customers by contract type. We believe these categories best depict how the nature, amount, timing, and uncertainty of our revenue and cash flows are affected by economic factors.

Segment sales disaggregated by geographic region based on customer location for the years ended December 31 are as follows:

(1) Excludes foreign military sales through the U.S. government.

2023

<i>(dollars in millions)</i>	Collins Aerospace	Pratt & Whitney	Raytheon	Other	Total
Sales to the U.S. government ⁽¹⁾	\$ 6,357	\$ 5,206	\$ 19,965	\$ 100	\$ 31,628
Foreign military sales through the U.S. government	304	1,442	3,228	—	4,974
Foreign government direct commercial sales	1,110	515	2,620	4	4,249
Commercial aerospace and other commercial sales ⁽²⁾	16,523	11,133	407	6	28,069
Consolidated net sales	24,294	18,296	26,220	110	68,920
Inter-segment sales	1,959	—	130	(2,089)	—
Business segment sales	\$ 26,253	\$ 18,296	\$ 26,350	\$ (1,979)	\$ 68,920

(1) Excludes foreign military sales through the U.S. government.

(2) Includes the reduction in sales from the Powder Metal Matter.

The largest contributor to our Commercial aerospace and other commercial sales is Airbus. Sales to Airbus primarily relate to Pratt & Whitney and Collins products, and prior to discounts and incentives were approximately 14%, 14%, and 17% of total net sales in 2025, 2024, and 2023, respectively. Total net sales in 2023 includes the reduction in sales from the Powder Metal Matter.

Segment sales disaggregated by sales type for the years ended December 31 are as follows:

	2025				
<i>(dollars in millions)</i>	Collins Aerospace	Pratt & Whitney	Raytheon	Other	Total
Products	\$ 21,467	\$ 18,467	\$ 24,063	\$ 174	\$ 64,171

Business segment sales	\$ 28,043	\$ 26,713	\$ 26,350

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

As required by Rule 13a-15 under the Securities Exchange Act of 1934, as amended, we carried out an evaluation under the supervision and with the participation of our management, including the Chairman and Chief Executive Officer (CEO), the Executive Vice President and Chief Financial Officer (CFO), and the Senior Vice President and Controller (Controller), of the effectiveness of the design and operation of our disclosure controls and procedures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, our CEO, CFO, and Controller concluded that our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our CEO, CFO, and Controller, as appropriate, to allow timely decisions regarding required disclosure.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with accounting principles generally accepted in the U.S. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Our management has assessed the effectiveness of our internal control over financial reporting as of December 31, 2025. In making its assessment, management has utilized the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in its 2013 Internal Control – Integrated Framework. Our management has concluded that based on its assessment, our internal control over financial reporting was effective as of December 31, 2025. The effectiveness of our internal control over financial reporting as of December 31, 2025 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in its report which is set forth within Item 8 of this Annual Report on Form 10-K. There were no changes in our internal control over financial reporting during the quarter ended December 31, 2025 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

During the quarter ended December 31, 2025, no director or “officer” (as defined in Rule 16a-1(f)) of the Company adopted or terminated a “Rule 10b5-1 trading arrangement” or “non-Rule 10b5-1 trading arrangement,” as each term is defined in Item 408(a) of Regulation S-K.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

The information required by Item 10 with respect to directors, the Audit Committee of the Board of Directors, audit committee financial experts, and the procedures by which our shareowners may recommend nominees to our Board of Directors is incorporated herein by reference to the sections of our Proxy Statement for the 2026 Annual Meeting of Shareowners titled “Election of Directors” (including under the subheadings “Nominees” and “How Candidates Are Identified”) and “Corporate Governance” (including under the subheading “Board Committees”).

Information about our Executive Officers

The following persons are executive officers of RTX Corporation:

Name	Title	Other Business Experience Since 1/1/2021	Age as of 2/6/2026

Dantaya M. Williams	Executive Vice President & Chief Human Resources Officer, RTX Corporation (since June 2020)		51

All of the officers serve at the pleasure of the Board of Directors of RTX Corporation or the subsidiary designated.

The Company has an insider trading policy, processes, and procedures governing transactions in the Company’s securities that apply to all Company personnel, including directors, officers, employees, and other covered persons. We believe our insider trading policy, processes, and procedures are reasonably designed to promote compliance with insider trading laws, rules, regulations, and the listing standards of the New York Stock Exchange. Among other things, our Securities Trading and

Release of Material Nonpublic Information Policy prohibits our employees and related persons and entities from trading in RTX securities and other companies while in possession of material, nonpublic information, and prohibits our employees from disclosing material, nonpublic information to others who may trade on the basis of that information. Our directors, executive officers, and certain employees must also comply with additional trading restrictions, including, without limitation, trading in RTX securities only during an open trading window period and after obtaining advance approval. A copy of our Securities Trading and Release of Material Nonpublic Information Policy is filed as Exhibit 19 to this Form 10-K.

Information concerning Section 16(a) compliance is incorporated herein by reference to the section of our Proxy Statement for the 2026 Annual Meeting of Shareowners titled “Other Important Information” under the heading “Delinquent Section 16(a) Reports.” We have adopted a code of conduct that applies to all our directors, officers, employees, and representatives. Information regarding our Code of Conduct is incorporated herein by reference to the section of our Proxy Statement for the 2026 Annual Meeting of Shareowners titled “Other Important Information” under the heading “Corporate Governance Information, our Code of Conduct and How to Contact the Board.” This code is publicly available on our website at <http://www.rtx.com/Our-Company/ethics-and-compliance>. Amendments to the code of conduct and any grant of a waiver from a provision of the code requiring disclosure under applicable Securities and Exchange Commission (SEC) rules will be disclosed on our website. Our Corporate Governance Guidelines and the charters of our Board of Directors’ Audit Committee, Finance Committee, Governance and Public Policy Committee, Human Capital and Compensation Committee, and Special Activities Committee are available on our website at <https://www.rtx.com/who-we-are/corporate-governance>. These materials may also be requested in print free of charge by writing to our Investor Relations Department at RTX Corporation, 1000 Wilson Blvd., Arlington, VA 22209.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Item 11 is incorporated herein by reference to the sections of our Proxy Statement for the 2026 Annual Meeting of Shareowners titled “Compensation Discussion & Analysis,” “Compensation of Directors,” “Equity Award Granting Policy,” and “Report of the Human Capital & Compensation Committee.”

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information relating to security ownership of certain beneficial owners and management and the Equity Compensation Plan Information required by Item 12 is incorporated herein by reference to the section of our Proxy Statement for the 2026 Annual Meeting of Shareowners titled “Share Ownership”.

Securities Authorized for Issuance Under Equity Compensation Plans

The following table provides information about our equity compensation plans that authorize the issuance of shares of our common stock as of December 31, 2025.

	Number of securities to be issued upon exercise of outstanding options, warrants, and rights (a)	Weighted average exercise price of outstanding options, warrants, and rights (\$/share) (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by shareowners	22,606,067 ⁽¹⁾	\$ 89.57	101,179,202 ⁽²⁾
Equity compensation plans not approved by shareowners	—	—	—

- (1) Consists of shares of RTX Common Stock issuable under the Plan: (i) upon the exercise of outstanding nonqualified stock options; (ii) upon the exercise of outstanding stock appreciation rights (SARs); (iii) pursuant to outstanding restricted stock unit (RSU) awards and performance share unit (PSU) awards, reflecting actual performance for the 2023 PSU award and assuming target-level performance for the 2024 and 2025 PSU awards (up to an additional 1,662,337 shares of RTX Common Stock could be issued if maximum performance is achieved for all metrics); and (iv) upon the settlement of outstanding deferred stock units and RSUs awarded under the RTX Corporation Board of Directors Deferred Stock Unit Plan, as amended and restated effective October 1, 2023. Under the Plan, each SAR referred to in clause (ii) is exercisable for a number of shares of RTX Common Stock having a value equal to the difference between the market price of RTX on the exercise date and the exercise price. For purposes of determining the total number of shares to be issued in respect of outstanding SARs as reflected in column (a) above, the NYSE closing price for a share of RTX Common Stock on the last trading day of 2025 of \$183.40 was used. The weighted-average exercise price of outstanding options, warrants and rights shown in column (b) takes into account only the shares identified in clauses (i) and (ii).
- (2) Represents the maximum number of shares of Common Stock available to be awarded under the Plan as of December 31, 2025. RSUs and PSUs (full-value awards) will reduce the number of shares of Common Stock available for delivery under the Plan in an amount equal to 4.03 times the number of shares subject to the awards. SARs and stock options are not full-value awards and will reduce the number of shares of RTX Common Stock available for delivery under the Plan on a one-for-one basis.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by Item 13 is incorporated herein by reference to the sections of our Proxy Statement for the 2026 Annual Meeting of Shareowners titled “Corporate Governance” (under the subheading “Director Independence”) and “Other Important Information” (under the subheading “Transactions with Related Persons”).

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by Item 14 is incorporated by reference to the section of our Proxy Statement for the 2026 Annual Meeting of Shareowners titled “Appointment of PricewaterhouseCoopers LLP to Serve as Independent Auditor for 2026,” including the information provided in that section with regard to “Audit Fees,” “Audit-Related Fees,” “Tax Fees,” and “All Other Fees.”

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) Financial Statements and Schedules

- (1) The following financial statements of RTX Corporation, supplemental information, and report of independent registered public accounting firm are included in this Form 10-K:

Report of Independent Registered Public Accounting Firm (PCAOB ID 238)

Consolidated Statement of Operations for the Years Ended December 31, 2025, 2024, and 2023

Consolidated Statement of Comprehensive Income for the Years Ended December 31, 2025, 2024, and 2023

Consolidated Balance Sheet at December 31, 2025 and 2024

Consolidated Statement of Cash Flows for the Years Ended December 31, 2025, 2024, and 2023

Consolidated Statement of Changes in Equity for the Years Ended December 31, 2025, 2024, and 2023

Notes to Consolidated Financial Statements

- (2) List of financial statement schedules:

All schedules have been omitted because they are not required, not applicable, or the information is otherwise included.

(b) Exhibits:

The following list of exhibits includes exhibits submitted with this Form 10-K as filed with the Securities and Exchange Commission (SEC) and those incorporated by reference to other filings.
